FORWARD-LOOKING STATEMENTS

This Draft Red Herring Prospectus contains certain statements which are not statements of historical facts and may be described as "*Forward-Looking Statements*". These forward-looking statements generally can be identified by words or phrases such as "aim", "anticipate", "believe", "expect", "estimate", "intend", "objective", "plan", "propose", "project", "will", "will continue", "will pursue" or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, plans, revenue and profitability (including, without limitations, any financial or operating projections or forecasts) and other matters discussed in this Draft Red Herring Prospectus that are not historical facts. However, these are not the exclusive means of identifying forward looking statements.

These forward-looking statements are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements. All forward looking statements are subject to risks, uncertainty, expectations, and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statements.

Actual results may differ materially from those suggested by forward-looking statements due to risks or uncertainties associated with expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which Our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India which have an impact on Our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in laws, regulations and taxes and changes in competition in the industry and incidents of any natural calamities and/or acts of violence. Certain important factors that could cause actual results to differ materially from Our Company's expectations include, but not limited to the following:

- Though our order book has substantial contracts with unrelated entities and for construction projects, we do not have a large exposure to work orders or EPC contracts outside our Promoter Group entities and Group Companies and we have minimal experience in dealing with unrelated third-party entities and this will pose obstacles and challenges in our growth as a construction company. Further, if we are unable to succeed as a developer or contractor outside of our promoter group entities and group companies our long-term growth, results of operation and profits could be limited.
- Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.
- Our Company is evolving from an intra-group contractor, providing construction services to group entities and Promoter Related entities (where our group entities and corporate Promoters bid for third party civil construction contracts) into a larger contractor and developer entering into contracts with unrelated third parties and faces challenges inherent in dealing with unknown and unrelated entities and previously unexplored construction industry space. In the event we suffer losses, delays and other setbacks in such transactions, individually or in the aggregate, these will have an adverse effect on our financial condition and results of operation and also limit our growth outside our Promoter Group related entities and Group Companies.
- Some of our Promoters Group Entities and Group Companies have objects which would allow them to engage in the line of business similar to our Company. There are no non – compete agreements between our Company and such Promoter Group and Group Companies. We cannot assure that our Promoter will not favour the interests of such Companies over our interest or that the said entities will not expand which may increase our competition, this may adversely affect our growth, business operations and the financial condition of our Company.
- Our Company has in the past entered into related party transactions with our Promoter, Promoter Group Companies, and Group Companies may continue to do so in the future. There can be no assurance that their risks or liability will not fall on our Company. Further, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.
- Identification of non-compliances / discrepancies with the provisions of Companies Act, 2013 and rules

- made thereunder in relation to allotment of securities.
- Our financial condition may be materially and adversely affected if we fail to obtain new contracts or our current contracts are terminated or face delays in commencement.
 - We enter into various contracts / sub-contract agreements with our customers or primary contractors for our construction projects. Such agreements contain conditions and requirements, the non-fulfilment of which could result in delays or inability to implement and complete our projects as contemplated.
 - We rely on various third parties for their services and the supply of raw materials to our projects and factors affecting the performance of their obligations could adversely affect our reputation and business and revenues from our operations. Though under several EPC contracts we are responsible for procuring and maintaining approvals, since we subcontract the work in parts to several subcontractors, it is the subcontractors who maintain the approvals for all materials and labour and services as provided to us, hence exposing us to the risk of our sub-contractor default and non-compliance with applicable laws and regulations for the same.
 - We do not own our Registered Office and have taken the same on lease and license basis from our promoter group entity, M/s Artemis Electricals and Projects Limited. Any revocation or adverse changes in the terms of the lease and license may have an adverse effect on our business, prospects, results of operations and financial condition.
 - Changes in laws and regulations relating to the sectors/areas in which we operate
 - Inability to identify the new premises may adversely affect the operations, finances and profitability of the Company;
 - Uncertainty regarding the real estate market, land prices, economic conditions and other factors beyond our control;
 - Inability to identify or effectively respond to consumer needs, expectations or trends in a timely manner;
 - Our ability to successfully implement our growth strategy and expansion plans, and to successfully launch and implement various projects;
 - Delays in the execution of the projects , premature termination of the projects for which we may not receive the payments;
 - Conflict of Interest with affiliated companies, the promoter group and other related parties;
 - Our contingent liabilities could materially and adversely affect our business, results of operations and financial condition
 - Order Book may not clearly represent our future results and our actual revenue may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations;
 - Our operations necessitate substantial working capital. Should our cash flows be inadequate for meeting these needs, it could negatively impact our operational outcomes. Absence of large projects and dependence on small developers;
 - There are pending litigations against our Company, Promoters and our Subsidiaries. Any adverse decision in such proceedings may render us / them liable to liabilities / penalties and may adversely affect our business, results of operations and financial condition.
 - We have undertaken a real estate project in Mumbai and propose to do the same in future. Given our lack of experience in real estate development and sales, if we fail to succeed as a developer, it could negatively affect our operational results and financial stability;
 - Our business success and profitability heavily rely on the dynamics of the Indian real estate market, especially in the Mumbai Metropolitan Region (MMR). Fluctuations in the MMR market could impact our ability to sell our projects and set unit prices effectively, potentially leading to adverse effects on our operational outcomes and financial health;
 - Changes in political and social conditions in India, the monetary and interest rate policies of India and other countries;
 - Changes in government policies and regulatory actions that apply to or affect our business;
 - Our failure to keep pace with rapid changes in technology;
 - The performance of the financial markets in India and globally;
 - Discrepancies in some of our corporate records relating to forms filed with the Registrar of Companies, may potentially leading to adverse effects on our operational outcomes and financial health;
 - There have been instances of delay in filing of GST, ESIC and PF returns of the Company. We may be subject to regulatory actions and penalties for any such delays and our business, financial condition and reputation may be adversely affected.
 - Our operations are subject to risks of mishaps or accidents that could cause damage or loss to life and

property. In the past there have been an instance of fatal accident in one of our project locations. Any such fatal accident or incident causing damage or loss to life and property in future could negatively affect our reputation, thereby making it more difficult for us to conduct our business operations effectively;

- Our name and logo  are not registered as a trademark. However, we have applied for trademark registration under class 37 of Trademarks Act, 1999. Maintaining the reputation of our corporate name, logo and the goodwill associated with these trademarks is material to our success. If we are unable to protect our intellectual property rights, our business, financial condition and results of operations may be adversely affected
- The occurrence of natural disasters or calamities;
- Failure to successfully upgrade our products and service portfolio, from time to time;
- Specific approvals and licenses are required for regular business operations. Failure to obtain, renew, or update these necessary registrations could negatively impact our business activities, operational results, and financial health;
- We may be subject to liability claims or claims for damages or termination of contracts with Developers for failure to meet project completion timelines or defective work, which may adversely impact our profitability, cash flows, results of operations and reputation.
- We rely on various third parties for their services and the supply of raw materials to our Contracts and factors affecting the performance of their obligations could adversely affect our reputation and business and revenues from our operations.
- We are subject to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.

*To obtain a complete understanding, prospective investors should read this section in conjunction with the sections “**Our Business**”, “**Industry Overview**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on pages 152, 128 and 285 respectively, as well as the other financial and statistical information contained in this Draft Red Herring Prospectus.*

INTERNAL RISKS

- 1. Significant portion of our revenues is concentrated from a limited number of clients, mainly our promoter related entities and group companies. The loss of any of our significant clients may have an adverse effect on our business, financial condition, results of operations, and prospect.***

For the eight-month period ended on November 30, 2023, and for the fiscal 2023, 2022 and 2021, our top ten (10) largest clients accounted for approximately 100% of our revenues from operations, respectively. The loss of a significant client or clients would have a material adverse effect on our financial results. We cannot assure

you that we can maintain the historical levels of business from these clients or that we will be able to replace these clients in case we lose any of them. Furthermore, major events affecting our clients, such as bankruptcy, change of management, mergers and acquisitions could adversely impact our business. If any of our major clients becomes bankrupt or insolvent, we may lose some or all of our business from that client and our receivable from that client would increase and may have to be written off, adversely impacting our income and financial condition.

Our revenue from the top five (5) and top ten (10) customers for the eight-month period ended November 30, 2023 and the financial years ended March 31, 2023, March 31, 2022 and March 31, 2021 are as follows:

(₹ in lakhs)

For further details, please see “**Our Business**” on page no. 152 and “**Restated Financial Statements – Note 33 – Related Party Transactions**” on page no. 268 of this Draft Red Herring Prospectus.

Significant revenue from a limited number of clients increases the potential volatility of our results and exposure to individual contract risks. We may be required to accept onerous contractual terms in our contracts for projects awarded to us by such clients. While, our Company has not experienced such instances in the past, in the event our Company is unable to comply with its obligations in any contract with such top five (5) clients, it would result in a substantial reduction in the number of contracts awarded by such client in future resulting in an impact on the overall business and revenue generated by the Company from such client. Further, such concentration of our business on selected projects or clients may have an adverse effect on our results of operations.

We cannot assure you that we can maintain the same levels of business from our top clients. Furthermore, events such as adverse market conditions, any restructuring or changes in the regulatory regime, could adversely affect our clients and consequently impact our business.

2. **Our Company and our Holding Company has certain pending statutory dues as of November 30, 2023.**

Our Company and our Promoter Companies are generally regular in depositing the undisputed statutory dues including Provident Fund, Employees’ State Insurance, Duty of Custom, Cess and Other Material Statutory Dues applicable to it except for the following which are pending before relevant authorities as of November 30, 2023:

3. *Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.*

Particulars	(₹ in lakhs)			
	As on November 30, 2023	As on March 31, 2023	As on March 31, 2022	As on March 31, 2021
Cash flow from operating activities	(192.64)	1225.57	1291.68	619.04
Cash flow from financing activities	(4.17)	(1218.05)	(508.23)	(1824.29)
Cash flow from investing activities	(271.46)	(211.30)	(115.65)	1211.36

Cash flow of a Company is a key indicator to show the extent of cash generated from operating activities, investing activities and financing activities to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations.

Our company tries to achieve positive cash flows from operations which is evident from the past financial statements. For the stub period ended November 30, 2023 we have some billed revenue the payment for which are due and hence the cash flow from operations is negative. Cash flow from financing activities are negative due to repayment of borrowings where as cash flow from investing

4. *There are outstanding legal proceedings involving our Company, Promoter, certain Directors and Group Companies which may adversely affect our business, financial condition and results of operations.*

Our Company, Promoter, certain Directors and Group Companies are currently involved in certain legal proceedings. These proceedings are pending at different levels of adjudication before various courts, enquiry officers and appellate forums. Such proceedings could divert management’s time, attention and consume financial resources in their defence. Further, an adverse judgment in some of these proceedings could have an adverse impact on our business, financial condition and results of operations. For details in relation to certain material litigation, please see the section entitled “*Outstanding Litigation and Material Developments*” on page no. 301 A summary of the outstanding proceedings involving our Company, Promoter, certain Directors and Group Companies, as disclosed in this Draft Red Herring Prospectus, to the extent quantifiable, have been set out below:

**Our Director, Mr. Pravinkumar Agarwal filed a Criminal Writ Petition no. 4217 of 2022 before the Hon'ble High Court at Bombay to quash FIR No. 415 of 2022. An order dated October 21, 2022 was passed by the Court stating that the chargesheet shall not be filed without leave of the Hon'ble High Court. The matter was last heard on March 27, 2023 and is presently pending and the next date of hearing is not assigned by the Hon'ble High Court. For more details, please refer chapter "Outstanding Litigation" on 301 page of Draft Red Herring Prospectus.*

If any Orders are passed in such proceedings which are adverse to our interests, the same may affect our reputation and standing and may have a material adverse effect on our business, results of operations and financial condition.

5. ***Our profitability and results of operations may be adversely affected in the event of any disruption in the supply of raw materials or increase in the price of raw materials, fuel costs, labour or other inputs. Our ability to pass on increases in the purchase price of raw materials, fuel and other inputs may be limited in the case of contracts with limited price escalation provisions. Further, our actual cost in executing our contracts may vary substantially from the assumptions underlying our estimates.***

The timely and cost-effective execution of our projects is dependent on the adequate and timely supply of key raw materials, such as steel, cement, stone, bricks, wood, aggregate, concrete, sand, sanitary and plumbing items and others.

The raw material consumption contribution is approximately 7.31%, 7.17%, 14.72% and 22.72% of our revenue from operations for the eight-month period ended on November 30, 2023, and for the fiscal 2023,

2022 and 2021 respectively on a consolidated basis. We typically do not enter into any long-term contracts for the purchase of raw materials with our suppliers. We cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them on commercially acceptable terms. Additionally, we typically use third-party transportation providers for the supply of most of our raw materials. Transportation strikes could have an adverse effect on our receipt of supplies. If we are unable to procure the requisite quantities of raw materials in time and at commercially acceptable prices, the performance of our business and results of operations may be adversely affected.

We may suffer significant cost overruns or even losses in these contracts due to unanticipated cost increases resulting from a number of factors such as changes in assumptions underlying our contracts, unavailability or unanticipated increases in the cost of raw materials, fuel, labour and equipment, changes in applicable taxation structures or the scope of work, delays in obtaining requisite statutory clearances and approvals, delays in acquisition of land by the client, procuring right of way by the client, disruptions of the supply of raw materials due to factors beyond our control, unforeseen design or engineering challenges, inaccurate drawings or technical information provided by clients, severe weather conditions or force majeure events. Despite the escalation clauses in some of our construction contracts, we may experience difficulties in enforcing such clauses to recover the costs we incurred in relation to the additional work performed at the clients' requests or due to the change of scope of work. If any of these risks materialize, they could adversely affect our profitability, which may in turn have an adverse effect on our overall results of operation.

As per the data contract charges formed a significant part of our total expenses as under:

(₹ in lakhs except percentages)

Particulars	Period ended November 30, 2023		Financial Year 2023		Financial Year 2022		Financial Year 2021

Total Expenses	5,541.98	100.00	10,593.69	100.00	5,224.41	100.00	6,291.31	100.00

For further details please refer to the section titled "**Restated Financial Statements**" on page 228 of this draft red herring prospectus.

Under the terms and conditions of agreements for Contracts, we generally agree to receive an agreed sum of money, subject to contract variations covering changes in the client's project requirements. Our actual expense in executing such projects under construction may vary substantially from the assumptions underlying our bid and estimates for various reasons, including, unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability of the client to obtain requisite environmental and other approvals resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform. However, our Company has not observed any major variation in costs during the last three (3) Financial Years.

Our ability to pass on increases in the purchase price or cost of raw materials, labour and other inputs may be limited in the case of contracts with limited or no price escalation provisions, and we cannot assure you that these variations in cost will not lead to financial losses to us. Further, other risks generally inherent to the development and construction industry may result in our profits from a project being less than as originally estimated or may result in us experiencing losses due to cost and time overruns, which could have a material adverse effect on our cash flows, business, financial condition and results of operations.

6. ***We have minimal experience in dealing with unrelated third-party entities and this will pose obstacles and challenges in our growth as a construction company. Further, if we are unable to succeed as a developer or contractor outside of our promoter group entities and group companies our long-term growth, results of operation and profits could be limited.***

We are a construction company having predominantly Group Company and Promoter associated construction business, we are venturing into third party contracts for further growth and increased business. Though our order book has substantial contracts with unrelated entities and for construction projects, we do not have a large exposure to work orders or EPC contracts outside our Promoter Group entities and Group Companies. However, this is an unexplored area and we are exposed to risks of non-performance and loss making ventures and delays on account of our lack of experience in dealing with entities outside our group.

For instance, we (as a joint developer) have entered into Memorandum of Understanding with Mumbai Based Developer as a joint developer for development and construction of residential building in MMR dated January 22, 2024. Further, as a developer we have entered into Construction and Management Agreement dated March 20, 2019 for the development rights to develop residential cum-commercial project known as 'Trinity Oasis'. The area of the land to be developed is 17310 sq. mts. We have taken the responsibility of implementing and executing the project including the rehab component and the free component. The development of this project *inter alia* includes payment of arrears of rent to the land owner/trust and tenants; liaison with MHADA, MCGM and Government of Maharashtra and other government authorities for approvals; appoint architects, consultants and other professionals for the project and allot and sale the free sale component premises.

We have no experience in the development and sale of residential and commercial building and this lack of experience as a developer exposes us to various risks such as (i) lack of trust by the potential purchasers of our units as to the Amritsar Project with our Promoter (as and when it commences) and Mumbai redevelopment project; (ii) receipt of all approvals from relevant government authorities for the project; (iii) local area risks, as we have undertaken civil construction of real estate projects mostly in and around Mumbai; (iv) perception risks as to being complete outsiders by the potential purchasers and investors in the project; and (v) internal risks as to execution of the project and such other risks associated with real estate development (vi) counterparty risks, where our co-developer may delay or default in its obligations.

We may have to make significant investments of time and resources, and may face new and difficult technological, operational and compliance challenges which may lead to higher costs than what we have historically experienced. We will also need to understand and comply with various new requirements applicable to us in this line of activity. If we experience disruptions, failures, or other issues, our business may be materially and adversely affected and it could damage our reputation, and limit our growth, business and prospects. We cannot assure you that our expansion as a developer or main contractor will recoup our investments in a timely manner, or at all. Furthermore, expanding our operations as a developer may subject our business to increased competition from other developers or market participants that have greater experience in the local markets than we do; changes to the way we do business as compared with our current operations and difficulties in staffing, recruiting and retaining qualified employees.

In the event of failure of the project and lack of adequate sales to cover even our estimated costs of the project, may affect our results of operations and financial condition. Further, adverse experiences and delays with counterparties not linked to our Group Companies or our Promoters will hamper our growth and limit our potential to expand thereby increasing our reliance on our Promoter companies and Group entities for future work Orders.

Further, in our present order book, our ongoing projects with Group Companies and Promoter Related entities form 35.39% of our total ongoing projects. This shows a heavy reliance on intra-group work orders and contracts. However, we are evolving into new construction areas where we are required to deliver our scope as a joint developer in redeveloping residential projects and this includes part sale of the premises. We are also venturing into the industrial space of building dams, which is distinct from our earlier projects of commercial and residential space. Presently, our contracts/ work orders with unrelated entities form 64.61% of our total ongoing projects. Even indirectly, in our group entity related business the underlying third party for whom our construction services is provided is an unrelated third party, in several cases being public sector entities who invite bids vide a public tender process (where are group entities have been selected as per the bidding process in certain cases). We are venturing into third party contracts for further growth and increased business. We have historically benefited from our Promoter and our group strategy of procuring large scale construction contracts where they are the bidders who bid solely or in consortium with other entities and subsequently, we have been engaged as a contractor or subcontractor for projects awarded to the relevant group entity. Hence our reputation in the construction industry has grown vide reference and we are in a position to procure work with unrelated entities on a wider scale and in newer contractual formats such as joint development

agreements. However, this is an unexplored area and we are exposed to risks of non-performance and loss-making ventures and delays on account of our lack of experience in dealing with entities outside our group. If we are unable to succeed as a developer or contractor outside of our promoter group entities and Group Companies our long-term growth, results of operation and profits could be adversely affected.

7. *Some of our Promoters Group Entities, Subsidiary and Group Companies have objects which would allow them to engage in the line of business similar to our Company. There are no non – compete agreements between our Company and such Promoter Group and Group Companies.*

Our subsidiaries and some of our Promoter Group entities and Group Companies such as Shree Umiya Builders & Developers and Artemis Electricals and Projects Limited, have objects which would allow them to engage in the line of business similar to ours. Further, we have not entered into any non-compete agreement with any of these entities.

As on date none of our Promoter Group entities and Group Companies have similar sized orders or projects which are directly competing with our company, however they do undertake sub-contracting works and such similar contracts for themselves and other contractors. Further, the main objects of these companies allow them to engage in competing line of businesses. Though our Promoter Group entities and Group Companies are required for the formation of SPVs and project specific entities for bidding as developers and contractors, we cannot assure that our Promoter who has common interest in said entities will not favour the interest of the said entities. As a result, conflicts of interests may arise in allocating business opportunities amongst our Company and our promoter group entities in circumstances where our respective interests conflict. In cases of conflict, our Promoter may favour their companies in which our Promoter has interest. We cannot assure that our Promoter will not favour the interests of such Companies over our interest or that the said entities will not expand which may increase our competition, this dependency may adversely affect our growth, business operations and the financial condition of our Company.

There can be no assurance that our Promoter or our Group Companies or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Our Company depends on the management skills and guidance of our Promoter for the development of the business strategies, monitoring of its successful implementation and meeting of future challenges. Our Promoter may become involved in ventures that may potentially compete with our Company. The interests of our Promoter may conflict with the interests of our other Shareholders, and our Promoter may, for business considerations or otherwise, cause our Company to take actions, or refrain from taking actions, in order to benefit their interests instead of our Company's interests or the interests of its other Shareholders. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition which may adversely affect our profitability and results of operations.

For details pertaining connection of our company with respect to common shareholding / directors in the group companies, please refer to "***Our Promoter and Promoter Group***" on page no. 212, "***Our Management***" on page no. 195 and "***Our Group Companies***" on page no. 220 of this Draft Red Herring Prospectus

8. *Our Company has in the past entered into related party transactions with our Promoter, Promoter Group Companies, and Group Companies may continue to do so in the future. There can be no assurance that their risks or liability will not fall on our Company. Further, there can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.*

In the ordinary course of business, we have entered into transactions with certain related parties. The transaction is in compliance with Companies act and other applicable regulations. However, there is no assurance that we could not have obtained better and more favourable terms that our Company not entered into such related party transactions. Our Company may enter into such transactions in future also and we cannot assure that in such an event there would be no adverse effect on results of our operations. While we believe that all such transactions have been conducted on an arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions been entered into with non-related parties. These transactions have been entered into with, among others, our Promoter, Promoter Group and Group Companies, our Managing Director and Chairman and typically relate to, among others, borrowings, sale and purchase of goods and services and certain other real estate property transactions with enterprises

owned or significantly influenced by key management personnel or their relatives. Some of our shareholders and Directors may have an interest in pursuing transactions that, in their judgment, enhance the value of their equity investment, even though such transactions may involve risks to our Shareholders. There have been no conflicts of interest among our equity shareholders in relation to such related party transactions in the past. Further, our business is expected to involve transactions with such related parties in the future, which could involve conflicts of interest, although going forward, all related party transactions that we may enter will be subject to audit committee or board or shareholder approval, as applicable, as under the Companies Act, 2013 and the SEBI Regulations. Further, any dues or defaults of such related party may impose heavy and inherent risk on us. We cannot assure you that such transactions, individually or in the aggregate, will not materially and adversely affect our business, financial condition, results of operations and prospects. Further, our Promoter and certain members of our Promoter Group have mortgaged his personal properties and provided personal guarantees for our borrowings to secure our loans. Our Directors may also be interested to the extent of any transaction entered into by us with any other company or firm in which they are directors or partners or in their individual capacity.

