SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

INDIAN ECONOMIC OUTLOOK

Resilience to External Shocks remains Critical for Near-Term Outlook

India’s real GDP grew by 7.0% in FY23 and stood at ~Rs. 161 trillion, as per the First Revised Estimate, despite the pandemic in previous years and geopolitical Russia-Ukraine spillovers. In Q1FY24, the economic growth accelerated to 8.2%. The manufacturing sector maintained an encouraging pace of growth, given the favorable demand conditions and lower input prices. The growth was supplemented by a supportive base alongside robust services and construction activities. This momentum remained in the range in the Q2FY24 with GDP growth at 8.1%, mainly supported by acceleration in

investments. However, private consumption growth was muted due to weak rural demand and some moderation in urban demand amid elevated inflationary pressures in Q2FY24. The GDP growth number improved for Q3FY24 at 8.6%.

India's GDP at constant prices surged to Rs. 47.24 trillion in Q4FY24 from Rs. 43.84 trillion in Q4FY23, marking a 7.8% growth rate. This upswing was fueled by robust performances in construction, mining & quarrying, utility services, and manufacturing sectors and investment drove the GDP growth, while both private and government consumption remained subdued.

GDP Growth Outlook

- Driven by fixed investment and improving global environment, domestic economic activity continues to expand. The provisional estimates (SAE) placed real GDP growth at 8.2% for FY24.
- Industrial activity led by manufacturing continues its momentum on the back of strengthening domestic demand. The eight core industries also show healthy growth. Moreover, services sector shows exhibit broad based buoyancy. The purchasing managers' index for both manufacturing and services continues to exhibit a sustained and healthy expansion.
- The outlook for agriculture and rural activity appears bright owing to good rabi wheat crop and expected improvements in kharif crop due to expected normal south-west monsoon. This combined with increasing rural demand on the back of improving farm activity, improvement in informal activity, improving employment condition, and alleviating inflationary pressures are expected to boost private investment. Additionally, consumption is expected to support economic growth in FY25 owing to strengthening rural demand.
- Investment activity is also expected to be further supported by sustained and robust government spending, strong financial positions of banks and corporations, increasing capacity utilization, and rising business confidence as indicated by surveys. Additionally, improving global economic growth and trade prospects are expected to boost external demand for goods and services.

AIF INDUSTRY

Alternative Investment Funds are governed and regulated by the SEBI. According to the SEBI (Alternative Investment Funds) Regulation, 2012, AIFs are defined as a privately held and managed pool of investment fund of either domestic or foreign origin, organized in the form of a body corporate, company, LLP (limited liability partnership), or a trust. Alternative Investment Fund or AIF means any fund established or incorporated in India which is a privately pooled investment vehicle which collects funds from sophisticated investors, whether Indian or foreign, for investing it in accordance with a defined investment policy for the benefit of its investors. AIF does not include funds covered under the SEBI (Mutual Funds) Regulations, 1996, SEBI (Collective Investment Schemes) Regulations, 1999 or any other regulations of the Board to regulate fund management activities. Further, certain exemptions from registration are provided under the AIF Regulations to family trusts set up for the benefit of 'relatives' as defined under Companies Act, 1956, employee welfare trusts or gratuity trusts set up for the benefit of employees, 'holding companies' within the meaning of Section 4 of the Companies Act, 1956 etc.

Types of AIFs

Funds can seek registration under three categories – Category I, Category II and Category III.

Category I – In this category the focus is to mainly invests in start-ups, SME's or any other sector which the Government considers economically and socially viable

Category II – Category II includes AIFs such as private equity funds or debt funds for which no specific incentives or concessions are given by the Government or any other Regulator

Category III – AIFs such as hedge funds or funds which trade with a view to make short term returns or such other funds which are open ended and for which no specific incentives or concessions are given by the Government or any other Regulator

As of 31st December,2023 AIFs have received commitments worth 10,84,875 crores. Of these commitments received, around 40% funds have been raised and of these funds raised around 93% investments have been made.