For further details, see “*Restated Financial Statements – Note 33 – Related Party Transaction*” beginning on page 268 of this Draft Red Herring Prospectus.

9. *Our business operations require significant working capital. Insufficient cash flows to fulfill working capital requirements could detrimentally impact our operational outcomes. We require substantial financing for our business operations and the failure to obtain additional financing on terms commercially acceptable to us may adversely affect our ability to grow and our future profitability.*

A significant amount of working capital is required to finance the purchase of materials, mobilization of resources and other work on projects before consideration is received from our clients. We meet our working capital requirements through internal accruals and also through project specific indebtedness which we try and extinguish from the proceeds and revenues from the relevant project itself. The working capital requirement for Financial Years 2025 and 2026 are estimated at ₹ 16,743.74 lakhs and for F.Y 2026 are estimated 21,735.82 lakhs. An amount of ₹ 8000 lakhs and ₹ 2000 lakhs will be funded out of the Net Proceeds in Financial Years 2025 and 2026, respectively towards working capital requirements, whereas the balance would be arranged from our internal accruals. For further details, please see “*Objects of the Offer*” on page 101 of this Draft Red Herring Prospectus. The working capital requirement is based on certain assumptions, and accordingly, any change of such assumptions would result in changes to our working capital requirements. Further, the working capital requirements may increase if we undertake larger or additional projects or if there is a change in the payment terms. As a result, we may need to raise additional funds and seek borrowings to satisfy our working capital requirements.

Our working capital requirements were funded from bank borrowings and internal accruals, details of which for the eight months period ended November 30, 2023 and Financial Years 2023, 2022 and 2021 are given as under:

(₹ in lakhs)					
Sr. No.	Particulars	Period ending November 30, 2023	Financial Year 2023	Financial Year 2022	Financial Year 2021
1	Working Capital Requirement	7,850.32	5,764.98	2,689.61	4,067.26
2	Working capital funding from bank	Nil	Nil	1,199.02	1,499.87
3	Internal accruals	7,850.32	5,764.98	1,490.59	2,567.39

For further details, see chapter “*Objects of the Offer*” beginning on page [.] of this Draft Red Herring Prospectus.

Hence, the success of our business operations depends on the access to adequate capital on the terms and conditions which are mutually acceptable to us and the banks/financial institutions. In case we are not able to meet our working capital requirements from internal accruals or by way of funding from banks / financial institutions, our projects may be subject to significant delays and cost overruns, and our business, financial condition and results of operations may be materially and adversely affected.

We receive progress payments and retention money from our clients. There can be no assurance that the progress payments and the retention money will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. Our working capital position is therefore also dependent on the financial position of our clients. Our EPC contracts provide for progress payments from clients with reference to the value of work completed upon reaching certain milestones. Generally, in our construction projects and infrastructure businesses, the client, or a third party authorized under the contract, usually make payments against invoices raised upon mutual agreement. The client then effects payments with reference to these invoices generally within 30 days depending on terms of the Project. As a result, significant amounts of our working capital is often required to finance the purchase of materials and the performance of engineering, construction and other work on projects before payment is received from clients. Delays in progress payments or release of retention money may increase our working capital needs. If a client defaults in making its payments on a project to which we have devoted significant resources, it could also affect our profitability and liquidity and decrease the capital resources that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to our contracts but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from progress payments or release of retention money, based primarily on ageing and other factors such as special circumstances relating to specific clients. There can be no assurance that the progress payments and the retention money will be remitted by our clients to us on a timely basis or that we will be able to efficiently manage the level of bad debt arising from such payment practice. All of these factors may result, or have resulted, increases in the amount of our receivables and short-term borrowings. All of these factors may result in an increase in the amount of our receivables and short-term borrowings and the continued increase in working capital requirements and if we experience insufficient cash flows to meet required payments on our working capital requirements, there may have an adverse effect on our financial condition and results of operations.

The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, unforeseen delays or cost overruns, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Our ability to obtain additional financing on favourable terms, if at all, will depend on a number of factors, including our future financial condition, results of operations and cash flows, the amount and terms of our existing indebtedness, general market conditions and market conditions for financing activities and the economic, political and other conditions in the markets where we operate. We cannot assure you that we will be able to raise additional financing on acceptable terms in a timely manner or at all. Our failure to renew arrangements for existing funding or to obtain additional financing on acceptable terms and in a timely manner could adversely impact our planned capital expenditure, our business, results of operations and financial condition.

10. ***Infrastructure projects are typically awarded to us on satisfaction of prescribed pre-qualification criteria and following a competitive bidding process. Our business and our financial condition may be adversely affected if new infrastructure projects are not awarded to us or if contracts awarded to us are prematurely terminated.***

Infrastructure projects are typically awarded to us following a competitive bidding process and satisfaction of prescribed technical and financial pre-qualification criteria. While the track record, experience of project execution, service quality, technical expertise, reputation and sufficiency of financial resources are important considerations in awarding contracts, there can be no assurance that we would be able to meet such technical and financial qualification criteria, whether independently or together with other joint venture partners. Further, once prospective bidders satisfy the prequalification requirements of the tender, the project is usually awarded on the basis of price competitiveness of the bid. We generally incur costs in the preparation and submission of bids, which are one-time, non-reimbursable costs. We cannot assure you that we would bid where we have been pre-qualified to submit a bid, or that our bids, when submitted or if already submitted, would result in projects being awarded to us.

If we are not able to pre-qualify independently to bid for large construction and development projects, we partner and collaborate with third parties for joint bidding for such projects. We may face competition from other bidders in a similar position looking for acceptable joint venture partners for prequalification requirements. If we are unable to partner with other suitable companies or lack the credentials to be the partner-of-choice for other companies, we may lose the opportunity to bid for large infrastructure projects, which could affect our growth plans. In cases of bids in a consortium, we may also not be able to secure bids due to negligence or disqualification of our joint venture partners, as these factors would be beyond our control. If a joint venture partner fails to perform its obligations satisfactorily, we may be required to incur additional expenditure to ensure the adequate performance and delivery of the contracted services or make payments on behalf of the joint venture partners, which could adversely affect the profitability of the contract.

11. *Bidding for a tender involves various management activities such as detailed project study and cost estimations. Inability to accurately estimate the cost may lead to a reduction in the expected rate of return and profitability estimates.*

We enter into contracts primarily through a competitive bidding process. Our clients typically advertise for potential projects on government portal such as eprocurement/etenders/defence procurement/GEM and in leading national newspapers. Prior to making a bid for a particular project and participating in a tender, we undertake various activities such as discussion on the scope of work, geographic location of the project, the degree of complexity in executing the project in such location, evaluation of eligibility, our current and projected workload, the likelihood of additional work, the project cost and profitability estimates and our competitive advantage relative to other likely bidders.

Accordingly, all of the bid amounts are based on estimates of the project cost, the fluctuation of which, either marginally or substantially, may impact our margins adversely. Further, we may incorrectly or inadequately estimate the project cost leading to lower bid amount affecting our profitability in case the project is awarded to us. Excess estimation of costs may lead to higher bid amount by us owing to which, we may not be awarded a contract which may substantially impact our results of operations and financials. Although we strive to achieve success for every bid we make, there is no guarantee that we would be successful in winning all the projects that we bid for. Further, as most of the projects involve long implementation periods (i.e., are spread over a longer period of time), cost escalation in our industry is a frequent issue although most of the agreements includes clauses relating to cost escalations. Therefore, any sudden fluctuations in costs or material availability or any other unanticipated costs will substantially impact the business operations, cash flows and financial condition.

12. *Our Order Book may not be representative of our future results and our actual revenue may be significantly less than the estimates reflected in our Order Book, which could adversely affect our results of operations.*

Our Order Book is as of the date of filing of this Draft Red Herring Prospectus, comprises the estimated revenues from the unexecuted portions of all the existing contracts. Further, the Order Book is calculated on the basis of the aggregate contract value of our ongoing and upcoming contracts as of such date reduced by the value of work executed by us until such date. For the purpose of calculating the Order Book, we do not take into account any change in scope of work of our ongoing projects as of the relevant date, or the work conducted by us in relation to any such change in scope of work of such projects until such date. The manner in which we calculate and present the Order Book is therefore not comparable to the manner in which our revenue from operations is accounted. In addition, even where a project proceeds as scheduled, it is possible that contracting parties may default and fail to pay amounts owed. We cannot guarantee that the income anticipated in our Order Book will be realized, or, if realized, will be realized on time or result in profits. Any project cancellations or scope adjustments, which may occur from time to time, could reduce the amount of our Order Book and the income and profits that we ultimately earn from the contracts. Any delay, cancellation or payment default could have a material adverse effect on our business, results of operation and financial condition.

The Order Book information included in this Draft Red Herring Prospectus is duly certified by an Expert does not necessarily indicate our future revenues. The Order Book should not be considered in isolation as a substitute for performance. As on the date of filing of this Draft Red Herring Prospectus, the contract value

of the ongoing Order Book was ₹ 1,40,827.44 lakhs. For further details, see "*Our Business - Details of the Order Book*" on page 152 of this Draft Red Herring Prospectus.

13. *Our contracts are mostly of the nature of EPC contracts and we are exposed to inherent risks related to our contractual framework.*

Our contracts are of an EPC nature, wherein, as per the scope of our services we provide lock and key services as required, MEP and other finishing works as well. We also provide certain O&M services for our completed construction contracts. Our development agreements have certain specific provisions with regard to consideration and terms of payment factoring in sale of completed units, however the construction aspect is covered in an EPC contractual format. Some of the inherent risks prevalent in your contractual framework are provided below:

Indemnities

Under an EPC contract, we are usually required to indemnify the employer and its members, officers and employees against all actions, proceedings, claims, liabilities, damages, losses and expenses due to failure on our part to perform our obligations under the EPC contract.

Performance Security and Defect Liability:

We are usually required to provide a fixed percentage of the contract price as the performance security. During the construction period as well as the warranty period after the completion of construction, we are usually required to cure construction defects, except usual wear and tear, at our own risk and costs. We are usually responsible for curing the defects during the defect notification period, which is usually for a period of 12 to 60 months after completion of work.

Changes in the scope of work resulting in time delays and cost escalation:

In some cases, the main concessionaire or developer has the power to make variations, changes, omissions, additions or substitution for the original specifications, drawings, designs and instructions that maybe necessary during the progress of the work. However, this is done at the sole discretion of the overlying authority or the main concessionaire or developer and shall be carried out by us and accordingly permits/approvals have to be extended in order to accommodate such requirements.

Forfeiture of performance security:

The main concessionaire or developer retains a part of the bid security/ security deposit as retention money and the same is released only after a certain period or post completion of the defects liability period. This money shall be used to take remedial measures in the work executed when necessary. In the event this is not released to us due to defective services or any default or dispute regarding the same the viability of the concerned project is materially affected.

Retention money:

Our contracts specify a certain percentage of the value of work executed to be withheld by the client as retention money. Our clients have the right to appropriate the retention money upon any default by us as per the terms and conditions of the EPC contract. This money shall be used to take remedial measures in the work executed when necessary. In the event this is not released to us due to defective services or any default or dispute regarding the same the viability of the concerned project is materially affected.

Liquidated Damages:

We are usually required to pay liquidated damages for delays in completion of project milestones, which are often specified as a fixed percentage of the contract price. Our clients are entitled to deduct the amount of damages from the payments due to us but the same varies from project to project basis.

Hence given the inherent contractual risks in our contractual format, we are exposed to damages, indemnity,

forfeiture of retention moneys and forfeiture of performance security. Any fructification of these contractual risks will materially adversely affect our profitability on an individual and aggregated level and will affect the results of our operations.

- 14. *We enter into various sub-contract agreements with primary contractors for construction projects. Such agreements contain conditions and requirements, the non-fulfilment of which could result in delays and we may be required to indemnify and compensate them.***

Some of our projects are as sub-contractors. The agreement confers the rights on us to construct and develop the said project either for a fixed fee. Such projects involve following the drawing plans, architecture designs, timelines, material quality, end finishing of the structure, etc. to be followed strictly as provided by the principle employer or our customer. Though we are generally empowered to make practical operating decisions for development of the project, we may be required to make certain decisions in consultation with our primary contractors, principle employers, government agencies involved and / or regulatory authorities. These arrangements may limit our flexibility to make certain decisions in relation to the projects. In the event of any delay in the completion of the project within the envisaged time frame, we may be required to indemnify and compensate the employers or contractors with whom we have entered into an agreement with. Any disputes that may arise between us and the parties involved in the agreement may cause delay in completion, suspension or complete abandonment of the projects we undertake. This may have a material adverse effect on our business operations, financial condition and reputation.

- 15. *We do not own our Registered Office and have taken the same on leave and license basis from M/s Artemis Electricals and Projects Limited. Any revocation or adverse changes in the terms of the leave and license may have an adverse effect on our business, prospects, results of operations and financial condition.***

Our Company has executed a leave and license agreement dated January 23, 2024 for its new registered office with M/s Artemis Electricals and Projects Limited for a tenure of 5 years. There can be no assurance that our Company will be able to successfully continue to use this premises. Further, there can be no assurance that we will not face any disruption or that we such arrangements may not be terminated prematurely by the owner. In case this arrangement is discontinued, it could lead to a disruption in operations which could have a material adverse impact on our business. Any such non-renewal or early termination or any disruption of our rights may require us to vacate the premises and relocate to a new premises on terms that may not be favourable to us thereby adversely affecting our business, financial conditions and results of operations. For further details on the properties of our Company, please refer to the section “**Our Business**” on page 152 of this Draft Red Herring Prospectus.

- 16. *We rely on various sub-contractors for their services and factors affecting the performance of their obligations could adversely affect our reputation and business and revenues from our operations.***

Upon engagement as a contractor, we further subcontract various aspects of our EPC contracts and though we continue to be liable under the contract to the developer or the main concessionaire, we have as a practice subcontracted various aspects and parts of the EPC contract to sub-contractors who execute the work for us. In the work orders we place with such sub contractors they are required to maintain all requisite approvals as per applicable laws, including but not limited to labour laws registrations. Our contracts obligate us to keep in place certain stage wise approvals for the project, workmen compensation policies and also procure labour with valid registrations under several applicable laws. Further, our projects require the services of third parties including architects, engineers, contractors and suppliers of labour and materials. The contractual construction work of our projects is performed by labour provided by third party sub-contractors who undertakes our complete projects either in full or in parts on a sub-contract basis. The timely and quality construction of our projects depends on availability and skill of such labourers, as well as contingencies affecting them, including labour shortages. Hence, though we are liable under our contracts with our developers, we have ensured that our subcontractors adequately contract with us to provide sub-contracted services and maintain the requisite approvals. As on date there have been no non-compliances with regard to such approvals for labour or any other approval required to be procured for the project. Further, since in many cases, we do not directly hire the labour, we may face issues with the relevant authorities and the ability to direct such labourers for a particular work, over time or change in any work schedule. Even though, so far there has not been any such material delay in the completion of our projects due to our dependence on contracted labour force; we may, in the future, not be able to identify appropriately experienced third parties and cannot assure you that skilled third

parties will continue to be available at reasonable rate and in area in which we undertake our present and future projects. As a result, we may be required to make additional investments or provide additional services to ensure adequate performance and delivery of contracted services. Any consequent delay in project execution could adversely affect our profitability. Further we cannot assure you that the services rendered by these contractors will be satisfactory or match our requirements for quality.

Our ongoing and upcoming contracts will require the services of architects, engineers and consultants. The timing and quality of construction of the projects that we develop depends on the availability and skill of these parties. To oversee the work of third parties at our civil construction sites, we deploy full time site engineers and supervisors and also review the progress of the construction work on a continuous basis by conducting regular inspections. by architects, consultants, including project management consultants. We may not be able to identify appropriately experienced third parties and cannot assure you that skilled third parties will continue to be available at reasonable rates and in the areas in which we undertake our projects, or at all. As a result, we may be required to make additional investments or provide additional services to ensure the adequate performance and delivery of services and any delay in project execution could adversely affect our profitability. Though there have been no such instances during the past three (3) Financial Years, if such third parties do not complete our orders in a timely manner or match our requirements on quality, our reputation and financial condition could be adversely affected. The total sub-contracting expenses in the last three (3) financial years and stub period are mentioned below:

(₹ in lakhs)

Sr. No.	Particulars	Period ending November 30, 2023	Financial Year 2023	Financial Year 2022	Financial Year 2021
1	Revenue from Operations	8,042.34	16,068.76	7,702.08	7,195.52
2	Labour & Works Contract	4,507.51	8,548.88	2,849.22	3,437.37
3	% of Revenue	56.05%	53.20%	36.99%	47.77%

For further details, see chapter “*Restated Financial Statements*” beginning on page 228 of this Draft Red Herring Prospectus.

17. *We procure materials and equipment from third parties for completion of our contracts and this exposes us to third party defaults and delays and non-availability of raw materials and equipment.*

Further, we are dependent on third party suppliers for our raw materials such as ready-mix concrete and reinforcement steel and well as prefabricated concrete structures and steel structures which are specifically developed for our construction projects as per specified designs and specifications. Discontinuation of production/supply by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality or quantity and absence or lack of alternatives in market could hamper our schedules and therefore affect our business and results of operations. This dependence may also adversely affect the availability of key materials at reasonable prices thus affecting our margins and may have an adverse effect on our business, cash flows, results of operations and financial condition.

Our ability to complete projects in a timely and cost-efficient manner while maintaining necessary quality standards depends on the availability of such equipment, skilled personnel, as well as contingencies affecting them, including raw material shortages and industrial action such as strikes and lockouts. We cannot assure you that equipment and raw materials will continue to be available at reasonable costs or at all. As a result, we may be required to make additional investments or make alternate arrangements to ensure the adequate performance and delivery of contracted services and any delay in project execution could adversely affect our business and financial condition.

Currently, we also provide MEP, finishing and interior services through our third-party arrangements. The third party service providers engaged to provide certain services in relation to the projects may not be able to complete their respective scope of work on time, within budget or to the required specifications and standards. In light of the above, deficiencies in quality, non-performance of obligations or delays by vendors, may lead to consequent delays in project execution or completion or interim or permanent termination of contracts by our clients, which may have an adverse effect on our business, results of operations, financial condition and goodwill.

18. *Most agreements that we have entered into in connection with our business contain a penalty or liquidated damage clause for delay in the completion of a project that takes effect should the completion of a project be delayed.*

EPC contracts are the spine of the contractual framework adopted for the construction services offered by us. Hence, the contractual risks associated with such EPC contracts affect our operations and business. Our projects are typically subject to a completion schedule. Any failures to adhere to a contractually agreed schedule for reasons other than the agreed force majeure events could result in our being required to pay liquidated damages, which would usually be a certain percentage of the total project cost, or lead to forfeiture of security deposits or invocation of performance guarantees. We have in the past not been able to complete some of our projects within the schedule specified, which may lead to some of our clients withholding amounts owed to us. Any future failures to complete projects on schedule could have a material adverse effect on our results of operations and financial condition. Delays in the completion of projects could also increase our working capital requirements and cause damage to our reputation, which could in turn adversely affect our ability to prequalify for projects and our reputation may suffer thereby adversely affecting our ability to procure more business.

19. *We may be subject to liability claims or claims for damages or termination of contracts with Developers for failure to meet project completion timelines or defective work, which may adversely impact our profitability, cash flows, results of operations and reputation.*

We provide construction services to developers for residential buildings commercial, commercial cum residential, industrial, hospitality and infrastructural. Our contracts contain provisions related to liquidated damages for delays in completion of project subject to certain customary exceptions such as (i) occurrence and continuance of force majeure events, or (ii) delays that are caused due to reasons solely attributable to the client. Further, our clients are entitled to deduct the amount of damages from the payments due to us. During the construction period as well as the defect notification period after the completion of construction, we are usually required to remedy construction defects at our own risk and costs and are responsible for making good the defects during the defect notification period, which can be for a period as per agreement/work order after completion of work. Additionally, under some of the agreements entered into by us, we are required to indemnify our clients due to failure on our part to perform our obligations under the contracts.

In addition to monetary penalties, any such failure to meet project schedules or defective work may subject us to adverse reputational impact. The developer may also be entitled to terminate the agreement in the event of delay in completion of the work if the delay is not on account of any of the agreed exceptions. In the event of termination for any of the aforesaid reasons, we may only receive partial payments under such agreements and such payments may be less than our estimated cash flows from such projects.

In addition to the risk of termination by the Developer, delays in completion of construction may result in cost overruns, lower or no returns on capital and reduced revenue for the client thus impacting the project's performance, which in turn may adversely impact our reputation, cash flows, results of operations and profitability. While there have been instances of delays to our projects on account of various factors including unavailability or shortage of labour, shortage of raw materials and adverse weather conditions, as on the date of this Draft Red Herring Prospectus, we have not been subjected to liquidated damages. However, there can be no assurance that we would not be subjected to any such monetary penalties in the future. Any such penalties may adversely impact our reputation, profitability, financial position, cash flows, results of operations and future prospectus.

We cannot assure you that we will always finish the construction or development of our projects in accordance with the requisite specifications or that the construction of our projects will be free from any and all defects. If the work is unsatisfactory, the work has to be redone as per the instructions of site in charge without any extra cost. In the event of discovery of defects/faults in our work, or due to damages to our construction due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations. Further, it may result in cancellation of projects by clients and/ or refund of any advance deposited with us by any customer, dissatisfaction among our customers, resulting in negative publicity, consumer litigation and lack of confidence among clients and all these factors could adversely affect

our business, financial condition and results of operations.

20. *Delays in obtaining a requisite approvals or statutory clearances may lead to challenges and could adversely impact profitability and future projects.*

Except for our project, Trinity Oasis project situated at Ghodbunder Road, Thane, which is presently mired in procedural complexities attributable to the non- procurement of the requisite commencement certificate over a protracted period of two years, our other contractual commitments remain unimpeded by legal disputes or operational hindrances in the past 3 fiscals.

The protracted delay in obtaining the commencement certificate poses a material risk to the timely completion of the Trinity Oasis project. This risk is compounded by the potential difficulty in securing skilled labour at reasonable rates within the project's vicinity. Such an eventuality may necessitate unforeseen financial outlays or the provision of supplementary services to ensure contractual performance and service delivery. Consequently, any prolongation in project execution may have adverse implications on our financial viability. Furthermore, the continuity of skilled labour resources in the region remains uncertain, thereby exacerbating the operational risks associated with ongoing and prospective projects within the same locale.

21. *Our actual cost in executing our contracts may vary substantially from the assumptions underlying our estimates. We may be unable to recover all or some of the additional costs and expenses, which may have a material adverse effect on our results of operations, cash flows and financial condition.*

Under the terms and conditions of agreements for Contracts, we generally agree to receive an agreed sum of money, subject to contract variations covering changes in the client's project requirements. Our actual expense in executing such projects under construction may vary substantially from the assumptions underlying our bid and estimates for various reasons, including, unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability of the client to obtain requisite environmental and other approvals resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform. However, our Company has not observed any major variation in costs during the last three (3) Financial Years.

Our ability to pass on increases in the purchase price or cost of raw materials, labour and other inputs may be limited in the case of contracts with limited or no price escalation provisions, and we cannot assure you that these variations in cost will not lead to financial losses to us. Further, other risks generally inherent to the development and construction industry may result in our profits from a project being less than as originally estimated or may result in us experiencing losses due to cost and time overruns, which could have a material adverse effect on our cash flows, business, financial condition and results of operations.

22. *Failure to obtain new contracts or our current contracts are terminated or face delays in commencement.*

Our business, growth prospects and financial performance largely depends on our ability to obtain new contracts from developers and implementation of such contracts. There can be no assurance that we will be able to procure new contracts and execute existing contracts successfully. Our future results of operations and cash flows may fluctuate from time to time depending on the execution of our contracts. Contracts may be cancelled before or after commencement which may result in a change in our Order Book.

23. *Our business and profitability are significantly dependent on the performance of the real estate market generally in India and particularly in the Mumbai Metropolitan Region ("MMR"). Varying market conditions in the MMR may affect our ability to ensure sale of our projects and the pricing of units in such projects, which may adversely affect our results of operations and financial condition.*

Our Order Book is principally focused within the MMR, which may be subject to market conditions and regulatory developments that are different from other real estate markets within India. However, we undertake projects in different geographical region including but not limited to Karnataka, Punjab, Tamil Nadu, Rajasthan and New Delhi. As of the date of filing of this Draft Red Herring Prospectus nine (9) of our contracts out of a total of twelve (12) contracts were located within the MMR. As a result, our business, financial condition and results of operations have been and will continue to be significantly if not entirely, dependent on the performance of, and the prevailing conditions affecting, the real estate market in the MMR.

The real estate market in the MMR may be affected by various factors outside our control, including prevailing socio-economic and market conditions, changes in supply of and demand for real estate developments comparable to our projects, changes in applicable governmental regulations and related policies, availability of financing for real estate projects and applicable interest rates, change in demographic trends, employment and income levels, among other Factors.

24. ***Our Company has completed many projects since inception, but misplacement or loss of documents has occurred during operations, posing challenges in managing and evaluating completed projects, potentially impacting legal compliance.***

As a construction company, we enter into various contacts, sub-contracts, agreements with our customers or primary contractors for our projects. We have successfully undertaken and completed various projects, each requiring us to enter into contracts with stakeholders, sub-contractors, partners etc. Despite our best efforts, there have been instances where some documents may have been inadvertently misplaced or lost during the course of our day to day operations. We have also found ourselves in situations where we have not been able to trace copies of certain documents pertaining to our old completed projects. These lost or misplaced documents may cause hindrance in management and evaluation of our completed projects which can also potentially cause hindrance in legal compliances.

25. ***We require certain approvals and licenses in the ordinary course of business. Any failure to successfully obtain/renew/update such registrations may adversely affect our operations, results of operations and financial condition.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or revoke the cancellation or suspension of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Statutory Approvals**” at pages 179 and 311 respectively of this Draft Red Herring Prospectus. Additionally, we are in the process of applying for renewal of certain approvals, licenses, registrations and permits, which need to be updated pursuant to change in name of the Company after conversion from private limited company to public limited company.

There can be no assurance that the relevant authority will issue an approval within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations. Furthermore, under such circumstances, the relevant authorities may initiate penal action against us, restrain our operations, impose fines/penalties or initiate legal proceedings for our inability to renew/obtain approvals in a timely manner or at all.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavour to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For example, as we expand our services in the construction sector, more regulations will become applicable to us such as RERA etc. which are stringent and onerous in nature and we may not be able to comply with all such requirements. For further details regarding the material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see “**Government and Other Statutory Approvals**” on page 311 of this Draft Red Herring Prospectus.

Furthermore, we cannot assure you that the approvals, licenses, registrations and permits issued to us will not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or

conditions thereof, or pursuant to any regulatory action. Any suspension or revocation of any of the approvals, licenses, registrations and permits that has been or may be issued to us may affect our business and results of operations.

Additionally, we must obtain approvals at various stages for our projects, including upon completion of the respective projects or phases thereof. Such approvals typically include, and other applicable (*if any*) project specific approvals. For details of our Projects, see "**Our Business**" beginning on page 152 of this Draft Red Herring Prospectus.

26. *Our business is subject to seasonal fluctuations.*

Our business operations may be affected by seasonal factors which may restrict our ability to carry on activities related to our construction projects and fully utilize our resources. Heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations during the critical periods of our projects and cause severe damages to our premises and equipments. In particular, the monsoon season may restrict our ability to carry on activities related to our projects and fully utilize our resources and may slow our activities on construction projects, which shifts our revenue and accordingly profit recognition to subsequent quarters. Adverse seasonal developments may also require the evacuation of personnel, suspension or curtailment of operations, resulting in damage to construction sites or delays in the delivery of materials. Such fluctuations may adversely affect our revenues, cash flows, results of operations and financial conditions.

27. *We operate in a competitive industry and our failure to successfully compete may adversely affect our business, financial condition and results of operations, and prospects.*

The construction sector, including for EPC contracts, is competitive and highly fragmented. We compete with several local civil construction companies, as well as large domestic companies with larger projects, greater brand recognition, stronger manpower and greater financial resources and experience, including a larger budget for advertising and marketing. Our competitors may also have exclusive arrangements with developers and may be able to construct their projects at lower prices. We also face competition from new entrants and the unorganized market that may have more flexibility in responding to changing business and economic conditions. The basis of competition includes, among other things, pricing, innovation, perceived value, brand recognition, advertising, special events, customer service and other activities. Growing competition may force us to reduce the prices of our civil construction services products, which may reduce revenues and margins and/or decrease our market share, either of which could affect our results of operations. Our competitors may succeed in constructing larger projects more efficiently and in time than the ones that we may develop. These developments could render us obsolete or uncompetitive, which would harm our business and financial results. We expect competition to continue to be intense as our existing competitors expand their operations and introduce new and modern development technology.

Our failure to compete effectively, including any delay in responding to changes in the industry and market may affect the competitiveness in our business, which may result in a decline in our revenues and profitability. As a result, there can be no assurance that we will be able to compete successfully in the future against our existing or potential competitors, which may adversely affect our business, financial condition and results of operations. For further details on industry peers, please see "**Industry Overview**" on page 128 of this Draft Red Herring Prospectus.

28. *We are subject to counterparty credit risk and any delay in receiving payments or non-receipt of payments may adversely impact our results of operations.*

There is no guarantee that we will accurately assess the creditworthiness of our clients. Macroeconomic conditions, at a national level such as rise in the amount of stressed assets held by banks in India and at a global level, potential credit crisis in the global financial system, could also result in financial difficulties for our clients, including limited access to the credit markets, insolvency or bankruptcy. Such conditions could cause our clients to delay payment, request modifications of their payment terms, or default on their payment obligations to us, all of which could increase our receivables. Timely collection of dues from clients also depends on our ability to complete our contractual commitments and subsequently bill for and collect from our clients.

We receive our payments on periodical billing basis or based on milestone achievements according to the terms of our agreements with our clients which directly affects our cash flows. Our trade receivables constitute a significant portion of our total revenue, being 208%, 47.90%, 39.18% and 45.43%, for the eight months period ended November 30, 2023 and for the Fiscals 2023, 2022, and 2021, respectively. We, therefore, face the risk associated with timely receipt of trade receivables. Any increase in the receivable cycles or defaults in receipt of payments from clients may strain our working capital limits. Our failure to maintain receivables cycle within acceptable limits could have an adverse impact on our cash flows, financial condition and business.

29. *Our business is exposed to various implementation risks and other uncertainties which may adversely affect our business, results of operations and financial condition.*

Our order book sets forth our expected revenues from uncompleted portions of the construction contracts received.

However, project delays, modifications in the scope or cancellations may occur from time to time due to either a client's or our default, incidents of force majeure or legal impediments. For example, in some of our projects, we or our clients are obliged to take certain actions, such as acquiring land, securing right of way, clearing forests, securing required licenses, authorizations or permits, making advance payments or opening of letters of credit or moving existing utilities, which may be delayed due to our client's non-performance, our own breaches or force majeure Factors. We may incur significant additional costs due to project delays and our counterparties may seek liquidated damages due to our failure to complete the required milestones or even terminate the contract totally or refuse to grant us any extension. The schedule of completion may need to be reset and we may not be able to recognize revenue if the required percentage of completion is not achieved in the specified timeframe. We may not have the full protection in our contracts / subcontracts against such delays or associated liabilities and/or additional costs. Further, we have escalation clauses in some of our contracts, which, may be interpreted restrictively by our counterparties, who may dispute our claims for additional costs. As a result, our future earnings may be different from the amount in the order book.

30. *Our operations may be adversely affected in case of industrial accidents, physical hazards and similar risks at our construction sites, which could expose us to material liabilities, loss in revenues and increased expenses.*

While construction companies, including us, conduct various scientific and site studies during the course of bidding for projects, there are always anticipated or unforeseen risks that may arise due to adverse weather conditions, geological conditions, specification changes and other reasons. Additionally, our operations are subject to hazards inherent in providing engineering and construction services, such as risk of equipment failure, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Use of heavy machineries, handling of sharp parts of machinery by laborers during construction activities etc. may result in accidents, causing injury to our laborers, employees or other persons on the site and may prove fatal. Our Company has not faced certain instances of accidents, causing injury to our laborers, employees or other persons on the site and similar risks at our construction sites in the last three (3) financial years but there can be no assurance that such events cannot occur in the future. However, our policy of covering these risks through contractual limitations of liability, indemnities and insurance may not always be effective and this may have a material adverse effect on our reputation, business, financial condition and results of operation.

31. *Our insurance cover may not adequately protect us against all material accidents. We may face significant financial and operational losses if we are not able to recover our insurance claims in the event of any such untoward material accident. Further, our insurance cover may not be adequate or we may incur uninsured losses or losses in excess of our insurance coverage.*

Usage of heavy machineries, handling of sharp parts of machinery by labour during construction activities or otherwise etc. may result in accidents, which could cause indirect injury to our labourers, employees or other persons on the site and may prove fatal which could also damage our properties thereby affecting our operations. While our Company has obtained employee's compensation insurance policy vide policy no. 001W001233400000 and policy no. 001W001265300000 for injury by accident arising out of and in the

course of his employment in the Business. We further maintain public liability insurance policy vide policy no. OG-24-1933-3301-00000001.

There can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or in time, or that we have taken out sufficient insurance to cover material losses which could adversely hamper our cash flows and profitability.

Further, we do not maintain certain insurance such as general liability insurance which covers claims regarding operational accidents, personal and advertising injury including but not limited to legal expense and such other additional expenses. Additionally, to the extent that we suffer any loss or damage, is not covered by insurance or exceeds our insurance coverage, our business, financial condition and results of operations could be adversely affected. We could face liabilities or otherwise suffer losses should any unforeseen incident such as fire, flood, and accidents which may affect our operations or in the regions/areas where our facilities or offices are located. We may face losses in the absence of insurance and even in cases in which any such loss may be insured, we may not be able to recover the entire claim from insurance companies. Any damage suffered by us in excess of such limited coverage amounts, or in respect of uninsured events, not covered by such insurance policies will have to be borne by us.

In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. Further, We deem it imperative to uphold a Keyman Insurance policy as a strategic measure to safeguard our business against potential financial ramifications arising from the unfortunate event of the death or incapacitation of a crucial team member. This policy serves as a crucial tool in mitigating the adverse financial consequences associated with the loss of a key employee. By ensuring funds are readily available, the policy covers prospective losses, recruitment expenses, and other related costs. Given the substantial reliance our company places on our Individual Promoter and their relatives, the absence of this insurance policy exposes us to significant risks. Therefore, the maintenance of this policy is deemed indispensable for risk mitigation and the sustained stability of our operations. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured or if insurance claim in respect of the subject-matter of insurance is not accepted, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. For further details on our insurance arrangements, please refer "*Our Business – Insurance*" on page no 176 of this Draft Red Herring Prospectus.

Our insurance policies include public liability insurance policy and workmen compensation policy. Our insurance policies are subject to annual review, and we cannot assure you that we will be able to renew these policies on similar or otherwise acceptable terms, or at all. If we were to incur a serious uninsured loss or a loss that significantly exceeds the limits of our insurance policies, it could have an adverse effect on our financial condition, results of operations and cash flows. While we believe that insurance coverage will be available in the future, we cannot assure you that such coverage will be available at costs and terms acceptable to us or that such coverage will be adequate with respect to future claims that may arise. Further, in the future, we may experience difficulty in obtaining insurance coverage for new and evolving services offerings at favourable prices, which could require us to incur greater costs. If we are not able to adequately insure against the risks we face, or the insurance coverage we have taken is inadequate to cover our losses, our business, financial condition and results of operations could be adversely affected.

32. *Non-availability of documents pertaining to business advances.*

As per the independent auditor report dated September 2, 2023 for F.Y 2022-23, it was brought to notice by the auditor that the Company has granted advances in the nature of loans to seven parties. Our company provides business advances tailored to support and enhance the operational aspects of business. It is crucial to note that our approach to business advances is distinct, as we do not establish formal agreements or arrangements designating these financial aids as conventional advances or loans.

33. *Our company does not have proof of payment of stamp duty on issuance/allotment of securities:*

As the entire paid up Equity Shares Capital of the Company is in Demat mode, we do not have the copies of the share certificates and further we do not have the proof of payment of applicable stamp duty in relation to issuance/allotment of securities. Consequently, the absence of these physical share certificates and proof of payments, we are not in a position to ascertain, whether the applicable stamp duty have been paid by the company or not.

Further, as on date of this Draft Red Herring Prospectus, there have been no queries or penalties imposed by any authorities. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company, Directors, Key Managerial Personnel, and if any officer in default may be affected.

34. *We presently do not own the trademark or logo under which we currently operate and if third parties infringe the trademark, logo and intellectual property that we use, our business and reputation would be adversely affected.*

Our Company has applied for trademark registration in relation to the logo of our Company. The application made by our Company for registration of trademark  under Class 37 of the Trade Marks Act, 1999 has been objected. For further details, please see "*Government and Other Statutory Approvals*" on page [.] of this Draft Red Herring Prospectus.

With respect to our trademarks that have been applied for, has been objected. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time that this registration is granted.

While we endeavour to ensure that we comply with the intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

35. *We have experienced rapid growth in the past few years and if we are unable to sustain or manage our growth, our cash flows, results of operations and financial condition may be adversely affected.*

Owing to our relatively limited operating history and lower base for comparison of financial metrics, we have experienced significant growth in the past five years. For instance, our revenue from operations was ₹ 6,424.67 lakhs for the financial year ended March 31, 2019 and our revenue from operations was ₹ 16,068.76 lakhs for the year ended March 31, 2023, a CAGR of 25.76%. As our operations becomes more mature, we may not be able to sustain our rates of growth, due to a variety of reasons including a higher base for comparison of financial metrics, increased price competition for construction services, non-availability of raw materials, lack of management availability or a general slowdown in the economy. A failure to sustain our growth may have an adverse effect on our business, our cash flows, results of operations and financial condition.

Further, as we scale-up our operations, we may not be able to execute our operations efficiently, which may result in delays, increased costs and lower quality. We cannot assure you that our future performance or growth strategy will be successful. Our failure to manage our growth effectively may have an adverse effect on our prospects, results of operations and financial condition.

We may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit or work quality. Our future growth may place significant demands on our management and operations and require us to continuously evolve and improve our financial, operational and other internal controls within our Company. In particular, continued expansion may pose challenges in:

- maintaining high levels of project control and management, and client satisfaction;

- recruiting, training and retaining sufficient skilled management, technical and bidding personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, internal control and other internal systems;
- making accurate assessments of the resources we will require;
- adhering to the standards of health, safety and environment and quality and process execution to meet client's expectations;
- operating in jurisdictions and business segments where we have limited experience;
- preserving a uniform culture, values and work environment;
- strengthening internal control and ensuring compliance with legal and contractual obligations;
- managing relationships with clients, suppliers, contractors, investors, lenders and service providers; and
- supporting infrastructure such as IT

36. *The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled "Objects of the Offer". Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.*

Our funding requirements and the deployment of the Net Proceeds are based on management estimates and our current business plan. The fund requirements and intended use of proceeds have not been appraised by bank or financial institution and are based on our estimates. In view of the competitive and dynamic nature of our business, we may have to revise our expenditure and fund requirements as a result of variations including in the cost structure, changes in estimates and other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling the planned expenditure and fund requirement and increasing or decreasing the expenditure for a particular purpose from its planned expenditure at the discretion of our board. Further, the allocated funds are earmarked for utilization throughout Fiscal Years 2025 and 2026. Until the entire fund is expended, any remaining amount will be held as a deposit in a scheduled commercial bank authorized by the SEBI. It is crucial to ensure timely utilization of these funds, as any non-utilization may have an impact on the financial outcomes of our company.

Our Company will issue a disclosure to the Stock Exchanges, on a quarterly basis, deviations, if any, in the Use of Proceeds of the Offer from the Objects stated in this Draft Red Herring Prospectus or by way of an explanatory statement to the notice for a general meeting.

37. *Our success largely depends upon the services of our Directors, Senior Management Personnel and other Key Managerial Personnel and our ability to attract and retain them. Demand for them in the industry is intense and our inability to attract and retain them may affect the operations of our Company.*

Our success is substantially dependent on the expertise and services of our Directors, Key Managerial Personnel and Senior Management Personnel. other key employees. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff, particularly project managers, engineers, and skilled workers. The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. We may lose skilled workers to competing employers who pay higher wages or be forced to increase the wages to be paid to our employees. If we cannot hire or retain enough skilled professionals or unskilled workers, our ability to apply for and execute new projects or to continue to expand our business will be impaired and consequently, our revenues could decline. They provide expertise which enables us to take well informed decisions in relation to our business and prepare us for future challenges. Our future performance will depend upon the continued services of these persons. Demand for senior management personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations. For information on our Directors, Senior Management Personnel, and Key Managerial Personnel who have resigned from our Company in the last three (3) Financial Years, please see the section "***Our Management***" on page 195 of this Draft Red Herring Prospectus.

40. *Our Promoter and Promoter Group will continue to retain significant control in our Company after the Offer, which will allow them to influence the outcome of matters submitted to shareholders for approval. Further, we are dependent on the benefits derived from our relationship with our Managing Director and Chairman and our business and growth may decline if we cannot benefit from this relationship in future. Such a concentration of ownership and benefit may also have the effect of delaying, preventing or deterring a change in control.*

Upon completion of this Issue of upto 2,78,00,000 Equity Shares by way of Offer for Sale and Fresh Issue, our Promoters and Promoter Group will continue to own a majority of our Equity Shares i.e. approximately 67.56% of the total Post-Offer paid up capital. As a result, our Promoter will have the ability to exercise significant influence over all matters requiring shareholders’ approval. Our Promoter will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoter could conflict with the interests of our other equity shareholders, and the Promoter could make decisions that materially and adversely affect your investment in the Equity Shares. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other Shareholders. The Promoter Group may have interests that are adverse to the interests

of our other shareholders and may take positions with which our other shareholders do not agree.

Further, we benefit from our relationship with our Managing Director and Chairman, Pravin Kumar Brijendra Kumar Agarwal and our success depends upon his continuing services which has been responsible for the growth of our business, He is closely involved in the overall strategy, direction and management of our business and has been actively involved in the day-to-day operations and management since the incorporation of our Company. Accordingly, we benefit from our relationship with our Managing Director and Chairman and our performance is heavily dependent upon his services. However, we cannot assure that we will be able to continue to take advantage of the benefits from these relationships in the future. If our Managing Director and Chairman is unable or unwilling to continue in his present position, we may not be able to replace him easily or at all, which could adversely affect our business operations and growth prospects and affect our ability to continue to manage and expand our business. Further, we benefit in many ways from our relationship with our Promoter Group entities and Group Companies as they are developers in several of our construction contracts. and this has been primarily responsible for the growth of our business and has been instrumental in our strategic planning, including identifying our on-going projects and procurement of work Orders. Our growth and future success is influenced, in part, by our continued relationship with the Group Companies and Promoter Group Entities. We cannot assure you that we will be able to continue to take advantage of the benefits from this relationship in the future. If we lose our relationship with our promoters for any reason, our business and growth prospects may decline and our financial condition and results of operations may be adversely affected.

Ltd, and PKSS Infrastructure have no revenue for the last three fiscal years ended March 31, 2023, March 31, 2022, March 31, 2021. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, for which significant resources and management overview will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate and relevant experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner or at all.

45. *Reliance has been placed on declarations and affidavits furnished by our Directors, SMP, KMP for details of their profile included in this Draft Red Herring Prospectus.*

Accordingly, reliance has been placed on an affidavit furnished by them to disclose such details in this Draft Red Herring Prospectus and neither we, nor the Book Running Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to their educational or professional qualifications in the future, or at all. Therefore, we cannot assure you that all or any of the information relating to the educational qualifications and experience of our Promoters and Directors in "*Our Management*" beginning on page 195 this Draft Red Herring Prospectus is complete, true and accurate.