REAL ESTATE REMAINS THE LEADING SECTOR TO RECEIVE FUNDING IN AIF

The financing gap that had long plagued the Indian real estate industry had limited its ability to grow. Nonetheless, Real Estate Alternative Investment Funds (AIFs) have become a game-changer and revolutionized the market in recent years. SEBI-regulated investment vehicles known as real estate-focused AIFs combine investors capital and allocate it mostly to Indian real estate assets, providing a great opportunity for investors and developers. It can be noted that in the past 3 years, real estate has been the most preferred sector across AIFs to invest in. Between FY21 and FY23, deployment of funds was maximum in real estate sector.

The Indian real estate industry, was facing a significant funding shortfall that had hindered project launch and execution and sector growth. Real estate AIFs have become a dependable source of funding, giving developers access to much needed capital.

Due to introduction of the real estate AIFs, the developers can fund their projects without depending just on conventional financing sources like bank loans or private equity. This funding source enables developers to create premium real estate assets, purchase land parcels and fasten project execution. Real estate AIFs are a desirable option for project financing since they provide developers with a number of advantages. First of all, these funds provide developers adaptable financing choices that may be customized to fit their unique needs. Developers can access funds at different stages of project development, from purchase to last-mile completion, thanks to Real Estate AIFs' customized structure. The engagement of proficient fund managers facilitates developers in project management optimization, operational efficiency enhancement, and regulatory complexity navigation. Real Estate AIFs also make it easier for developers to work together, which promotes knowledge exchange and industry synergies.

The assets under management of the Indian real estate market based on the top 5 players is around Rs 20,916 crores as of FY24. Such funds provide a higher return as well as offer diversification across developers and projects.

SECTION III - RISK FACTOR

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “Restated Financial Information of the Company” and the related notes, “Business Overview” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page 178, 121 and 180 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors whose potential effects are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer, including the merits and the risks involved. You should not invest in this Offer unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

- 1. Some events may not be material individually but may be found material collectively.*
- 2. Some events may have material impact qualitatively instead of quantitatively.*
- 3. Some events may not be material at present but may be having material impact in future.*

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “Risk Factors” on page 25 and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 180 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “Restated Financial Statements”.

INTERNAL RISK FACTORS

- 1. Our Company, Promoters, Directors, and our Subsidiaries are a party to certain litigation and/or claims. Any adverse decision may make our Company liable to liabilities/penalties and may adversely affect our reputation, business, and financial status. A classification of these legal and other proceedings is given below.***

Our Company, and our Subsidiaries are currently involved in legal proceedings in India which are pending at different levels of adjudication before the concerned authority. While we do not expect them to have any material impact on our business and financial condition, we cannot assure you that these proceedings will be decided in favour of our Company and our subsidiaries. Any adverse decision in such proceedings may render us liable to penalties and may have a material adverse effect on the financials and reputation of our Company, subsidiaries and its directors, which may in turn have an adverse effect on our business. Additionally, during the course of our business we are subject to risk of litigation in relation to contractual obligations, employment and labour law related, personal injury, damage to property, etc.

A classification of these outstanding proceedings is given in the following table:

*The amount of ₹ 7444.12 lakhs is from a contest suit filed against an arbitral award in favour of the Beacon Trusteeship Limited (Debenture Trustee) and Nisus Finance & Investment Managers LLP (acting in its fiduciary capacity as a Facility Agent) representing interest of the debenture holders. The amount is not a claim amount against the subsidiary.

**Out of the total amount of ₹ 14206.62 lakhs ₹ 7444.12 lakhs is the arbitral award as mentioned above is in favour of the Beacon Trusteeship Limited (Debenture Trustee) and Nisus Finance & Investment Managers LLP acting in its fiduciary capacity as a Facility Agent representing interest of the debenture holders.

2. We are dependent on and derive a substantial portion of our revenue from certain key customers and investors in our funds managed by our subsidiaries that may expose us to liquidity risks, which may adversely affect our business volume, results of operations and financial condition.

We are largely dependent on a finite set of customers and investors in our funds which govern out of AUM size for the fund business. Top ten customers of our company excluding Interest income on investment (i.e. NCD, F.D.) and Short-Term Capital Gain on sale of NCD for the period ended January 31, 2024, for the FY2022-23, FY2021-22 and FY 2020-21 contributed for 82.35%, 53.96%, 84.94% and 78.96% respectively of our Revenue from Operation. Our business operations are highly dependent on our certain key investors and the loss of any of our key investor may adversely affect our sales and consequently our business. While we typically have long term relationships with our investors, we have not entered into long term agreements with our investors and the success of our business is accordingly significantly dependent on us maintaining good relationships with our investors. The loss of one or more of these significant or key investors or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant investors or that we will be able to significantly reduce investors' concentration in the future. Any decline in our quality standards, growing competition and any change in the demand, may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, and the loss of business from one or more of them may adversely affect our revenues and results of operations.