46. *We are exposed to the risks of significant breaches of data security, and malfunctions or disruptions of information technology systems.*

We depend on information technology systems and accounting system to support our business processes, including sales, order processing, procurement, inventory management, quality control, product costing, human resources and finance. Although these technology initiatives are intended to increase productivity and operating efficiencies, they may not achieve such intended results. These systems may be potentially vulnerable to data security breaches, whether by employees or others, which may result in unauthorized persons getting access to sensitive data. Such data security breaches could lead to the loss of trade secrets and the data related to our services and other proprietary information could be compromised. These systems are also susceptible to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. Effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems. Though there have been no instances of information technology breach or any instance of cyber-attack in our Company during the last three (3) Financial Years, we cannot assure you that we will not encounter disruptions in the future. Further, we do not maintain the cybercrime insurance policy and subject to face losses in the absence of insurance and even in cases in which any such loss may be insured, we may not be able to recover the entire claim from insurance companies. The occurrence of any such events could adversely affect our business, interrupt our operations, subject us to increased operating costs and expose us to litigation.

47. *Changes in technology may affect our business by making our construction capabilities less competitive or obsolete.*

Our future success will depend in part on our ability to respond to technological advances and emerging industry standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails technical and business risks. We cannot assure you that we will be able to successfully implement new technologies or adapt our systems to emerging industry standards. Changes in technology may require us to make additional capital expenditures to upgrade our capabilities. If we are unable, for technical, financial or other reasons, to adapt in a timely manner to changing market conditions, customer requirements

or technological changes, our business and results of operations could be adversely affected.

Further, our information technology systems may be vulnerable to computer viruses, privacy, hacking or similar disruptive problems which could lead to disruptions in our ability to maintain a track record and analyse the work in progress, cause loss of data and disruption in operations, including an ability to assess the progress of the projects, process financial information or manage creditors/debtors or engage in normal business activities. Moreover, we may not operate an adequate disaster recovery system and therefore do not maintain data recovery policy. Fixing such problems caused by computer viruses or security breaches may require interruptions or delays, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorized access to our networks. The completion of our projects can be delayed on account of aforesaid reasons.

50. *If we are unable to establish and maintain an effective internal controls and compliance system, our business and reputation could be adversely affected.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. Our internal audit functions make an evaluation of the adequacy and effectiveness of internal systems on an ongoing basis so that our operations adhere to our policies, compliance requirements and internal guidelines. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances.

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our Equity Shares.

Further, our operations are subject to anti-corruption laws and regulations. These laws generally prohibit us and our employees and intermediaries from bribing, being bribed or making other prohibited payments to government officials or other persons to obtain or retain business or gain some other business advantage. We participate in collaborations and relationships with third parties whose actions could potentially subject us to liability under these laws or other local anti-corruption laws. If we are not in compliance with applicable anti-corruption laws, we may be subject to criminal and civil penalties, disgorgement and other sanctions and remedial measures, and legal expenses, which could have an adverse impact on our business, financial condition and results of operations. Likewise, any investigation of any potential violations of anti-corruption laws by the relevant authorities could also have an adverse impact on our business and reputation.

51. *Corrupt practices or improper conduct may delay the development of a project and materially and adversely affect our results of operations.*

The construction industry is not immune to the risks of corrupt practices. Large construction projects in all parts of the world provide opportunities for corruption. Such corruption may include bribery, deliberate poor workmanship or the deliberate supply of low quality materials. Though there have been no instances of corruption involving our Company during the last three (3) Financial Years, if we, or any other person involved in any of the projects is the victim of in any such corruption or any of our employees are involved in such corruption, our ability to complete the relevant projects as planned may be disrupted thereby materially and adversely affect our business, financial condition and results of operations

52. *Covid-19 has had a considerable impact and could continue to affect our business.*

Governments around the world had instituted measures in an effort to control the spread of COVID-19 since

March, 2020. In India, the Government of India initially announced a country-wide lockdown starting on March 24, 2020, which was subject to successive State Government extensions till August 31, 2021. During the first wave of the pandemic, there were strict lockdowns imposed by the Government of India and State Government and our businesses remained closed during such periods, which led to a significant adverse impact on our financials.

Our business was also impacted due to the pandemic. The COVID-19 pandemic at the onset on FY21 presented many challenges for the Engineering, Procurement and Construction (EPC) companies. Many projects got cancelled or delayed due to the uncertainty caused by the pandemic. There was delayed RFP response, logistical challenges due to nation-wide lockdown and supply-chain bottlenecks impacting procurement of goods and assets which in turn impacted project execution. The most severe impact felt, however, was of the exodus of labour. The order book position of several EPC companies was affected due to the COVID-19 induced challenges which in turn impacted their revenue mainly during the first and second quarter of FY21. However, by the third quarter, the nation-wide lockdown was mostly lifted, the issues of raw material and labour shortages were resolved and business operations began to normalize. (*Source: Company Commissioned CareEdge Report*).

India's economic recovery strengthened in the Q4FY21 before the onset of the second wave of pandemic. Construction segments benefited from the unlock process which gathered pace during the last two quarters. In FY21 Construction sector GVA fell by a sharp 7.3%. The growth was amplified in Q1FY22 because of a favorable base effect (low growth in Q4FY21) which aided the growth in the construction segments growing by 71.3% in Q1FY22 in contrast to a growth rate of 18.3% recorded during the previous quarter. Q2FY22 also witnessed a growth of 8.1%. Moreover, Q3FY22 witnessed a slowdown of 2.8% which later rebounded to 2% increase. Q1FY23 registered growth of 33% whereas Q2FY23 registered growth of 15% with normalcy in business environment post pandemic. (*Source: Company Commissioned CareEdge Report*). Following the lifting of the lockdown, we have resumed the construction work for the existing work Orders.

The degree to which COVID-19 may impact our results will depend on future developments, which cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, vaccination across the country and the world in general, and how quickly and to what extent normal economic and operating conditions can normalize. The above risks can threaten the safe operation of our business and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people. Further, muted economic growth could give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

EXTERNAL RISKS

53. *A slowdown in economic growth in India could adversely affect our business.*

The structure of the Indian economy has undergone considerable changes in the last decade. These include increasing importance of external trade and of external capital flows. Any slowdown in the growth of the Indian economy or the Construction, any future volatility in global commodity prices could adversely affect our business, financial condition and results of operations. India's economy could be adversely affected by a general rise in interest rates, fluctuations in currency exchange rates, adverse conditions affecting housing and tourism and electricity prices or various other Factors. Further, conditions outside India, such as slowdowns in the economic growth of other countries, could have an impact on the growth of the Indian economy and government policy may change in response to such conditions. The Indian economy and financial markets are also significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States, Europe or China or Asian emerging market countries, may have an impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss of investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets, and could have an adverse effect on our business, financial condition and results of operations and the price of the Equity Shares.

54. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely*

affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

55. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.*

Our business, results of operations and financial condition could be materially adversely affected by changes in the laws, rules, regulations or directions applicable to us, or the interpretations of such existing laws, rules and regulations, or the promulgation of new laws, rules and regulations. For details on the laws applicable to us, please see "**Key Regulations and Policies in India**" on page [.] of this Draft Red Herring Prospectus.

The governmental and regulatory bodies may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, results of operations and financial condition

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations, including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals.

The Government of India has notified four labour codes which are yet to completely come into force as on the date of this Draft Red Herring Prospectus, namely, (i) The Code on Wages, 2019, (ii) The Industrial Relations Code, 2020, (iii) The Code on Social Security, 2020 and (iv) The Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations

There can be no assurance that the Government of India will not implement new regulations and policies requiring us to obtain approvals and licenses from the Government of India or other regulatory bodies or impose onerous requirements and conditions on our operations. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and financial condition.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time-consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future

56. *Compliance with, and changes in, environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures may adversely affect our cash flows, business results of operations and financial condition. Further, our Construction & Development projects involve dangerous operations. In the event of any accidents, we may be held liable for damages and penalties which may impact our financials.*

Our project operations are subject to environmental, health and safety and other regulatory and/ or statutory

requirements in the jurisdictions in which we operate. Our project operations may generate pollutants and waste, some of which may be hazardous. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India, including laws addressing the discharge of pollutants into the air and water, the management and disposal of any waste. We may incur substantial costs in complying with environmental laws and regulations. We cannot assure you that compliance with such laws and regulations will not result in delays in completion, a material increase in our costs or otherwise have an adverse effect on our financial condition, cash flows and results of operations. Further, construction activities in India are also subject to various health and safety laws and regulations as well as laws and regulations governing their relationship with their respective employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring and terminating employees, contract labour and work permits. Accidents, in particular fatalities, may have an adverse impact on our reputation and may result in fines and/or investigations by public authorities as well as litigation from injured workers or their dependents. Non-compliance with these laws and regulations, which among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations, could expose us to civil penalties, criminal sanctions and revocation of key business licences. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management.

As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition. In addition, we could incur substantial costs and we could face other sanctions, if we were to violate or become liable under environmental laws or if our projects become non-compliant with applicable regulations. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean-up costs.

Our employees/labour may be required to work under potentially dangerous circumstances in the Construction & Development projects. Any mishandling of equipment and machineries could also lead to serious and sometimes fatal accidents. These accidents can cause personal injury and loss of life, severe damage to and destruction of property and equipment, environmental damage and may result in the suspension of operations and the imposition of civil and criminal liabilities. Liabilities incurred as a result of these events have the potential to adversely impact our financial position and reputation. Events like these could result in liabilities, or adversely affect our reputation employees and the public, which could in turn affect our financial condition and business performance.

57. *Employee misconduct, errors or fraud could expose us to business risks or losses that could adversely affect business prospects, results of operations and financial condition.*

Employee misconduct, errors or frauds could expose us to business risks or losses, including regulatory sanctions, penalties and serious harm to our reputation. Such employee misconduct includes breach in security requirements, misappropriation of funds, hiding unauthorized activities, failure to observe our stringent operational standards and processes, and improper use of confidential information. While we have not faced any such instances of material nature in the last three (3) financial years, it may not always be possible to detect or deter such misconduct, and the precautions we take to prevent and detect such misconduct may not be effective. In addition, losses caused on account of employee misconduct or misappropriation of petty cash expenses and advances may not be recoverable, which may result in write-off of such amounts.

58. *Any changes in regulations or applicable government incentives would materially adversely affect our Company's operations and growth prospects.*

Our Company is subject to regulations in India. Our Company's business and prospects could be adversely affected by changes in any of these regulations and policies, or if any or all of the incentives currently available cease to be, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. However, there can be no assurance that our Company will succeed in obtaining all requisite approvals in the future for its operations or that

compliance issues will not be raised in respect of its operations, either of which would have a material adversely effect on our Company's operations and financial results. For further details, please refer to the chapter titled "*Key Regulations and Policies in India*" on page [.] of this Draft Red Herring Prospectus.

59. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. Following the United Kingdom's exit from the European Union ("**Brexit**"), there remains significant uncertainty around the terms of their future relationship with the European Union and, more generally, as to the impact of Brexit on the general economic conditions in the United Kingdom and the European Union and any consequential impact on global financial markets. For example, Brexit could give rise to increased volatility in foreign exchange rate movements and the value of equity and debt investments.

Further, the ongoing Russia Ukraine conflict and the conflict between Israel and Palestine could adversely affect our results of operations, cash flows or financial condition.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operations and reduce the price of the Equity Shares.

60. *We may be affected by competition laws and labour laws, the adverse application or interpretation of which could adversely affect our business.*

The Competition Act, 2002, of India, as amended ("**Competition Act**"), regulates practices having an appreciable adverse effect on competition in the relevant market in India ("**AAEC**"). Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an AAEC is considered void and may result in the imposition of substantial penalties. Further, any agreement among competitors which directly or indirectly involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or the provision of services or shares the market or source of production or provision of services in any manner, including by way of allocation of geographical area or number of customers in the relevant market or directly or indirectly results in bid-rigging or collusive bidding is presumed to have an AAEC and is considered void. The Competition Act also prohibits abuse of a dominant position by any enterprise.

On March 4, 2011, the Government notified and brought into force the combination regulation (merger control) provisions under the Competition Act with effect from June 1, 2011. These provisions require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed

asset and turnover based thresholds to be mandatorily notified to and pre-approved by the Competition Commission of India (the “CCI”). Additionally, on May 11, 2011, the CCI issued Competition Commission of India (Procedure for Transaction of Business Relating to Combinations) Regulations, 2011, as amended, which sets out the mechanism for implementation of the merger control regime in India.

The Competition Act aims to, among others, prohibit all agreements and transactions which may have an AAEC in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an AAEC in India. However, the impact of the provisions of the Competition Act on the agreements entered into by us cannot be predicted with certainty at this stage. However, since we pursue an acquisition driven growth strategy, we may be affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI or if any prohibition or substantial penalties are levied under the Competition Act, it would adversely affect our business, results of operations, cash flows and prospects.

The Government of India has passed new laws relating to social security, occupational safety, industrial relations and wages namely, the Code on Social Security, 2020, the Occupational Safety, Health and Working Conditions Code, 2020, the Industrial Relations Code, 2020 and the Code on Wages, 2019, respectively which were to take effect from April 1, 2021 (collectively, the “Labour Codes”). The Government of India has deferred the effective date of the Labour Codes and they shall come into force from such date as may be notified by the Government. Further, the Code on Social Security, 2020 (“Social Security Code”) will impact overall employee expenses and, in turn, could impact the profitability of our Company. Under the Social Security Code, a new concept of deemed remuneration has been introduced, such that where an employee receives more than half (or such other percentage as may be notified by the Central Government), of their total remuneration in the form of allowances and other amounts that are not included within the definition of wages under the Social Security Code, the excess amount received shall be deemed as remuneration and accordingly be added to wages for the purposes of the Social Security Code and the compulsory contribution to be made towards the employees’ provident fund. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

61. *A third-party could be prevented from acquiring control of us post this Issue, because of anti-takeover provisions under Indian law.*

As a listed Indian entity, there are provisions in Indian law that may delay, deter or prevent a future takeover or 'change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company subsequent to completion of the Issue. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

62. *We are subject to regulatory, economic, social and political uncertainties and other factors beyond our control.*

We are incorporated in India and we conduct our corporate affairs and our business in India. Our Equity Shares are proposed to be listed on BSE and NSE. Consequently, our business, operations, financial performance and the market price of our Equity Shares will be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations may include:

- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian customers and Indian corporations;
- epidemic or any other public health in India or in countries in the region or globally, including in India's various neighbouring countries;
- macroeconomic factors and central bank regulation, including in relation to interest rates movements which may in turn adversely impact our access to capital and increase our borrowing costs;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- decline in India's foreign exchange reserves which may affect liquidity in the Indian economy;
- downgrading of India's sovereign debt rating by rating agencies; and
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms and/or a timely basis.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy or certain regions in India, could adversely affect our business, results of operations and financial condition and the price of the Equity Shares. For example, our manufacturing facilities are located in western India, hence any significant disruption, including due to social, political or economic factors or natural calamities or civil disruptions, impacting this region may adversely affect our operations.

63. *If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

64. *Adverse geopolitical conditions such as an increased tension between India and its neighbouring countries, Russia-Ukraine conflict, could adversely affect our business, results of operations and financial condition.*

Adverse geopolitical conditions such as increased tensions between India and its neighbouring countries, resulting in any military conflict in the region could adversely affect our business and operations. Such events may lead to countries including the Government of India imposing restrictions on the import or export of products or components, among others, and affect our ability to procure raw materials required for our business operations. We could also be affected by the introduction of or increase in the levy of import tariffs in India, or changes in trade agreements between countries. For instance, the government of India has imposed additional tariffs in the nature of countervailing duty and anti-dumping duty on a number of items imported from China. Any such measure or reciprocal duties imposed on Indian products by China or other countries may adversely affect our results of operations and financial condition. Further, prolonged Russia-Ukraine conflict that is currently impacting, *inter alia*, global trade, prices of oil and gas could have an inflationary impact on the Indian economy.

65. *A downgrade in ratings of India, may affect the trading price of the Equity Shares.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such financing is available, including raising any overseas additional financing. A downgrading of India's credit ratings may occur, for example, upon a change of government tax or fiscal policy, which are outside our control. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

RISKS RELATING TO THE EQUITY SHARES AND THE OFFER

66. *There is no guarantee that the issue will be fully subscribed. This may lead to cancellation or withdrawal of the Initial Public Offer by the issuer.*

According to SEBI rules pertaining to IPOs, the IPO must get not less than 90% response to the IPO in the form of subscriptions. If that is not achieved, then the issue has to be cancelled and all the monies have to be refunded to the investors fully, with no costs charged to them of any kind. There have been occasions in the past where the retail or the HNI portion or the QIB reserved portion has been undersubscribed. However, in such cases, if the overall issue has got more than 90% subscribed, then the issuer can reallocate the additional shares to the other categories. However, if the issue is not subscribed by at least 90%, the issue has to be called off on account of under-subscription.

In the past year i.e. in June 2023, our promoter company M/s. PKH Ventures Limited, had come up with an initial public offering after all necessary approvals from SEBI, BSE and NSE. However, our promoter company decided to cancel its IPO due to weak market conditions and a very tepid response to the IPO. The overall IPO got just 65% subscription till the close. While the retail portion got just about subscribed and the HNI / NII portion got marginally oversubscribed, the QIB portion fell short. The retail portion subscribed 0.99 times while the HNI / NII portion got subscribed about 1.67 times overall. However, the QIB portion fell short with just about 11% subscription. Such undersubscription can happen due to various reasons.

Several factors might make a company reconsider its decision of an IPO. These can include market scenarios, internal corporate matters, and the timing of regulatory approval. Responding to these conditions, companies might choose to postpone or withdraw their IPOs as these can influence the pricing and performance of their shares post-IPO. Beyond market dynamics, internal business deliberations can also impact a company's decision to delay or withdraw an IPO.

There has been several such instances in the past where the issuer companies have either cancelled or withdrawn their plans of IPO due to the above reasons. Hence, the approval from the regulators and opening of the issue does not guarantee that the issue will be fully subscribed till the final day of closing of the issue.

67. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.*

There has been no public market for our Equity Shares prior to the Offer. The purchase price of our Equity Shares in the Offer will be determined by our Company in consultation with the BRLM, pursuant to the Book Building Process. This price will be based on numerous factors, as described under in "***Basis for the Offer Price***" on page 116. This price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on NSE and BSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows
- The history and prospects for our business
- An assessment of our management, our past and present operations and the prospects for as well as timing of our future revenues and cost structures
- The valuation of publicly traded companies that are engaged in business activities similar to ours
- quarterly variations in our results of operations
- results of operations that vary from the expectations of securities analysts and investors
- results of operations that vary from those of our competitors
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors
- a change in research analysts' recommendations
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments
- announcements of significant claims or proceedings against us
- new laws and government regulations that directly or indirectly affecting our business
- additions or departures of Key Managerial Personnel
- changes in the interest rates
- fluctuations in stock market prices and volume
- general economic conditions

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

- 68. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.***

Following the Issue, our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian Stock Exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares beyond the circuit breaker limit set by the Stock Exchanges. As a result of this circuit breaker, we cannot give you any assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 69. *The determination of the Price Band and the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.***

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company in consultation with the BRLM. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the BRLM through the Book Building Process. These will be based on numerous factors, including factors as described under 'Basis for the Issue Price' on page 104 and may not be indicative of the market price for the Equity Shares after the Issue. The factors that could affect the market price of the Equity Shares include, among others, broad market trends, our financial performance and results post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

- 70. *There is no guarantee that our Equity Shares will be listed on the BSE and the NSE in a timely manner or at all.***

There is no guarantee that our Equity Shares will be listed on the BSE and the NSE in a timely manner or at all. In accordance with Indian law, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the BSE and the NSE within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

71. *Investors may not be able to enforce a judgment of a foreign court against us, our Directors, the BRLM or any of their directors and executive officers in India respectively, except by way of a lawsuit in India.*

Our Company is a company incorporated under the laws of India. A majority of our assets, our Key Managerial Personnel and officers are located in India. As a result, it may not be possible for investors to affect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered. Recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908. India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, United Arab Emirates, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the Indian Code of Civil Procedure, 1908. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favour a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment. However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India. Further, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approval would be acceptable. Such an amount may also be subject to income tax in accordance with applicable law.

72. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.*

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the DPIIT, which has been incorporated as the proviso to Rule 6(a) of the FEMA Non-debt Rules, all investments under the foreign direct investment route by entities of a country or where the beneficial

owner of the Equity Shares is situated in or is a citizen of any such country, can only be made through the Government approval route, as prescribed in the Consolidated FDI Policy dated October 15, 2020 and the FEMA Rules. While the term “beneficial owner” is defined under the Prevention of Money-Laundering (Maintenance of Records) Rules, 2005 and the General Financial Rules, 2017, neither the foreign direct investment policy nor the FEMA Rules provide a definition of the term “beneficial owner”. The interpretation of “beneficial owner” and enforcement of this regulatory change involves certain uncertainties, which may have an adverse effect on our ability to raise foreign capital. Further, there is uncertainty regarding the timeline within which the said approval from the GoI may be obtained, if at all. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see “**Restrictions on Foreign Ownership of Indian Securities**” on page 356 of this Draft Red Herring Prospectus.

73. *Significant differences exist between Ind AS and other accounting principles, such as U.S. GAAP and IFRS, which investors may be more familiar with and may consider material to their assessment of our financial condition.*

Our Restated Financial Statements for Fiscal 2023, 2022 and 2021, have been prepared and presented in conformity with Ind AS. Ind AS differs in certain significant respects from IFRS, U.S. GAAP and other accounting principles with which prospective investors may be familiar in other countries. If our financial statements were to be prepared in accordance with such other accounting principles, our results of operations, cash flows and financial position may be substantially different. Prospective investors should review the accounting policies applied in the preparation of our financial statements, and consult their own professional advisers for an understanding of the differences between these accounting principles and those with which they may be more familiar. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should be limited accordingly.

74. *Any future issuance of Equity Shares by us or sales of Equity Shares by our Promoter could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current Shareholders.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by us may dilute your shareholding in the Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. No assurance may be given that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our significant shareholders, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue Equity Shares or that such shareholders will not dispose off, pledge or encumber their Equity Shares in the future.

As disclosed in “**Capital Structure**” on page[.], an aggregate of 20% of our fully diluted post-Offer capital held by our Promoter shall be considered as minimum Promoter’s Contribution and locked in for a period of eighteen (18) months and the balance Equity Shares held by the Promoter following the Offer (assuming all of the Offered Shares are sold in the Offer) will be locked-in for six (6) months from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in “**Capital Structure**” on page [.] there is no restriction on disposal of Equity Shares by promoter. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that our Promoter will not sell, pledge or encumber his Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Offer Price. Sales of Equity Shares by the Promoter could also adversely affect the trading price of our Equity Shares.

75. *You will not be able to immediately sell any of the Equity Shares you purchase in this Offer on the Stock Exchanges.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to the applicable Indian laws and practice, permission for listing of the Equity Shares will not be granted till the Equity Shares in this Offer have been

issued and allotted and all relevant documents are submitted to the Stock Exchanges. Further, certain actions must be completed prior to the commencement of listing and trading of the Equity Shares such as the Investor's book entry or 'demat' accounts with the depository participants in India, expected to be credited within one (1) Working Day of the date on which the Basis of Allotment is finalized with the Designated Stock Exchange. In addition, the Allotment of Equity Shares in the Offer and the credit of such Equity Shares to the applicant's demat account with the depository participant could take approximately five Working Days from the Bid/Offer Closing Date and trading in Equity Shares upon receipt of listing and trading approval from the Stock Exchanges, trading of Equity Shares is expected to commence within six Working Days from Bid/ Offer Closing Date. Any failure or delay in obtaining the approval or otherwise commence trading in Equity Shares would restrict your ability to dispose of your Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence in a timely manner (as specified herein) or at all. We could also be required to pay interest at the applicable rates if the allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

76. *Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.*

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced

77. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax ("STT") was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

78. *Qualified Institutional Bidders and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid and and Retail Individual Investors are not permitted to withdraw their Bids after Bid/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within three (3) Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Offer or may cause the trading price of our Equity Shares to decline on listing.

Retail Individual Investors can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While our Company is required to complete all necessary formalities for listing and commencement of trading of the Equity Shares on all Stock Exchanges where such Equity Shares are proposed to be listed including Allotment pursuant to the Offer within six Working Days from the Bid/Offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the Bidders' ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

79. *Rights of shareholders of our Company under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and wide-spread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder of our Company than as a shareholder of an entity in another jurisdiction.

The fund requirements, the deployment of funds and the intended use of the Net Proceeds as described herein are based on our current business plan, management estimates, and other commercial and technical Factors. These fund requirements have not been appraised by any bank, financial institution or any other external agency. Our Company may have to revise its funding requirements and deployment on account of a variety of factors, including but not limited to our financial and market condition, business and strategy, competition, interest or exchange rate fluctuations and other external factors, which may not be within the control of our management. If surplus funds are unavailable, the required financing will be done through internal accruals through cash flows from our operations and debt. In case of a shortfall in raising requisite capital from the Net Proceeds towards meeting the objects of the Offer, we may explore a range of options including utilizing our internal accruals and seeking additional debt from existing and future lenders. We believe that such alternate arrangements would be available to fund any such shortfalls.

In the event that the estimated utilization of the Net Proceeds in a scheduled financial year is not completely met,

due to the reasons stated above, the same shall be utilized in the next financial year, as may be determined by our Company, in accordance with applicable laws. Current Assets		
1	Inventories	In order to achieve cost competitiveness and lead times through constant innovation, we need to maintain efficient inventory levels. In Fiscals 2021, 2022, 2023 and as on 30 th November, 2023 our inventory days were 0 days, 87 days, 209 days and 152 days, respectively as per restated financial statements. One of our residential project was delayed due to delay in receipt of further commencement certificate which led to high inventory days. This was exceptional. For Fiscal 2025 and 2026, by better inventory management and subsequent monitoring over effective usage, we are targeting to reduce our inventory days to 75 days.
2	Trade receivables	In Fiscals 2021, 2022, 2023 and as on 30 th November, 2023 our receivable days were 166 days, 143 days, 175 days and 148 days, respectively as per restated financial statements. Estimate for Fiscal 2024, 2025 and Fiscal 2026 are based on the past receivable days. We expect the receivable days at 120 days for Fiscal 2024, Fiscal 2025 and Fiscal 2026.
3	Advance to Suppliers and Business Advance Days	Our company tries to maintain a policy of business advance and advance to supplier for 30-45 days. Our advance to supplier days on restated financial statement was 325 days, 108 days, 36 days, 37 days for Fiscals 2021, 2022, 2023 and as on 30 th November, 2023 respectively. Fiscal 2021 and 2022 was exceptional as advance to two suppliers were made for a project who could not supply due to COVID-19 impact due to which the ratio was high. However, our company aims to maintain the same policy for advance to supplier and thus expects advances of 43 days, 43 days and 42 days for the Fiscal 2024, 2025 and 2026 respectively.
Current Liabilities

With the availability of funds from the issue proceeds, we seek to avail best pricing by monetizing the reduced credit days and also buy from large suppliers. With reduced costs, our EBITDA margin will also increase. With the issue proceeds, we estimate to reduce our payables at 64 days for Fiscal 2024, 48 days for Fiscal 2025 and 45 days for Fiscal 2026.
5	Advance from Customer Days	Our advance to customer days on restated financial statement was 0 days, 0 days, 17 days, 27 days for Fiscals 2021, 2022, 2023 and as on 30 th November, 2023 respectively. The actual deployment of funds will depend on a number of factors, including the timing, nature, size and number of acquisitions to be undertaken, as well as general factors affecting our results of operation and financial condition. Some of the selection criteria that we may consider when evaluating strategic acquisitions include:

- strategic fit with our existing business such that the businesses are synergistic with some of our existing businesses/customers or where we can look to leverage some of our existing experience, expertise or relationships, amongst other competencies;
- new customers / users that we can serve with our existing capabilities;
- product portfolio or product category adjacencies that can increase our wallet share from existing as well new customers
- newer service offerings as well as improvement of our service and customer mix such that our overall margin profile improves;
- enhance our geographical reach;
- strengthen market share in existing markets; and
- identification of a strong management team run by experienced promoters who then continue to work with us to not only build their original businesses but add value to the overall organization.

1 Economic Outlook

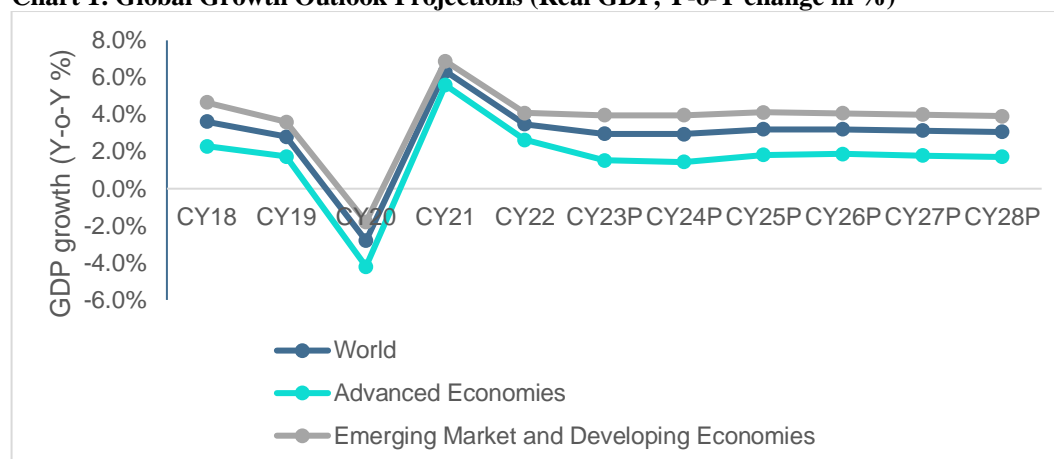

1.1 Global Economy

As per the International Monetary Fund (IMF)’s World Economic Outlook growth projections released in October 2023, the global economic growth for CY22¹ stood at 3.5% on a year-on-year (y-o-y) basis, down from 6.3% in CY21 due to disruptions resulting from the Russia-Ukraine conflict and higher-than-

expected inflation worldwide. On the other hand, the global economic growth for CY23 is projected to slow down further to 3.0% and 2.9% in CY24, attributed to compressing global financial conditions, expectant steeper interest rate hikes by major central banks to fight inflation, and spill-over effects from the Russia-Ukraine conflict, with gas supplies from Russia to Europe expected to remain tightened. For the next 4 years, the IMF projects world economic growth in the range of 3.0%-3.2% on a y-o-y basis.

Advanced Economies Group

The major advanced economies registered GDP growth of 2.6% in CY22, down from 5.6% in CY21, which is further projected to decline to 1.5% in CY23. This forecast of low growth reflects increased central bank interest rates to fight inflation and the impact of the Russia-Ukraine war. About 90% of advanced economies are projected to witness decline GDP growth in CY23 compared to CY22. In addition, this is further expected to decline to 1.4% in CY24.

One of the major countries from this group is the **United States**. The United States registered GDP growth of 2.1% in CY22 compared to 5.9% in CY21. Whereas, growth for CY23 and CY24 is projected at 2.1% and 1.5%, respectively. Among advanced economies group, private consumption has been stronger in the United States than in the euro area. The business investments have also been robust in the second quarter, in addition, the general government fiscal stance of United States is expected to be expansionary in CY23. However, the unemployment rate is expected to rise coupled with declining wages and savings. With this, the GDP growth is expected to soften in near term.

Further, the **Euro Area** registered GDP growth of 3.3% in CY22 compared to 5.6% in CY21. For CY23 and CY24, the growth is projected at 0.7% and 1.2%, respectively. There is divergence in GDP growth across the euro area. Wherein, Germany is expected to witness slight contraction in growth due to weak

interest rate sensitive sector and slow trading demand. On the other hand, the GDP growth for France has been revised upwards on account of growing industrial production and external demand.

Emerging Market and Developing Economies Group

For the emerging market and developing economies group, GDP growth stood at 4.1% in CY22, compared to 6.9% in CY21. This growth is further projected at 4.0% in CY23 and CY24. About 90% of the emerging economies are projected to make positive growth. While the remaining economies, including the low-income countries, are expected to progress slower.

Further, in **China**, growth is expected to pick up to 5.0% with the full reopening in CY23 and subsequently moderate in CY24 to 4.2%. The property market crisis and lower investment are key factors leading to this moderation. Whereas, **India** is projected to remain strong at 6.3% for both CY23 and CY24 backed by resilient domestic demands despite external headwinds.

The **Indonesian** economy is expected to register growth of 5% both in CY23 and CY24 with a strong recovery in domestic demands, a healthy export performance, policy measures, and normalization in commodity prices. In CY22, **Saudi Arabia** was the fastest-growing economy in this peer set with 8.7% growth. The growth is accredited to robust oil production, non-oil private investments encompassing wholesale and retail trade, construction and transport, and surging private consumption. Saudi Arabia is expected to grow at 0.8% and 4.0% in CY23 and CY24, respectively. On the other hand, **Brazil** is expected to project growth of 3.1% in CY23 driven by buoyant agriculture and resilient services in the first half of CY23.

Despite the turmoil in the last 2-3 years, India bears good tidings to become a USD 5 trillion economy by CY27. According to the IMF dataset on Gross Domestic Product (GDP) at current prices, the nominal GDP has been estimated to be at USD 3.4 trillion for CY22 and is projected to reach USD 5.2 trillion by CY27. India's expected GDP growth rate for coming years is almost double compared to the world economy.

Besides, India stands out as the fastest-growing economy among the major economies. The country is expected to grow at more than 6% in the period of CY24-CY28, outshining China's growth rate. By CY27, the Indian economy is estimated to emerge as the third-largest economy globally, hopping over Japan and Germany. Currently, it is the third-largest economy globally in terms of Purchasing Power Parity (PPP) with a ~7% share in the global economy, with China [~18%] on the top followed by the United States [~15%]. Purchasing Power Parity is an economic performance indicator denoting the relative price of an average basket of goods and services that a household needs for livelihood in each country.

Despite Covid-19's impact, high inflationary environment and interest rates globally, and the geopolitical tensions in Europe, India has been a major contributor to world economic growth. India is increasingly becoming an open economy as well through growing foreign trade. Despite the global inflation and uncertainties, Indian economy continues to show resilience. This resilience is mainly supported stable financial sector backed by well-capitalized banks and export of services in trade balance. With this, the growth of Indian economy is expected to fare better than other economies majorly on account of strong investment activity bolstered by the government's capex push and buoyant private consumption, particularly among higher income earners.

1.2 Indian Economic Outlook

1.2.1 GDP Growth and Outlook

Resilience to External Shocks remains Critical for Near-Term Outlook

India's real GDP grew by 9.1% in FY22 and stood at ~₹ 149 trillion despite the pandemic and geopolitical Russia-Ukraine spillovers. In Q1FY23, India recorded 13.1% y-o-y growth in real GDP, largely attributed to improved performance by the agriculture and services sectors. Following this double-digit growth, Q2FY23 witnessed 6.2% y-o-y growth, while Q3FY23 registered 4.5% y-o-y growth. The slowdown during Q2FY23

and Q3FY23 compared to Q1FY23 can be attributed to the normalization of the base and a contraction in the manufacturing sector's output.

Subsequently, Q4FY23 registered broad-based improvement across sectors compared to Q3FY23 with a growth of 6.1% y-o-y. The investments, as announced in the Union Budget 2022-23 on boosting public infrastructure through enhanced capital expenditure, have augmented growth and encouraged private investment through large multiplier effects in FY23. Supported by fixed investment and higher net exports, real GDP for full-year FY23 was valued at ₹ ~160. trillion registering an increase of 7.2% y-o-y.

Furthermore, in Q1FY24, the economic growth accelerated to 7.8%. The manufacturing sector maintained an encouraging pace of growth, given the favorable demand conditions and lower input prices. The growth was supplemented by a supportive base alongside robust services and construction activities. This momentum was maintained in the Q2FY24 with GDP growth at 7.6%, mainly supported by acceleration in investments. However, private consumption growth was muted due to weak rural demand and some moderation in urban demand amid elevated inflationary pressures in Q2FY24. On the supply side, a significant improvement in manufacturing and construction activities supported growth. Overall, the economy expanded by 7.7% in H1FY24 compared to 5.3% in H2FY23. As per recent Ministry of Statistics and Programme Implementation (MoSPI)'s advanced estimate release, the real GDP growth for FY24 is pegged at 7.3% and will attain a level of ~ ₹ 171.79 trillion.

GDP Growth Outlook

- Driven by resilience in urban demand and the front loading of the government's capital expenditure, the H1FY24 witnessed a strong growth. While festive cheer will support urban demand in Q3, the outlook for rural demand revival remains clouded amid monsoon deficiency and likely hit to the agricultural production.
- The recent announcements of various relief measures such as LPG price reduction and extension of Pradhan Mantri Garib Kalyan Anna Yojna (PMGKAY) are expected to provide some cushion and so far, investment demand has remained robust. However, there could be some moderation in H2FY24 as both the government and private sector may restrain their capital spending ahead of the general elections. Despite some expected moderation in the H2FY24, India's overall GDP growth for FY24 is expected to remain on a firm footing.
- Strong credit growth, resilient financial markets, and the government's continual push for capital spending and infrastructure are likely to create a compatible environment for investments.
- External demand is likely to remain subdued with a slowdown in global activities, thereby indicating adverse implications for exports. Additionally, heightened inflationary pressures and resultant policy tightening may pose a risk to the growth potential.

Taking all these factors into consideration, in December 2023, the RBI in its bi-monthly monetary policy meeting estimated a real GDP growth of 7% y-o-y for FY24 comparatively lower from MoSPI's estimate.

1.2.2 Gross Value Added (GVA)

Gross Value Added (GVA) is the measure of the value of goods and services produced in an economy. GVA gives a picture of the supply side whereas GDP represents consumption.

Industry and Services sector leading the recovery charge

- The gap between GDP and GVA growth turned positive in FY22 (after a gap of two years) due to robust tax collections. Of the three major sector heads, the service sector has been the fastest-growing sector in the last 5 years.
- The **agriculture sector** was holding growth momentum till FY18. In FY19, the acreage for the rabi crop was marginally lower than the previous year which affected the agricultural performance. Whereas FY20 witnessed growth on account of improved production. During the pandemic-impacted period of FY21, the agriculture sector was largely insulated as timely and proactive exemptions from COVID-induced lockdowns to the sector facilitated uninterrupted harvesting of rabi crops and sowing of kharif crops. However, supply chain disruptions impacted the flow of agricultural goods leading to high food inflation and adverse initial impact on some major agricultural exports. However, performance remained steady in FY22.

In FY23, the agriculture sector performed well despite weather-related disruptions, such as uneven monsoon and unseasonal rainfall, impacting yields of some major crops and clocked a growth of 4% y-o-y, garnering ₹ 22.3 trillion.

In Q1FY24, this sector expanded at a slower pace of 3.5% y-o-y growth compared to y-o-y growth a quarter ago. This further stumbled to 1.2% in Q2FY24. Overall, H1FY24 registered a 2.4% growth with weakest monsoon experience caused by El Nino conditions.

Going forward, rising bank credit to the sector and increased exports will be the drivers for the agriculture sector. However, a deficient rainfall may have impact on the reservoir level, weighing on prospects of Kharif sowing. Considering these factors, the agriculture sector is estimated to attain ₹ 22.7 trillion and mark 1.8% y-o-y growth for complete FY24.

- The **industrial sector** witnessed a CAGR of 4.7% for the period FY16 to FY19. From March 2020 onwards, the nationwide lockdown due to the pandemic significantly impacted industrial activities. In FY20 and FY21, this sector felt turbulence due to the pandemic and recorded a decline of 1.4% and 0.9%, respectively, on a y-o-y basis. With the opening up of the economy and resumption of industrial activities, it registered 11.6% y-o-y growth in FY22, albeit on a lower base.

The industrial output in FY23 grew by 4.4% with estimated value ₹ 45.2 trillion owing to a rebound in manufacturing activities and healthy growth in the construction sector.

The industrial sector grew by 5.5% in Q1FY24, while Q2FY24 growth was up by 13.2% owing to positive business optimism and strong growth in new orders supported manufacturing output. The industrial growth was mainly supported by sustained momentum in the manufacturing and construction sectors. Within manufacturing, industries such as pharma, motor vehicles, metals, petroleum and pharma witnessed higher production growth during the quarter. The construction sector (13% growth in Q2FY24) benefited from poor rainfall during August and September and higher implementation of infrastructure projects. This was reflected in robust cement and steel production and power demand in Q2FY24. Overall, H1FY24 picked up by 9.3% with manufacturing and construction activities witnessing significant acceleration.

India's industrial sector is experiencing strong growth, driven by significant expansion in manufacturing, mining, and construction. This growth is supported by positive business sentiment, declining commodity prices, beneficial government policies like production-linked incentive schemes, and efforts to boost infrastructure development. These factors collectively contribute to the sustained buoyancy in industrial growth due to which the industrial growth is estimated at 7.9% on y-o-y basis registering the value of ₹ 48.9 trillion in FY24.

The **services sector** recorded a CAGR of 7.1% for the period FY16 to FY20, which was led by trade, hotels, transport, communication, and services related to broadcasting, finance, real estate, and

professional services. This sector was the hardest hit by the pandemic and registered an 8.2% y-o-y decline in FY21. The easing of restrictions aided a fast rebound in this sector, with 8.8% y-o-y growth witnessed in FY22.

Overall, in FY23, benefitting from the pent-up demand, the service sector was valued at ₹ 20.6 trillion and registered growth of 9.5% y-o-y.

In Q1FY24, the services sector growth jumped to 10.3%. Within services, there was a broad-based improvement in growth across different sub-sectors. However, the sharpest jump was seen in financial, real estate, and professional services. Trade, hotels, and transport sub-sectors expanded at a healthy pace gaining from strength in discretionary demand. The service sector growth in Q2FY24 moderated to 5.8% partly due to the normalization of base effect and some possible dilution in discretionary demand. Considering these factors, service sector marked 8% growth in H1FY24.

With this performance, steady growth in various service sector indicators like air passenger traffic, port cargo traffic, GST collections, and retail credit are expected to support the services sector. With this, the growth of service sector is estimated at ₹ 86.2 trillion registering 7.7% growth in FY24 overall.

1.2.3 Investment Trend in Infrastructure

Gross Fixed Capital Formation (GFCF), which is a measure of the net increase in physical assets, witnessed an improvement in FY22. As a proportion of GDP, it is estimated to be at 32.7%, which is the second-highest level in 7 years (since FY15). In FY23, the ratio of investment (GFCF) to GDP climbed up to its highest in the last decade at 34%. Continuing in its growth trend, this ratio is expected to reach 34.9% in FY24.

Overall, the support of public investment in infrastructure is likely to gain traction due to initiatives such as Atmanirbhar Bharat, Make in India, and Production-linked Incentive (PLI) scheme announced across various sectors.

1.2.4 Industrial Growth

Improved Core and Capital Goods Sectors helped IIP Growth Momentum

The Index of Industrial Production (IIP) is an index to track manufacturing activity in an economy. On a cumulative basis, IIP grew by 11.4% y-o-y in FY22 post declining by 0.8% y-o-y and 8.4% y-o-y, respectively, in FY20 and FY21. This high growth was mainly backed by a low base of FY21. FY22 IIP was higher by 2.0% when compared with the pre-pandemic level of FY20, indicating that while economic recovery was underway, it was still at very nascent stages.

During FY23, the industrial output recorded a growth of 5.1% y-o-y supported by a favorable base and a rebound in economic activities. The period April 2023 – November 2023, industrial output grew by 6.4% compared to the 5.6% growth in the corresponding period last year. For the month of November 2023, the IIP growth slowed down to 2.4% compared to the last year primarily on account of a normalization of base.

So far in the current fiscal, while the infrastructure-related sectors have been doing well, slowing global growth and downside risks to rural demand have posed a challenge for industrial activity. Though the continued moderation in inflationary pressure offers some comfort, pain points in the form of elevated prices of select food items continue to persist.

1.2.5 Consumer Price Index

India's consumer price index (CPI), which tracks retail price inflation, stood at an average of 5.5% in FY22 which was within RBI's targeted tolerance band of 6%. However, consumer inflation started to upswing from October 2021 onwards and reached a tolerance level of 6% in January 2022. Following this, CPI reached 6.9% in March 2022.

CPI remained elevated at an average of 6.7% in FY23, above the RBI's tolerance level. However, there was some respite toward the end of the fiscal wherein the retail inflation stood at 5.7% in March 2023, tracing back to the RBI's tolerance band. Apart from a favorable base effect, the relief in retail inflation came from a moderation in food inflation.

In the current fiscal FY24, the CPI moderated for two consecutive months to 4.7% in April 2023 and 4.3% in May 2023. This trend snapped in June 2023 with CPI rising to 4.9%. In July 2023, the CPI had reached the RBI's target range for the first time since February 2023 at 7.4% largely due to increased food inflation. This marked the highest reading observed since the peak in April 2022 at 7.8%. The notable surge in vegetable prices and elevated inflation in other food categories such as cereals, pulses, spices, and milk have driven this increase. Further, the contribution of food and beverage to the overall inflation had risen significantly to 65%, surpassing their weight in the CPI basket. In August 2023, the food inflation witnessed some moderation owing to government's active intervention. This was further moderated for second consecutive month in September 2023 to 5%, led by a sharp correction in vegetables prices and lower LPG prices. Helped by deflation in the fuel and light category, the retail inflation in October 2023 softened at 4.9%. This trend reversed in November 2023 due to spike in certain vegetable prices as well as sticky inflation in non-perishable food items such as cereals, pulses and spices and the CPI rose to 5.6%. In the month of December 2023, elevated food prices and an unfavourable base drove headline inflation to a eight month peak of 5.7%.

While the consistent decrease in core inflation due to falling commodity prices and diminishing demand-side pressures is encouraging, the ongoing high food inflation, potentially exacerbated by a projected drop in Kharif production and uncertainties around Rabi sowing, remains worrisome. Despite these concerns, the favourable base effect throughout Q4FY24 and the expected easing of food price pressures with the arrival of fresh crops from January to March could help mitigate inflation risks.

Chart 4: Retail Price Inflation in terms of index and Y-o-Y Growth in % (Base: 2011-12=100)

The CPI is primarily factored in by RBI while preparing their bi-monthly monetary policy. At the bi-monthly meeting held in December 2023, RBI projected inflation at 5.4% for FY24 with inflation during Q3FY24 at 5.6%, Q4FY24 at 5.2% Q1FY25 at 5.2% , Q2FY24 at 6.5% and Q3FY24 at 6.4%.

The RBI has increased the repo rates with the rise in inflation in the past year from 4% in April 2022 to 6.5% in January 2023. Considering the current inflation situation, RBI has kept the repo rate unchanged at 6.5% in the last five meetings of the Monetary Policy Committee.

Chart 5: RBI historical Repo Rate

Source: RBI

In a meeting held in December 2023, RBI also maintained the liquidity adjustment facility (LAF) corridor by adjusting the standing deposit facility (SDF) rate of 6.25% as the floor and the marginal standing facility (MSF) at the upper end of the band at 6.75%.

Further, the central bank continued to remain focused on the withdrawal of its accommodative stance. With domestic economic activities gaining traction, RBI has shifted gears to prioritize controlling inflation. While RBI has paused on the policy rate front, it has also strongly reiterated its commitment to bringing down inflation close to its medium-term target of 4%. Given the uncertain global environment and lingering risks to inflation, the Central Bank has kept the window open for further monetary policy tightening in the future, if required.

1.2.6 Overview on Key Demographic Parameters

- **Population growth and Urbanization**

The trajectory of economic growth of India and private consumption is driven by socio-economic factors such as demographics and urbanization. According to the world bank, India's population in 2022 surpassed 1.42 billion slightly higher than China's population 1.41 billion and became the most populous country in the world.

Age Dependency Ratio is the ratio of dependents to the working age population, i.e., 15 to 64 years, wherein dependents are population younger than 15 and older than 64. This ratio has been on a declining trend. It was as high as 76% in 1982, which has reduced to 47% in 2022. Declining dependency means the country has an improving share of working-age population generating income, which is a good sign for the economy.

Chart 6: Trend of India Population vis-à-vis dependency ratio

With an average age of 29, India has one of the youngest populations globally. With vast resources of young citizens entering the workforce every year, it is expected to create a 'demographic dividend'. India is home to a fifth of the world's youth demographic and this population advantage will play a critical role in economic growth.

- **Urbanization**

The urban population is significantly growing in India. The urban population in India is estimated to have increased from 403 million (31.6% of total population) in 2012 to 508 million (35.9% of total population) in the year 2022. People living in Tier-2 and Tier-3 cities have greater purchasing power.

- **Increasing Per Capita Disposable Income**

Gross National Disposable Income (GNDI) is a measure of the income available to the nation for final consumption and gross savings. Between the period FY14 to FY24, per capita GNDI at current prices registered a CAGR of 8.77%. More disposable income drives more consumption, thereby driving economic growth.

The chart below depicts the trend of per capita GNDI in the past decade:

- **Increase in Consumer Spending**

With increase in disposable income, there has been a gradual change in consumer spending behaviour as well. Private Final Consumption Expenditure (PFCE) which is measure of consumer spending has also showcased significant growth in the past decade at a CAGR of 9.6%. Following chart depicts the trend of per capita PFCE at current prices:

1.2.7 Concluding Remarks

The major headwinds to global economic growth are escalating geopolitical tensions, volatile global

commodity prices, and a shortage of key inputs. Despite the global economic growth uncertainties, the Indian economy is relatively better placed in terms of GDP growth compared to other emerging economies. According to IMF's forecast, it is expected to 6.3% in CY24 compared to the world GDP growth projection of 3%. The bright spots for the economy are continued healthy domestic demand, support from the government towards capital expenditure, moderating inflation, and improving business confidence.

Likewise, several high-frequency growth indicators including the purchasing managers index, auto sales, bank credit, and GST collections have shown improvement in FY23. Moreover, normalizing the employment situation after the opening up of the economy is expected to improve and provide support to consumption expenditure.

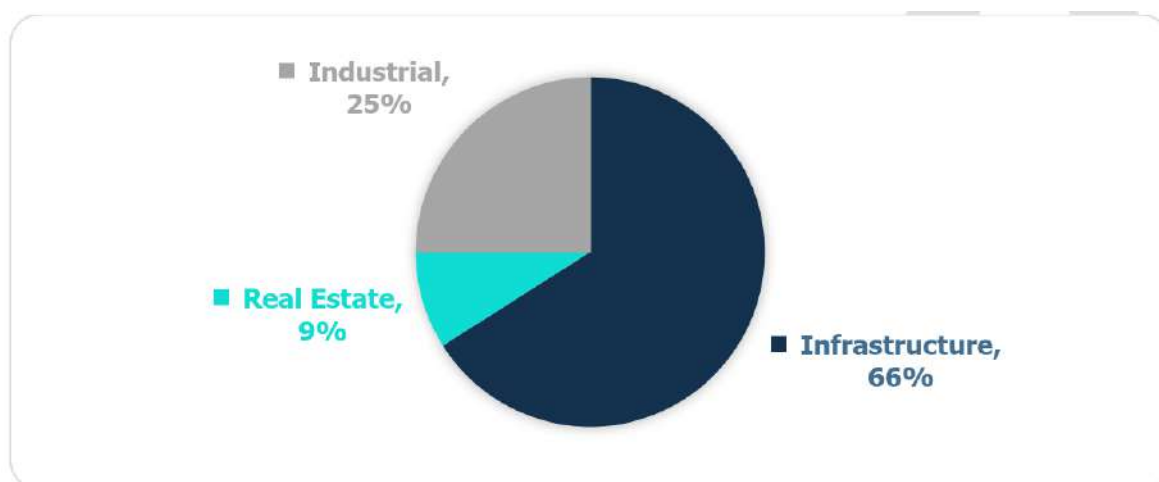

Further, as per the Indian Meteorological Department (IMD), the rainfall witnessed a deficit until September 2023. A drop-in yield due to irregular monsoons and a lower acreage can lead to a demand-supply mismatch, further increasing the inflationary pressures on the food basket. Moreover, the consumption demand is expected to pick up in Q3FY24 due to the festive season. Going forward, the rising domestic demand will be driven by the rural economy's performance and continual growth in urban consumption. However, high domestic inflation and global headwinds pose a downside risk to domestic demand.

At the same time, public investment is expected to exhibit healthy growth as the government has allocated a strong capital expenditure of about ₹ 10 lakh crores for FY24. The private sector's intent to invest is also showing improvement as per the data announced on new project investments. However, volatile commodity prices and economic uncertainties emanating from global turbulence may slow down the improvement in private CapEx and investment cycle.

Overview of the Construction sector in India

The construction sector is the country's second-largest economic segment after Agriculture. The sector contributed 8.4% to the national GVA (at constant price) in FY23. The order book of construction companies is dependent upon the capital expenditure in the economy. Broadly, the investments can be classified into infrastructure, real estate and industrial construction. Historically, infrastructure creation, spread across sectors such as roads and highways, telecom, airports, ports, power, oil and gas and railways has dominated the investments. Increase in Infrastructure demand & government initiative shows the potential for catapulting India to the third largest construction market globally. The sector is expected to contribute 15% to the Indian economy by 2030.

PPP models for enabling infrastructure growth

The government has taken constant steps for encouraging strong private participation in infrastructure sector, particularly from the perspective of the NIP. Hence the focus has been on building a robust enabling environment with a well-thought policy framework and a well-developed public authority for encouraging PPPs.

The different types of PPP models are as follows:

- **Build – Operate – Transfer (BOT)**

BOT is one of the most common privatization agreements. BOT model is generally used to develop discrete assets rather than a whole network, for example a toll road. In this agreement, the government will hand over the constructing and operating rights to a private sector which would be given out for a pre-determined period of time. Once the period is complete, the rights are transferred back to the government.

- **Build – Own – Operate (BOO)**

Under this, the government grants the right to finance, design, build, operate and maintain a project to a private entity, which retains the ownership of the project. The private entity is not required to transfer the facility back to the government.

- **Build – Own – Operate – Transfer (BOOT)**

The private sector builds and owns the facility for the duration of the contract, with the primary goal of recouping construction costs (and more) during the operational phase. At the end of the contract the facility is handed back to the government. This structure is suitable when the government has a large infrastructure financing gap as the equity and commercial risk stays with the private sector for the length of the contract. This model is often used for school and hospital contracts.

- **Engineering, Procurement and Construction (EPC)**

In the EPC mode, the private partner is solely responsible for construction of the project, the tolling and operations of the project are undertaken by the public partner.

- **Design – Build (DB)**

In this project agreement, a private partner is contracted by the government to design and build the facility based on the requirements performed by the government. Along with the agreement, the government will state the responsibilities in order to perform the operation and the maintenance of the facility. DB is also called as Build – Transfer (BT).

- **Design – Build – Operate (DBO)**

In the case of DBO, the designing and building of the facility is done based on a turn-key basis. After the completion of the facility, it is transferred to the public sector but the private sector will operate the facility for a specific period of time. The DBO can be also referred to as Build Transfer Operate (BTO).

- **Design – Build – Finance (DBF)**

The private sector constructs an asset and finances the capital cost during the construction period only. The variations of DBF include Design – Build – Finance – Operate (DBFO), Design – Build – Finance – Maintain (DBFM) and Design – Build – Finance – Maintain – Operate (DBFMO). These activities are performed for a particular period of time or a long - term lease. Once the lease time is over, the property is given back to the public sector.

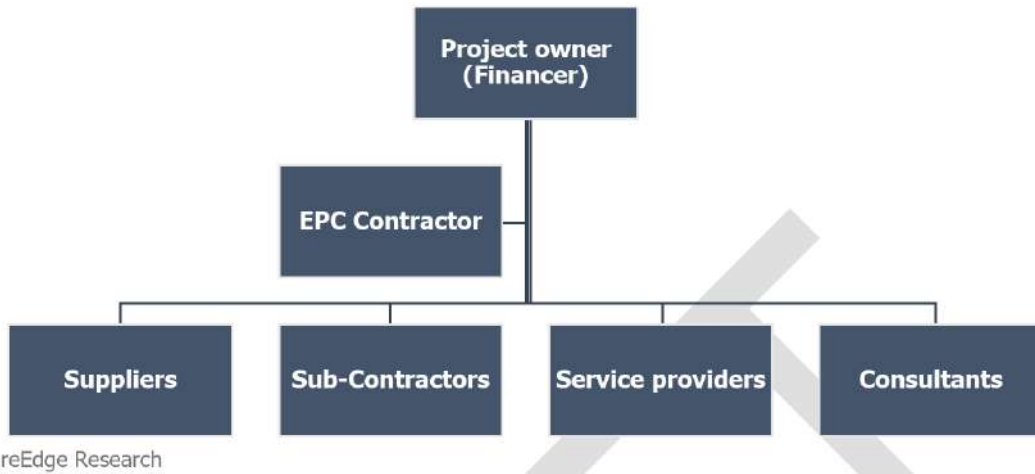

- **Lease – Renovate – Operate – Transfer (LROT)**

In this type, the existing infrastructure is handed over to a private facility for a particular time period. This is given to undergo renovation and its operation for a specific time period. The operation is performed on the condition that the private facility will recover the cost that is agreed in return as per the contractual agreement along with the transferring of the entity back to the government.

Construction EPC in India

EPC stands for ‘Engineering, Procurement and Construction’. EPC entails the contractor build the project by designing, installing and procuring necessary labour and land to construct the infrastructure, either directly or by subcontracting. The EPC contract is a type of construction contract between parties where the contractor is responsible for all the engineering, procurement, and construction activities to deliver the completed project to the employer or owner. In addition to the delivery of the complete facility, the EPC contractor must deliver it within a guaranteed time and guaranteed price. EPC vendors are those service providers which execute projects on a turnkey basis.

- **Fixed contract price**
- **Fixed completion date**

EPC companies are generally responsible for design, procurement, construction, commissioning, and handover of the project to the project owner. An EPC contract is a project document that binds the owner and contractor into a contractual framework by clearly transferring the risk responsibility related to designing, procuring, and constructing to the contractor. It also documents the performance standards the completed project is required to meet. EPC contractor then uses various suppliers, sub-contractors, engineers, and consultants to execute the project.

EPC contracts are of various types including turnkey contracts or contracts with fixed prices.

EPC companies can be classified based on their area of operation/specialization as below:

- **General Contracting/Infrastructure**
- **Building construction – Residential and Commercial segments**
- **Oil & Gas EPC**
- **Power EPC: General Power EPC and Power Transmission, Solar Power**
- **Specialized EPC: Marine, Industrial, Railways, Tunnelling, Mining etc.**

Opportunities in NIP for the construction segment

Before the onset of the pandemic the Government of India had unveiled the National Infrastructure Policy (NIP) covering various sectors and regions indicating that it is relying on an ‘infrastructure creation’ led revival of the country’s economy. The NIP which covered rural and urban infrastructure entailed investments to the tune of ₹ 11,10,000 thousand lakhs to be undertaken by the central government, state governments and the private sector during FY20-25. Now with that the economy has almost opened up with most of the migrant workers too are returning, infrastructure development will be relied upon to propel the Indian economy from the current slowdown.

This in turn is expected to offer significant opportunities to EPC players in India. Significant investment in infrastructure development, real estate will boost construction activities and act as a catalyst for growth of EPC companies in India.

Through the National Infrastructure Pipeline, the government of India plans to complete around 7,400 projects aggregating to ₹ 11,10,000 thousand lakhs. The project pipeline is expected to be collectively funded by the Central Government, State Governments and PSUs to the extent of 79% with the remaining 21% being envisaged to come from the private sector.

Key highlights of Union Budget

One of the major drivers of the EPC market in India is the infrastructure investment by the government of India. The Union Budget 2023-24 depicted higher focus on infrastructure development. The main thrust of capital expenditure is on defence, roads and railways.

Impact of Covid-19 pandemic

The GVA of construction segment has been witnessing slowdown since the start of FY20 due to factors such as general elections, extended monsoon. Slowdown got severe in March 2020 as a result of the restrictive measures and lockdowns imposed by the Government to contain the spread of the Covid-19 pandemic that led to a halt of economic activities and business operations. The onset of the Covid-19 pandemic in FY21 presented many challenges for the Engineering, Procurement and Construction (EPC) companies. Many projects got cancelled or delayed due to the uncertainty caused by the pandemic. There was delayed RFP response, logistical challenges due to nation-wide lockdown and supply-chain bottlenecks impacting procurement of goods and assets which in

turn impacted project execution. The most severe impact felt, however, was of the exodus of labour. The order book position of several EPC companies was affected due to the Covid-19 induced challenges which in turn impacted their revenue mainly during the first and second quarter of FY21. However, by the third quarter, the nation-wide lockdown was mostly lifted, the issues of raw material and labour shortages were resolved and business operations began to normalize.

India's economic recovery strengthened in the Q4FY21 before the onset of the second wave of pandemic. Construction segments benefited from the unlock process which gathered pace during the last two quarters. In FY21 Construction sector GVA fell by a sharp 7.3%. The growth was amplified in Q1FY22 because of a favourable base effect (low growth in Q4FY21) which aided the growth in the construction segments growing by 71.3% in Q1FY22 in contrast to a growth rate of 18.3% recorded during the previous quarter. Q2FY22 also witnessed a growth of 8.1%. Moreover, Q3FY22 witnessed a slowdown of 2.8% which later rebound to 2% increase. Overall, the growth in FY22 of 31% in FY22 can be attributed to lower base. The growth was also aided by resumption of economic activity. Q1FY23 registered growth of 33% whereas Q2FY23 registered growth of 15% with normalcy in business environment post pandemic.

Challenges faced by EPC companies

➤ Players are susceptible to changes in raw material prices

Raw material cost of different construction companies ranges in 30-50% of the total cost. Any variation in the prices of raw materials during the construction period of the project has a direct impact on total cost of the project. In FY22, the average price of domestic steel and cement increased by 45% and 8% respectively. Here, increased international steel prices led to significantly higher export volumes, which in turn led to an increase in domestic steel prices. Whereas, the rise in cement prices was primarily on account of rising input and fuel costs pressure due to geopolitical tensions. However, the price of steel has corrected in from H2FY23. The volatile commodity prices impacted margins of construction players in FY23, however, with the prices stabilising, it is expected that margins will recover over a period of time.

➤ **Time and cost overrun due to delay in getting clearances**

EPC sector has witnessed many consistent changes over the past few years. Delay in project completion is one of the major challenges for the EPC market in India. EPC projects are large scale, time and cost sensitive. The gestation period of project also increases because of factors such as political risks in the country, liquidity crunch, and delay in getting environmental clearance, forest clearance, defence land handovers etc. Time overrun and project inflationary cost escalations plague many large government-based projects. All projects have to be time bound to be profitable; however, the market still suffers from inherent delays owing to various reasons.

➤ **Highly competitive intensity**

The segment is highly fragmented with a large number of unorganized players. This leads to highly competitive intensity and affects the pricing power of the EPC players. Further, global players including Samsung and Bechtel and others have entered Indian markets thus bringing with them global project management experience. This has increased business competition as the capacity and expertise required by the local players must be on par with global standards. But it has also brought about collaboration of local players with global players to manage complex projects requiring global skills and best practices.

Outlook

The Construction sector was hit hard during the pandemic, because of the lockdown, labour migration leading to logistical challenges. However, the sector has witnessed a growth in FY22 and FY23, supported by unlock measures and significant infrastructure investments by the Government.

The industry has experienced a similar growth trajectory in the FY24, supported by a sustained focus on infrastructure investments in roads, railways, and airports, in addition to the expansion in real estate activity. According to CMIE, early indications from the real estate sector reveal a robust 23.5% year-on-year growth in sales revenues for the quarter ending December 2023. While operating expenses related to sales increased at a comparatively slower rate of 19.4%, the industry's most significant operating expense, categorized as other operating expenses, witnessed a notable rise of 75.3%. Consequently, the industry's operating profit saw a faster growth rate of 32.1% compared to sales. The operating profit margin expanded by 224 basis points, reaching 34.3%.

Over the long term, the outlook for construction sector is favourable supported by continued government spending on infrastructure. The Government has expanded the National Infrastructure Policy (NIP) during the Budget to 7,400 projects from 6,835 projects and announced plans for the National Monetization Pipeline and Development Finance Institution (DFI) to improve the financing of infrastructure projects. The NIP covers various sectors and regions indicating that it is relying on an 'infrastructure creation' led revival of the country's economy. The NIP covering rural and urban infrastructure entailed investments to the tune of ₹11,10,000 thousand lakhs will be undertaken by the central government, state governments and the private sector during FY20-25.

Road construction in India is expected to grow with new funding mechanisms by NHAI, such as ToT (Toll Operate Transfer) and InvITs (Infrastructure Investment Trust) and interest from international funds (both for equity as well as debt).

This has the potential for catapulting India to the third largest construction market globally. The sector is expected to contribute 15% to the Indian economy by 2030. The recent policy reforms such as the Real Estate Act, GST and REITs are steps to reduce approval delays and are only going to strengthen the real estate and construction sector.

Having established ourselves as an in-house construction company mainly dealing in promoter linked entities and group companies, we now procure work orders and construction contracts outside our group wide word of mouth and our reputation.

3. *Strong project management capacity and execution capabilities*

Our goal is to use our project management and execution capabilities to accomplish our projects on schedule while keeping high construction quality.

Over the years, we have procured a fleet of construction equipment to ensure high quality and timely execution of our projects. However, keeping in mind our objective of being an asset light company, for most of our construction equipment, the deployment of construction equipment is done vide third party vendors, which keeps our asset model light for project execution, thereby allowing us to maintain cost control and minimize disruptions due to non-availability or machinery breakdown.

Our Company places great emphasis on executing each project in strict compliance with the work description outlined in the contracts, while adhering to our high standards of construction quality. We achieve this by utilizing the expertise of our in-house engineering and design team, which possesses extensive knowledge and experience in various aspects of construction, including civil construction, electrical and mechanical work. Our team helps prepare detailed architectural and/or structural designs tailored to the specific requirements of our clients, thereby reducing our reliance on third-party consultants.

To ensure that our construction activities meet the required standards and comply with contractual obligations, we have designated quality system managers responsible for conducting regular inspections and tests at each project site.

5. ***Visible growth through increasing order book***

In the construction industry, an order book is considered as one of the key indicators of future performance as it represents a portion of anticipated future revenue and provides a brief list of projects undertaken and to be undertaken by the Company. Maintaining an order book helps our Company to evaluate and improve on the quality of projects undertaken by us. We aim to undertake projects with potentially higher margins and/or select projects that help us to enhance our reputation, market penetration and perception. The quality of our construction and the established relationships with our clients, has enabled us to build our order book.

OUR STRATEGIES:

1. *Thrust into the Construction and Development segment*

We are in the process of expanding our presence in the civil construction sector by expanding into development aspects as well. We believe that we can use the expertise and knowledge gained in the construction industry in our proposed thrust into the development aspects of the same. Further, we believe that our reputation would aid us in the development and marketing of residential and commercial projects. Further, our promoters are already procuring projects as developers and contracting the construction activities. We have been working on various projects with our promoters which has given us exposure to the roles and responsibilities of a developer and hence, utilising the same, we are keen to grow ourselves as the developer.

Our current order book contains two projects for construction and development which includes one residential project and one commercial project where we have entered into as the developers / joint developers.

2. *Increase our focus on and execute greater number of projects on a lock-and-key basis*

We term our projects, where we undertake building construction services, including MEP, finishing and interior services as “lock-and-key” projects. We have one lock-and-key project, where we are involved in all stages of construction of a building, from the foundation to the warm shell to the MEP, finishing and interiors. Provision of MEP, finishing and interior services are cost effective for our projects as they allow

us to spread our indirect costs. These cost efficiencies allow us to unlock greater revenues from each project and, therefore, the provision of such services, especially in lock-and-key projects, represent a significant value potential for us. We intend to seek a greater number of such lock-and-key projects, including contracts which we bid for in the near future and projects from our existing clientele. Though services as a component form a negligible component of our revenues from construction as on date, we perceive this as a growth area with higher profit margins and our endeavour is to provide more wholesome civil construction projects with lock and key, MEP and O&M services built into our scope.

3. *Continue focusing on timely completion:*

We intend to continue to focus on performance and project execution in order to maximize client satisfaction and profit margins. We also intend to integrate best practices from different sectors and geographic regions. We attempt to utilize designs, engineering and project management tools to increase productivity and maximize asset utilization in construction activities. We intend to continue to offer high quality engineering solutions to our clients to improve our ability to execute our projects with quality and efficiency.

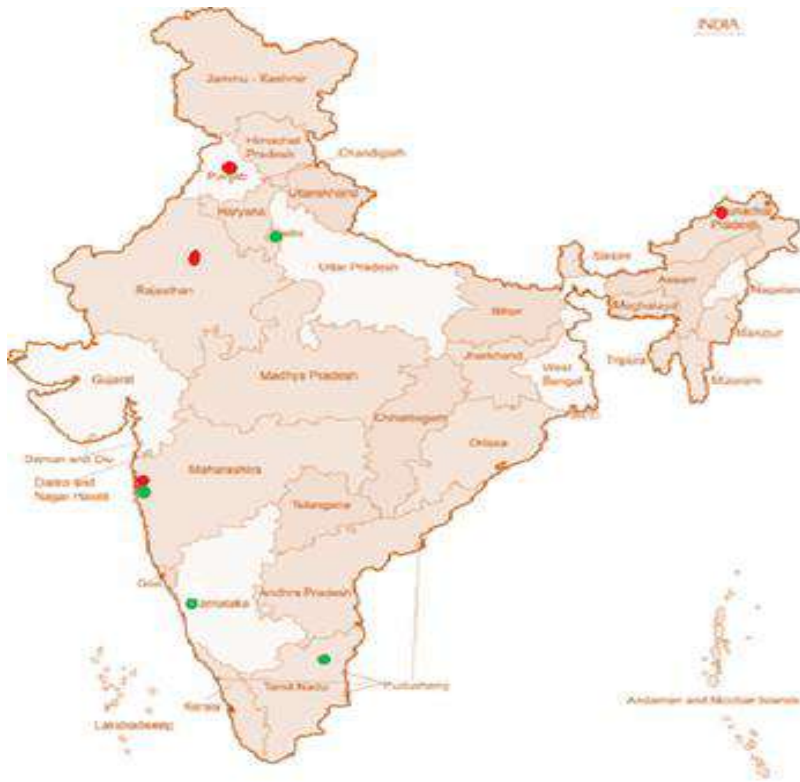

4. *Continue to maintain an asset light model for our business operations*

We believe in maintaining an asset light model for our civil construction business and rely mostly on third party subcontractors for equipment, material and labour. Since the location of our Projects are in different geographies, like MMR, Punjab, Karnataka, New Delhi, Tamil Nadu, Rajasthan and Arunachal Pradesh, it is difficult and unviable to mobilise heavy equipment and machinery from one place to another for execution of projects at such diverse locations. In addition to the difficulty in mobilisation of equipment and machinery, a large amount of capital is required to acquire construction equipment and machinery, which can otherwise be effectively and more profitably deployed. Though we have purchased certain machinery, which is project specific and deployed on sites, the bulk of our machinery is procured from third party vendors on a rental basis and we intend to continue this approach. Deployment of equipment and labour through third party contractors at these locations help us reduce fixed costs, make execution of construction projects cost efficient and increase margins. We intend to continue this asset light model in our business.

5. *Expand our geographical footprint*

We intend to expand our geographical footprint and grow our business throughout the Country. Initially, our projects were concentrated in the MMR region. Through an increasingly diversified portfolio, we have broadened our clientele base and hedge against risks in specific areas or projects and protect ourselves from fluctuations, resulting from business concentrations in limited geographical areas. Our construction activities now span across regions such as New Delhi, Rajasthan, Karnataka, Tamil Nadu, Amritsar, and Arunachal Pradesh.

- Ongoing/Upcoming - Rajasthan:1, Punjab:1, Arunachal Pradesh:1, MMR:9,
- Completed- Completed: MMR:5, Karnataka:1, Delhi: 2, Tamil Nadu:1

We believe that geographical diversification of our projects will reduce our reliance on any particular state and allow us to capitalize on opportunities in different states across the country. Further, we believe that as our Company's existing clientele continues to expand their geographical reach, our relationships will provide us with opportunities to undertake projects for such clientele across the country.

6. Expand our Construction activities across sectors

We intend to become a multidisciplinary construction company offering a diversified range of construction and allied services across various industries by constructing institutional, government, industrial and residential projects in India. We have experience of having completed projects in the hospitality and government sector. We intend to capitalise on this experience and expand our footprint in other sectors and industries as well in the future.

Our services also include O&M services and MEP services and finishing works as a part of our construction services.

Though historically we have been an in-house construction company for our group related entities, where our group entities and corporate Promoters bid for third party civil construction contracts (*private sector as well as where Government entities have a requirement where the bidding is as per publicly available tender documents and the Governments tendering process in certain cases*), we are directly venturing into contracts with unrelated third parties and we are taking on a larger role of a developer as is evidenced by to contracts in our order book. In several of our completed projects we were heavily dependent on our promoter group companies who bid on a competitive basis for government and private sector contracts of third parties either singly or in consortium with other entities. Upon our Promoter being selected as a concessionaire or the main contractor in these projects, we enter into construction contracts mostly on an EPC basis with our Promoter and this is the major source of our construction business. The business model of our Company in relation to our group entities and promoter related entities is that of our Group entities and bidding for third party contracts as per the bidding process as and where applicable or procuring third party civil construction contracts, where we are appointed as a contractor under an EPC contract basis.

Our Company was incorporated in 2010 primarily for the purpose of being an intra-group construction company. Our aim is to gradually increase our execution capabilities in terms of the size and number of Civil Construction projects across various sectors, namely, residential, residential cum commercial, infrastructural, industrial, commercial and hospitality. We also aim to procure larger contracts with other unrelated parties as developers and expand our client base. Along with our growing civil construction base, we intend to take on larger roles in the capacity of developers and we intend to commence such development mandates in due course.

We are currently engaged in civil construction of five (5) residential projects, two (2) commercial projects, one (1) industrial project and one (1) infrastructure. As on the date of filling Draft Red Herring Prospectus, our order book aggregates to ₹ 1,40,827.44 lakhs.

We are growing in a planned, holistic and responsible manner and our Company has received several accreditations. We are not developers or main concessionaires under government contracts or private constructions, and our contracts are with the overlying developers and concessionaires for completion of construction works. We specialize in undertaking construction of buildings, without engaging in any other activities such as land development or infrastructure development. We intend to offer more O&M, MEP and lock and key nature of construction services as a part of our growth strategy. Except for construction agreements for the project "Trinity Oasis" and residential project at Amritsar, Punjab (where our revenue model comprises of sale of residential units), our contracts are mostly in the nature of EPC contracts and have standard contractual risks associated with them, for more details see "**Risk Factor**" on page 33 of this Draft Red Herring Prospectus. Our revenue model under these contracts is based on clearing of running bills by our employer and release of retention money and we procure work and such contracts by virtue of our reputation and vide our sales and business development teams.

Our clients have the right to appropriate the retention money upon any default by us as per the terms and conditions of the EPC contract. However, the retention money can be replaced with an irrevocable and unconditional bank guarantee provided to our client. PROJECT CYCLE: CONSTRUCTION & DEVELOPMENT

Overview:

We procure civil construction projects mainly through our promoter related entities and group companies and referrals made by real estate developers, contractors, real estate consultants, real estate brokers and other intermediaries. As soon as a project is referred to us, we undertake an in-depth study of the proposed project, which, *inter alia*, includes, (i) study of technical requirements of the project; (ii) site visit to determine the site conditions; and (iii) local market survey to determine availability and prices of key construction material, labour, and specialist sub-contractors. The Developer then enters into a works order/agreement with us after all terms and conditions are negotiated and settled between the parties. Our Company receives contracts on the basis of the relationship of our management team in the construction industry. In recent times, real estate developers have started outsourcing or sub-contracting civil construction aspects of real estate projects to construction focused companies such as ours. This structure helps the developers in ensuring quality of construction, project funding and timely delivery of the project to the purchasers.

In civil construction projects, the client typically provides project plans, scope of the project and specifications, based on which, we must provide detailed project execution plans and costs. Therefore, our procurement

department ensures adequate and timely supply of the required materials at competitive prices during the tenure of the contract, which plays a very important role in overall execution of the civil construction works contract. On award of a contract, we provide the procurement department with the project details along with the budgeted rates for material, services and equipment. The material, services and equipment required for projects are estimated by the engineering personnel from the individual project sites and then passed on to the procurement department along with the schedule of requirements.

Upon execution of the contract, we begin mobilizing manpower and equipment resources and setting up of site offices, stores and other ancillary facilities. The construction activity typically commences once the client approves the working designs and issues drawings. The project team immediately identifies and works with the procurement department to procure the key construction materials and services required to commence construction. Based on the contract documents, a detailed schedule of the construction activities is prepared.

Each project site has a billing department that is responsible for preparing and dispatching periodic invoices to the clients. Joint measurements, with the client's representative, are taken on a periodic basis and interim invoices prepared on the basis of such measurements are sent to the client for certification and release of interim payments. The billing department is also responsible for certifying the bills prepared by our vendors and sub-contractors for particular projects and forwarding the same to our head office for further processing.

Upon completion of construction of a project, typically an independent engineer appointed for the project certifies the work completed and a completion certificate is issued by the client. The retention money, which is typically 5% of the contract value, is returned by the client upon completion of the defect liability period.

Given below is our project execution cycle:

I. Pre-Execution Stage

Our team keeps track of the contracts executed and identifies the projects suitable for our Company on the basis of project timelines, technical and financial parameters, estimation, scale of projects, etc.

Our team undertakes basic feasibility study on the basis of the estimated cost involved in projects and other resources required. On the basis of cost estimation, we identify the ideal quotation for the scope of work involved. Our Company also refers the specification, drawings and bills of quantities of the projects. We generally send our project survey team to identify the various aspects of the project at the given location and carry out basic feasibility survey / study so that estimation can be carried out based on actual site conditions/parameters. Any techno-commercial query(s) in the identified tender is communicated to client in or before the pre-bid meeting and client clarifies our queries before submission of our final bids.

After completion of all the above activities, our team facilitates the underlying client/ or the developer to submit the tender bid, as per the prescribed mode provided, within prescribed timeline. The client typically evaluates the technical bid or Pre-qualification application first, so as to ensure that further bids from only technically qualified bidders should be considered for further processing or financial evaluation. Thereafter, the project is awarded to the bidder who offers the lowest bid along with meeting with the stipulated techno-commercial criteria.

II. Execution Stage

After the award and acceptance of contract, our Company identifies and mobilizes the required project execution team, to look after the execution aspects of the project in the following manner:

Pre-Construction Stage

- **Design and Detailed Engineering**

Based on the detailed survey, the project is designed and detailed engineering is done for the entire activities for execution of work. The planning team carries out a feasibility study to assess the project's merits and evaluate the project's objectives. The study looks at things like construction costs, design, location, and the proposed building schedule. Thereafter, required documents are submitted to the client for approval and once the approval is received, procurement and construction activities commence.

- **In-depth review of the procedures required to be put in place in respect of the site activities**
- Further project manager carries out detailed review of the procedures required to be put in place for each activity considering inputs from the team and management. This micro-management helps in fixing any missing link in smooth project execution.
- **Health, Safety and Environmental (HSE) Plan**
- HSE encompasses a range of practices, policies, and regulations to minimize hazards, prevent accidents and injuries, and promote sustainable practices. HSE is vital for safeguarding the health and safety of individuals, protecting the environment, and maintaining sustainable operations across different sectors. The Company has detailed HSE Plan in place considering the prevailing industries policies in place.
- **Preparation of material take over required for the project, as per scope of supply.**
- The Project manager defines detailed BOQ of the project work based on the finalised design and scope of work of the contractor. Further detailed working is done for required material of the project.
- **Micro scheduling of construction activities**
- Construction schedule requires thorough planning and the right tools. Project manager uses Construction project management software that offers multiple project planning tools such as Gantt charts, kanban boards and project calendars, which help to map out project activities and create accurate construction schedules. It also offers real-time dashboards, workload charts and timesheets so we keep track of time and costs.
- **Approval of vendors for materials to be supplied**
- After completing micro scheduling of construction activities, vendors for material supply are finalised at best competitive prices and negotiated terms even considering least possible delivery schedule as well so that project execution can happen on time and without any hassles.

Upon completion of the project and processing of final bill, defect liability period commences as per the work order. The work completion certificate is issued by the client at the time of final bill and closure of the project. After completion of the defect liability period our retention money/ security deposit, if any, is released by the client.

Plant and Machinery

We use various machinery and equipment for our construction business. Some of the equipment owned and used by us are ready-mix concrete plants, transit mixers, dumpers, boom placers and various such construction machinery and equipment. Further, since the location of our upcoming projects are in different geographies like MMR, Arunachal Pradesh, Karnataka, Punjab and Rajasthan, it is difficult and unviable to mobilise heavy equipment and machinery from one place to another for execution of our Construction & Development projects. We therefor believe in having an asset light model and rely mostly on third party suppliers for supply of heavy construction equipment.

Procurement of Materials & Equipment

The principal raw materials used in our projects are steel, cement, stone, bricks, wood, aggregate, concrete, sand, sanitary and plumbing items and others. Since our construction Projects are situated in diverse geographies like MMR, Punjab, Rajasthan, Karnataka, New Delhi, Tamil Nadu and Arunachal Pradesh, it is difficult to procure raw material from a single supplier. We do not procure raw materials for our construction projects. We send requisition list to the employer and the obligation to procure raw materials is on the employer and implement our quality and procurement standards for such purchases.

Quality

Maintaining a high standard of quality in our projects is critical for continued growth. Ever since our inception, we have been laying paramount importance towards quality improvisation. We endeavor to ensure that we maintain stringent quality standards at all stages of our projects. Our aim is to reduce cost and bring in efficiency through effective and efficient use of resources. We have a team of engineers and professionals responsible for ensuring quality standards. In executing the projects, we monitor and test all materials for conformity, track non-conformities and make rectifications to ensure clients' satisfaction. We endeavor to be the customers' preferred choice in everything we do.

b. Power and Water Supply

We require water and continuous supply of water and electricity. With regard to our projects, the Developer of the project arranges the power and water supply requirements for use at the various construction sites.

Raw Materials and Suppliers

Our Company follows procurement system as intimated to us by developer for material purchases. We sub contract procurement of raw material and services to our underlying contractors vide work orders in line with the requirement of the services provided by us. In case of steel, cement and other higher value material requirements which are project specific, we generally give instructions depending on the project to the developers/ manufacturer/supplier/sub contractors (as per the scope of services mentioned in the work orders) to ensure cost effectiveness, availability and timely delivery of materials in order to meet project schedule. Project specific materials are generally sourced at a location nearest to the project site.

Also, upon completion of project any excess material is return back to the original source or sold as scrap if procured by us.

We utilize all the raw materials left upon project completion. In case if any material is left then we give it back to the supplier. At the conclusion of our projects on a case to case basis there are several scraps which need to be disposed off and these are sold by us on the project site itself to third parties. However, there are no underlying contractual arrangement for this and the excess material is sold off as scrap at scrap value. Further, in some of our contracts we are required to use the debris for land filling and land levelling as well.

Quality Control and Services

In the industry we serve, adherence to quality standards is a critical factor. In order to maintain the quality standards and comply with the design specifications provided by our clients and to ensure that our services successfully pass all validations and quality checks. We follow cube testing mechanism for quality control. Cube testing helps in verifying the compressive strength of concrete and ensuring construction project safety, quality, and reliability. Independent Auditor's Report to the Members of Garuda Construction and Engineering Limited (formerly known as Garuda Construction and Engineering Private Limited)

Report on the Financial Statements

Opinion

We have audited the accompanying financial statements of **Garuda Construction and Engineering Limited** (formerly known as Garuda Construction and Engineering Private Limited) ('the Company'), which comprise the Balance Sheet as at 30 November 2023, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 30 November 2023, and its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Responsibilities of Management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in

accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Standards of Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or area where assumptions and estimates are significant to these financial statements are disclosed in section 3 to the financial statements.

These financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities (including investments), defined benefit plans, plan assets and share-based payments.

All assets and liabilities have been classified as current and non-current as per the Group's normal operating cycle and other criteria set out in the Schedule III of the Act and Ind AS 1, Presentation of Financial Statements.

The Restated Financial Statements are presented in ₹ lakhs, except when otherwise indicated.

(b) Current and Non-Current Classification

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has

determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

(c) Property, Plant and Equipment

- i. All property, plant and equipment are stated at original cost of acquisition/installation (net of input credits availed) less accumulated depreciation and impairment loss, if any, except freehold land which is carried at cost. Cost includes cost of acquisition, construction and installation, taxes, duties, freight and other incidental expenses that are directly attributable to bringing the asset to its working condition for the intended use and estimated cost for decommissioning of an asset.
- ii. Subsequent expenditure is capitalised only if it is probable that the future economic benefit associated with the expenditure will flow to the Company.
- iii. Property, plant and equipment is derecognised from financial statements, either on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss in the period in which the property, plant and equipment is derecognised.
- iv. Depreciation on property, plant and equipment is provided on written down value method based on the useful life specified in Schedule II of the Companies Act, 2013.

(d) Inventories

Inventories of raw materials and stores and spare parts are valued at the lower of weighted average cost and the net realisable value after providing for obsolescence and other losses, where considered necessary.

Work-in-progress and finished goods are valued at lower of cost and net realisable value where cost is worked out on weighted average basis. Cost includes all charges in bringing the goods to the point of sale, including octroi and other levies, transit insurance and receiving charges alongwith appropriate proportion of overheads and, where applicable, excise duty.

Net realizable value represents the estimated selling price for inventories less estimated costs of completion and costs necessary to make the sale.

(e) Fair Value Measurement

The Company's accounting policies and disclosures require the measurement of fair values for financial instruments.

The Company has an established control framework with respect to the measurement of fair values. The management regularly reviews significant unobservable inputs and valuation adjustments.

All financial assets and financial liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable, or
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

(f) **Financial Instruments**

(i) **Financial Assets**

i. **Classification**

The Company classifies its financial assets either at Fair Value through Profit or Loss (FVTPL), Fair Value through Other Comprehensive Income (FVTOCI) or at amortised Cost, based on the Company's business model for managing the financial assets and their contractual cash flows.

ii. **Initial Recognition and Measurement**

The Company at initial recognition measures a financial asset at its fair value plus transaction costs that are directly attributable to its acquisition. However, transaction costs relating to financial assets designated at fair value through profit or loss (FVTPL) are expensed in the statement of profit and loss for the year.

iii. **Subsequent Measurement**

For the purpose of subsequent measurement, the financial asset are classified in four categories:

- a. Debt instrument at amortised cost
- b. Debt instrument at fair value through other comprehensive Income
- c. Debt instrument at fair value through profit or loss
- d. Equity investments

iv. **Debt Instruments**

• **Amortized Cost:**

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on such instruments is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is calculated using the effective interest rate method and is included under the head "Finance income".

• **Fair Value Through Other Comprehensive Income (FVTOCI):**

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVTOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in the statement of profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to statement of profit and loss. Interest income from these financial assets is calculated using the effective interest rate method and is included under the head "Finance income".

- **Fair Value Through Profit or Loss:**

Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income (FVTOCI) are measured at fair value through profit or loss. Gain and losses on fair value of such instruments are recognised in statement of profit and loss. Interest income from these financial assets is included in other income.

- v. **Impairment of Financial Assets**

The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortised cost and FVOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

- vi. **De-recognition of Financial Assets**

A financial asset is derecognised only when:

- The rights to receive cash flows from the financial asset have expired
- The Company has transferred substantially all the risks and rewards of the financial asset or
- The Company has neither transferred nor retained substantially all the risks and rewards of the financial asset, but has transferred control of the financial asset.

- (ii) **Financial Liabilities**

- i. **Classification**

The Company classifies all financial liabilities at amortised cost or fair value through profit or loss.

- ii. **Initial Recognition and Measurement**

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, deposits or as payables, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

- iii. **Subsequent Measurement**

The measurement of financial liabilities depends on their classification, as described below:

- (a) **Financial Liabilities at Fair Value Through Profit or Loss**

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the profit or loss.

- (b) **Loans, Borrowings and Deposits**

After initial recognition, loans, borrowings and deposits are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in the statement of profit and loss when the liabilities are derecognised as well as through the EIR amortization process. The EIR amortisation is included in finance costs in the statement of profit and loss.

(c) **Trade and Other Payables**

These amounts represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short-term maturity of these instruments.

iv. **De-Recognition of Financial Liabilities**

A financial liability is de-recognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

(g) **Cash and Cash Equivalents**

- i. Cash and cash equivalents in the balance sheet comprise cash at bank and on hand and short-term deposit with original maturity upto three months, which are subject to insignificant risk of changes in value.
- ii. For the purpose of presentation in the statement of cash flows, cash and cash equivalents consists of cash and short-term deposit, as defined above, net of outstanding bank overdraft as they are considered as an integral part of Company's cash management.

(h) **Revenue Recognition**

Pursuant to adoption of Ind AS 115, Revenue from contracts with customers are recognised when the control over the goods or services promised in the contract are transferred to the customer. The amount of revenue recognised depicts the transfer of promised goods and services to customers for an amount that reflects the consideration to which the Company is entitled to in exchange for the goods and services.

i. **Revenue from Engineering and Construction Services**

Revenue from Engineering and Construction Services, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognized as per the percentage-of-completion method. The percentage-of completion of a contract is determined by the proportion that contract costs incurred for work performed upto the reporting date bear to the estimated total contract costs. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved.

Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring good or service to a customer excluding amounts collected on behalf of a third party and is adjusted for variable considerations.

Contract revenue earned in excess of certification are classified as contract assets (which we refer as unbilled work-in-progress) while certification in excess of contract revenue are classified as contract liabilities (which we refer to as due to customer). Advance payments received from contractee for which no services are rendered are presented as 'Advance from contractee'.

Variations in contract work, claims and incentive payments are included in contract revenue only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur and are capable of being reliably measured.

Contract modifications are accounted for when additions, deletions or changes are approved either to the contract scope or contract price. The accounting for modifications of contracts involves assessing whether the services added to an existing contract are distinct and whether the pricing is at the standalone selling price. Services added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the standalone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the standalone selling price.

The Company presents revenues net of indirect taxes in its Statement of Profit and Loss.

Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in Statement of Profit and Loss immediately in the period in which such costs are incurred.

ii. Interest Income

Interest income on financial asset is accrued on a time proportion basis by reference to the principal amount outstanding and the applicable effective interest rate.

(i) Foreign Currency Transactions

Foreign currency transactions are recorded in the reporting currency (Indian rupee) by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency on the date of the transaction.

All monetary items denominated in foreign currency are converted into Indian rupees at the year-end exchange rate. The exchange differences arising on such conversion and on settlement of the transactions are recognised in the statement of profit and loss. Non-monetary items in terms of historical cost denominated in a foreign currency are reported using the exchange rate prevailing on the date of the transaction.

(j) Income Taxes

The income tax expenses comprises current and deferred tax. It is recognised in the statement of profit and loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current Tax:

The current tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period.

Deferred Tax:

Deferred tax is recognized in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amount used for taxation purposes.

Deferred tax assets are recognized for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized, such reductions are reversed when the probability of future taxable profits improves.

Unrecognized deferred tax assets are measured at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects at the reporting date to recover or settle the carrying amount of its assets and liabilities.

(k) Employee Benefits

i. Short-Term Benefits

Short-term employee benefits are recognized as an expense at the undiscounted amount in the statement of profit and loss for the year in which the related services are rendered.

ii. Defined Contribution Plans

Payments to defined contribution retirement benefit schemes are charged to the statement of profit and loss of the year when the contribution to the respective funds are due. There are no other obligations other than the contribution payable to the fund.

iii. Defined Benefit Plans

Defined benefits plans is recognized as an expense in the statement of profit and loss for the year in which the employee has rendered services. The expense is recognized at the present value of the amount payable determined using actuarial valuation techniques.

Re-measurement of the net defined benefit liability, which comprises of actuarial gains and losses, are recognized in other comprehensive income in the period in which they occur.

iv. Other Long-Term Employee Benefits

Other long-term benefits are recognized as an expense in the statement of profit and loss at the present value of the amounts payable determined using actuarial valuation techniques in the year in which the employee renders services. Re-measurements are recognized in the statement of profit and loss in the period in which they arise.

(l) Impairment of Non-Financial Assets

The carrying amounts of non-financial assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external Factors. An asset is treated as impaired

when the carrying amount exceeds its recoverable value. The recoverable amount is the greater of an asset's or cash generating unit's, net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to the present value using a pre-tax discount rate that reflects current market assessment of the time value of money and risks specific to the assets. An impairment loss is charged to the statement of profit and loss in the year in which an asset is identified as impaired. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life. The impairment loss recognized in prior accounting periods is reversed by crediting the statement of profit and loss if there has been a change in the estimate of recoverable amount.

(m) Earnings Per Share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares except when the results would be anti-dilutive.

(n) Provisions, Contingent Liabilities and Contingent Assets

- i. Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognised for future operating losses. Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period.
- ii. Provisions (excluding retirement benefits) are discounted using pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.
- iii. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non- occurrence of one or more uncertain future events beyond the control of the company. The Company does not recognize a contingent liability but discloses its existence in the financial statements.
- iv. Contingent assets are not recognized, but disclosed in the financial statements where an inflow of economic benefit is probable.

(o) Warranties

Provisions for service warranties and returns are recognised when the Company has a present or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably measured.

(p) Borrowing Cost

Borrowing costs consist of interest, ancillary and other costs that the Company incurs in connection with the borrowing of funds and interest relating to other financial liabilities. Borrowing costs also include exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are

capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

(q) Leases

The Company assesses whether a contract is or contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- i. the contract involves the use of an identified asset
- ii. the Company has substantially all of the economic benefits from use of the asset through the period of the lease and
- iii. the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognises a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short term leases) and leases of low value assets. For these short term and leases of low value assets, the Company recognizes the lease payments as an operating expense on a straight line basis over the term of the lease.

3.

i. Significant Accounting Judgements, Estimates and Assumptions

The preparation of the Company's financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Revisions to accounting estimates are recognised in the period in which the estimate is revised.

a. Fair Value Measurement of Financial Instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

b. Taxes

The Company periodically assesses its liabilities and contingencies related to income taxes for all years open to scrutiny based on latest information available. For matters where it is probable that an adjustment will be made, the Company records its best estimates of the tax liability in the current tax provision. The Management believes that they have adequately provided for the probable outcome of these matters.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits.

c. Recognition and Measurement of Defined Benefit Obligations

The obligation arising from defined benefit plan is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and attrition rate. The discount rate is determined by reference to market yields at the end of the reporting period on government securities.

ii. Standards Issued but not Yet Effective

On March 23, 2023, the Ministry of Corporate Affairs (MCA) has notified Companies (Indian Accounting Standards) Amendment Rules, 2023. This notification has resulted into amendments in the following existing accounting standards which are applicable to company from April 1, 2023.

"The fair value of the financial assets are included at amounts at which the instruments could be exchanged in a current transaction between willing parties other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair value:

- Fair value of cash and short term deposits, trade and other short term receivables, trade payables, other current liabilities, approximate their carrying amounts largely due to the short-term maturities of these instruments.

- b. Financial instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for the expected losses of these receivables.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Our Company’s Board of Directors has overall responsibility for the establishment and oversight of the Company and its Subsidiaries (“**Group**”) risk management framework. The Board of Directors is responsible for developing and monitoring the Group’s risk management policies. The Group’s risk management policies are established to identify and analyse the risk faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group’s activities. The Company’s Board of Directors oversees how management monitors compliance with the Group’s risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Board of Directors is assisted in its oversight role by internal audit team. Internal audit team undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Board of Directors.

Market Risk

Market risk is the risk that the changes in market prices such as foreign exchange rates, interest rates and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The pre dominant currency of the Group's revenue and operating cash flows is Indian Rupees (INR). There is no foreign currency risk as there is no outstanding foreign currency exposure at the year end.

Interest Rate Risk

The Group has taken term loans and working capital loans from bank and financial institutions. The Group does not expose to the risk of changes in market interest rates as Group's long and short term debt obligations are of fixed interest rate. Therefore, there are no interest rate risks, since neither the carrying amount nor the future cash flows will fluctuate because of change in market interest rates.

Credit Risk

Credit risk arises from the possibility that customers or counterparty to financial instruments may not be able to meet their obligations. To manage this, the Group periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, analysis of historical bad debts and ageing of accounts receivable. Credit risks arises from cash and cash equivalents, deposits with banks, financial institutions and others, as well as credit exposures to customers, including outstanding receivables.

The Group has entered into contracts for the sale of residential units on structured instalment basis. The instalments are specified in the contracts. The Group is exposed to credit risk in respect of instalments due. Generally, the legal ownership of residential units is transferred to the buyer only after all/ significant instalments are recovered. In addition, instalment dues are monitored on an ongoing basis with the result that the Group's exposure to credit risk is not significant. The Group evaluates the concentration of risk with respect to trade receivables as low, as none of its customers constitutes significant portions of trade receivables as at the year end.

The Group considers factors such as track record, size of institutions, market reputation and service standards to select banks with which balances and deposits are maintained. the balances and fixed deposits are generally maintained with the banks with whom the Group has regular transactions. Further, the Group does not maintain significant cash in hand other than those required for its day to day operations. Considering the same, the Group is not exposed to expected credit loss of cash and cash equivalent and bank balances.

Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to Group's reputation.

Management of the Company monitors rolling forecasts of the Group's liquidity position and cash and cash equivalents on the basis of expected cash flows to ensure it has sufficient cash to meet operational needs. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance and compliance with internal statement of financial position ratio targets.

Capital risk management:

The Group manages its capital to ensure that it will be able to continue as a going concern so, that they can continue to provide returns to shareholders and benefits for other stakeholders and maintain an optimal capital structure to reduce cost of capital. The Group manages its capital structure and make adjustments to, in light of changes in economic conditions, and the risk characteristics of underlying assets. In order to achieve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the borrowings that define the capital structure requirements.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. The ratio is calculated as net debt divided by equity. Net debt is calculated as total borrowing (including current and non-current) as shown in the balance sheet.

Asset Reconstruction Company (India) Limited vs. Punjab National Bank and ORS.

Asset Reconstruction Company (India) Limited ("**Petitioner**") has filed a writ petition bearing no. 763 of 2020 ("**Writ Petition**") in the Hon'ble High Court of Judicature at Bombay (the "**Hon'ble High Court**"). P. K. Hospitality Services Private Limited is Respondent No. 2. Our Promoter, PKH Ventures Limited was originally incorporated as 'P. K. Hospitality Services Private Limited'. Our Promoter had purchased property in Village Waliv, Taluka Vasai, District Palghar, bearing survey no. 44, hissa nos. 5/1 and 10/1, admeasuring 31 gunthas and 6.5 gunthas of land by executing a deed of conveyance dated September 22, 2009 from Bhavik Township and Infra Private Limited. Before executing the deed of conveyance, the requisite search was taken before the registry and a public notice was issued inviting objections. No objection was received and the said deed of conveyance was registered in the office of Registrar. However, the said property was allegedly subject to a mortgage and ongoing litigation of which our Promoter was unaware of, and to which the Petitioner was a party. In the present Writ Petition, the Petitioner has prayed for quashing and setting aside the order dated November 6, 2019 passed by the Hon'ble Debt Recovery Appellate Tribunal, Mumbai. The said order had cancelled the priority of charge of the Petitioner over the said property. The matter was last heard on April 26, 2023 and is presently pending and the next date of hearing is not assigned by the Hon'ble High Court.

1. **Criminal proceedings**

P. K. Hospitality Services Private Limited vs. Chander Amolakram Tara and Ors.

Our Promoter, PKH Ventures Limited was originally incorporated as 'P. K. Hospitality Services Private Limited'. Our Promoter ("**Complainant**") filed a Regular Criminal Case bearing number 439 of 2015 ("**Complaint**"), before the Hon'ble Court of Civil Judge (Junior Division), Vasai ("Court") against Chander Amolakram Tara ("**Accused No. 1**"), Bhikamchand Bhawarlal Sisodia ("**Accused No. 2**"), Dinesh Salakchand Gupta ("**Accused No. 3**") and Sub-Registrar of Assurance, Vasai ("**Accused No. 4**"), (collectively, "**Accused**"). The Complaint has been filed under Section 190 read with Section 200 of Code of Criminal Procedure, 1973 for commission of offences under Sections 405, 415, 418, 420, 423, 424, 464, 468, 469, 470, 471, 474 of Indian Penal Code, 1860. The Complainant had appointed Accused No. 1 as its constituted attorney by executing a power of attorney on September 22, 2009 which is duly registered with the sub-registrar of assurances. The Complainant had purchased land having Survey No. 39, Hissa No. 5, admeasuring 8730 sq. meters in Village Mauje Vailv, Taluka Bassein, Thane District from Bhavik Township & Infrastructure Pvt. Ltd. The Complainant executed a Power of Attorney in favour of Accused No. 1, permitting him to only construct and sell building no. 2 admeasuring 761.80 sq. m. on the land bought by the Complainant, as sanctioned by CIDCO as per the revised development permission dated June 16, 2009 and no power for sale of any part or parcel of the land was given to the Accused No. 1 in the said Power of Attorney. The terms of the power of attorney mandated that the transaction entered into pursuant to the said power of attorney would be in the name of the constituted attorney only and not in the name of the Complainant. Thereafter, Accused No. 1 carried out illegal construction on the said land. Thereafter, the Complainant terminated the said power of attorney on January 13, 2011 and issued public notice of the same. In April 2012, the Complainant came to know that Accused No. 1 and Accused No. 2 had executed an illegal Deed of Conveyance and illegal Deed of Confirmation whereby he had allegedly transferred building no. 2 and also the land on which building no. 2 stood to Accused No. 3 by using a substituted and illegal Power of Attorney. The Complaint is filed

against the misuse of power of attorney issued by the Complainant to Accused No. 1 and the collusive acts of Accused No. 2 and Accused No. 3 along with Accused No. 1 in executing and using forged and illegal documents in an attempt to transfer the property owned by the Complainant in favour of Accused No. 3. The Complaint is pending before the Court and the matter shall be next heard on June 25, 2024.

In furtherance of this our Promoter, P. K. Hospitality Services Private Limited also filed a regular civil suit bearing no. 972 of 2012 before the Hon'ble Court of Civil Judge (Junior Division), Vasai against the Accused No. 1, Accused No. 2, and Accused No. 3.

P. K. Hospitality Services Private Limited vs. National Highways Authority of India

Our Promoter, PKH Ventures Limited was originally incorporated as 'P. K. Hospitality Services Private Limited'. P.K. Hospitality Services Private Limited ("**Plaintiff**") filed a Commercial Suit No. 549 of 2020 ("**Suit**"), before the Hon'ble High Court of Delhi at New Delhi (the "**Hon'ble High Court**") against National Highways Authority of India ("**Defendant**") for the recovery of an outstanding amount of ₹ 10,46,07,379/-. Plaintiff was awarded a tender for collection of tolls at Dankuni Toll Plaza for three months. Plaintiff deposited ₹ 13,81,50,000/- as security with Defendant. After the three-month duration was over, the contract came to an end. However, the Defendant did not release the said security amount even though the same was stated in their agreement. Due to the lockdown, the Plaintiff continued to operate the toll at the request of Defendant. Thereafter, the Defendant made demands for daily remittance amount without there being an agreement for continuing toll collection by the Plaintiff. The Defendant also illegally adjusted the security deposit amount against non-existent dues. The matter shall be next heard on July 22, 2024.

The Plaintiff No. 1 is a major shareholder and the promoter of Plaintiff No. 2 and the Plaintiff No. 2 sought to raise funds through an initial public offering ("**IPO**"). On March 23, 2022, a draft red herring prospectus dated March 22, 2022 ("**DRHP**"), was filed by the Defendant No. 4. Thereafter, the Plaintiff No. 2 applied for an in-principle approval from Defendant No. 5 and Defendant No. 6 seeking permission to list its equity shares for trading. Plaintiff No. 1 offered to sell up to 73,73,600 equity shares and Plaintiff No. 2 offered to issue up to 1,82,58,400 fresh equity shares. Thus, a total of 2,56,32,000 equity shares were being offered under the IPO. As per the market practice, the DRHP did not specify the portion of the offer which was to be reserved for allocation to qualified institutional buyers ("**QIBs**"). It was the role and responsibility of the Defendant No. 4 to engage with market participants for the purpose of determining and obtaining firm commitments from QIBs in order to determine how much of the offer could be reserved for allocation to that category of Investors. The Defendant No. 1 confirmed its participation to the extent of ₹ 120 Crores vide email dated June 5, 2023. The Defendant No. 2 communicated its commitment to participate in the IPO to the extent of ₹ 60 Crores vide letter dated June 8, 2023. The Defendant No. 3 also confirmed its participation in the IPO to the extent of ₹ 30 Crores vide an email dated June 19, 2023. The Plaintiffs received firm commitments from Defendant Nos. 1 to 3 amounting to ₹ 210 Crores. The total size of the offer being made by the Plaintiffs was around ₹ 379 Crores; and Defendant Nos. 1 to 3 had committed and agreed to subscribe to more than 50% of the total offer. The Plaintiffs filed red herring prospectus on June 21, 2023, and a total of 1,28,16,000 equity shares out of the total offer of 2,56,32,000 equity shares (i.e., 50%) were reserved for allocation to bidders falling within the category of QIBs. The offer opened on June 30, 2023 and was scheduled to close on July 4, 2023. Throughout this time, Defendant Nos. 1 to 3 did not send any communication to either Plaintiffs or Defendant No. 4 informing them that they would be withdrawing their commitment. Till date, Defendant Nos. 1 to 3 have not rescinded their firm commitments. The Plaintiffs have been aggrieved by the breach committed by the Defendant Nos. 1 to 3 in not abiding by their commitments to subscribe to the "institutional investor" portion of the IPO. The Plaintiffs have prayed before the Court to order and decree that the Defendant Nos. 1 to 3 be jointly and severally be liable to pay damages of ₹ 1,13,68,768/- along with further interest @ 24% on that amount from the July 6, 2023, till the date of actual payment to the Non-Institutional and Retail Investors, to order and decree that the Defendant Nos. 1 to 3 be jointly and severally liable to compensate the Plaintiff No. 2 an amount of ₹ 18,63,54,826/- being the loss occasioned due to their breach and to order and decree that the Defendant Nos. 1 to 3 be jointly and severally be liable to pay damages to the Plaintiffs an amount of ₹ 100 Crores being the loss of reputation and opportunity loss to the Plaintiffs due to their breach. Pravinkumar Bijendra Agarwal, Virendra Mahendra Agarwal and Rohit Harishchandar Churi vs. State of Maharashtra and Bhojraj Lalchand Navani

Our Director, Mr. Pravinkumar Agarwal and two others filed a Criminal Writ Petition no. 4217 of 2022 before the Hon'ble High Court at Bombay ("**Hon'ble High Court**") to quash FIR No. 415 of 2022 which is registered with the Vanrai Police Station. The said FIR was lodged at the instance of Mr. Bhojraj Lalchand Navani, who is the designated partner of Bror Lifestyle LLP. Mr. Pravinkumar Agarwal is the promoter of Kwality Marbles and Handicrafts (India) Private Limited. Kwality Marbles and Handicrafts (India) Private Limited is the owner of a shop premise in Hub Mall, Goregaon. The Company ("**Licensor**") entered into a leave and license agreement ("**Agreement**") with Bror Lifestyle LLP ("**Licensee**") on August 21, 2020 for period from August 1, 2020 to July 31, 2025 for a monthly license fee of ₹ 2,70,000/- along with one-time payment of interest free security deposit of ₹ 16,20,000/-. The Agreement stipulated the terms of payment and also the rights of the parties in the event of any breach of any of the terms of the Agreement.. On July 22, 2023, Mr. Navani emailed Mr. Pravinkumar Agarwal and Mr. Virendra Agarwal intimating that the Licensee had without notice or intimation vacated the premises and to treat the email as a deemed hand over of the premises with immediate effect, without clearing their dues towards license fee. The Licensee, through Mr. Navani had issued postdated cheques towards License Fees, however, upon presentation on August 26, 2021, all cheques were dishonoured. On September 17, 2021, Licensor sent demand notice for the same. Thereafter, the Licensor filed civil proceedings through L.C. Suit bearing number 89 of 2022 before the Hon'ble Court of Small Causes, Bandra on May 27, 2022, against the Licensee for recovery of the outstanding amount of ₹ 16,10,199/- along with interest. However, even after admittedly handing over the Licensed Premises to the Licensor through email, the Licensee tried to break into the Licensed Premises and concocted a false and fraudulent story of locks being changed by the Licensor illegally, in order to dispose off the Licensee from the premises and filed an impugned FIR through Mr. Navani against Mr. Pravinkumar Agarwal and others. Mr. Pravinkumar Agarwal and others therefore filed A.B.A 1498 of 2022 before the Hon'ble Court of Session for Greater Bombay at Dindoshi, Goregaon and vide order dated September 22, 2022 anticipatory bail was granted. Mr. Pravinkumar Agarwal and others stated that the dispute is of civil nature, therefore, this Criminal Writ Petition was filed for quashing the Impugned FIR and an order dated October 21, 2022 was passed by the Court stating that the chargesheet shall not be filed without leave of the Hon'ble High Court. The matter was last heard on March 27, 2023 and is presently pending and the next date of hearing is not assigned by the Hon'ble High Court.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of *inter alia*, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs and later, all UPI Bidders, through the Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: In this phase, the time duration from public issue closure to listing would be reduced to three Working Days. Phase III shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 500,000, shall use UPI. Individual investors bidding under the Non-Institutional Portion bidding for more than ₹ 200,000 and up to ₹ 500,000, using the UPI Mechanism, shall provide their UPI ID in the Bid-cum-Application Form for Bidding through Syndicate, sub-syndicate members, Registered Brokers, RTAs or CDPs, or online using the facility of linked online trading, demat and bank account (3 in 1 type accounts), provided by certain brokers.

Phase III: In this phase, the time duration from public issue closure to listing would be reduced to three Working Days. Phase III shall be made applicable in two phases i.e. (i) voluntary for all public issues opening on or after September 1, 2023; and (ii) mandatory on or after December 1, 2023. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated April 20, 2022 (the "**UPI Streamlining Circular**"), SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Streamlining Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer Lead Manager will be required to compensate the concerned investor.

The Offer will be made under UPI Phase II of the UPI Circular, unless UPI Phase III of the UPI Circular becomes effective and applicable on or prior to the Bid/Offer Opening Date. If the Offer is made under UPI Phase III of the UPI Circular, the same will be advertised in [●] editions of [●], an English national daily newspaper, [●] editions of [●], a Hindi national daily newspaper, and [●] edition of [●], the Marathi daily newspaper the Marathi daily newspaper (Marathi being the regional language of Mumbai, Maharashtra, where our Registered Office is located), each with wide circulation on or prior to the Bid/Offer Opening Date and such advertisement shall also be made available to the Stock Exchanges for the purpose of uploading on their websites..