However, the composition and revenue generated from these Investors might change, as we continue to add new investors in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new Investors, there can be no assurance that we will be able to maintain long term relationships with such Investors or find new Investors in time.

3. *The financing industry is becoming increasingly competitive, which may create significant pricing pressures for us to retain existing customers and solicit new business. Our growth will depend on our ability to compete effectively in this environment.*

Our business operates in a competitive market and we face competition from other players in the financing industry. Many of our competitors are large institutions, which may have a larger customer base, funding sources, branch networks and capital base compared to us. Some of our competitors may be more flexible and better positioned to take advantage of market opportunities. This competition is likely to further intensify as a result of securitization and regulatory changes. Our future success will depend, to a certain extent, on our ability to respond in a timely and effective manner to these competitive pressures.

Our NBFC credit business competes based on a number of factors, including cost effective sources of funding, Loans are becoming increasingly securitized and terms such as variable (or floating) rate interest options, lower processing fees and monthly reset periods are becoming increasingly common in the Indian financial sector, thereby increasing competition.

If we are unable to effectively respond to these various competitive pressures, it could result in a decrease of market share, decrease in our fees (fund business), decrease in our spreads (NBFC business), reduced customer base, increase in pricing of our products, increase in operating expenses, as well as higher attrition rates among management and sales staff, lower growth rates, or even monetary losses, which could have material adverse effect on our business, results of operations, cash flows and financial condition

4. *We have grown in the past but there can be no assurance that our growth will continue at a similar rate or that we will be able to manage our rapid growth. If we are unable to implement or sustain our growth strategy effectively it could adversely affect our business, results of operations, cash flows and financial conditions.*

Our consolidated profit for the period/year ₹ 1,687.96 lakhs for the ten months period ended January 31, 2024 and ₹ 299.83 lakhs for fiscal 2023. If we are unable to implement or sustain our growth strategy effectively it could adversely affect our business, results of operations, cash flows and financial condition.

Our Growth Strategy includes growing our Fund and Asset Management (Real Asset and Urban Infrastructure), Transaction Advisory and Non-Banking Financial segment (SME Segment). A component of our strategy is to continue diversifying the development of our new portfolio of products to suit our fund investor's appetite and customers' needs and increase the scale of our business. This growth strategy will place significant demands on our management, financial and other resources and will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment as well as developing and improving our internal administrative infrastructure.

Our ability to sustain our rate of growth also depends, to a large extent, upon our ability to recruit trained and efficient personnel, retain key managerial personnel, maintain effective risk management policies, continue to offer products, which are relevant to our target base of clients, develop managerial experience to address emerging challenges and ensure a high standard of client service. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rate, a need to hire additional employees, erosion in the quality of customer service, a diversion of the management's resources, an increase in our exposure to high-risk credit and an increase in costs for us. If we grow our credit book and investments too rapidly or fail to make proper assessments of credit risks associated with new borrowers and investees, a higher percentage of our loans and investments may become non-performing, which would have a negative impact on the quality of our assets and our financial condition. If we are unable to manage such growth it could disrupt our business prospects, impact our financial condition and adversely affect our results of operations, cash flows and financial condition.

Our rapid growth has placed and will continue to place significant demands on our operational, credit, financial and other internal risk controls, including:

- preserving our asset quality as our geographical presence increases and our borrower and investee profile changes;
- developing and improving our products and delivery channels;
- recruiting, training and retaining sufficient skilled personnel;

- upgrading, expanding and securing our technology platform;
- growth of our newly set up businesses;
- complying with regulatory requirements, including KYC norms and other regulations; and
- maintaining high levels of customer satisfaction.

If we are not successful in implementing or executing these operational measures and risk controls, we may not be able to expand our business as we have in the past, and our growth rate may decline. We may not be able to manage our new operations effectively or efficiently, which would mean that our operations would suffer, and our performance and financial results as a whole would be materially and adversely affected.

5. *Difficult conditions in financial markets can adversely affect our business, which could materially reduce our revenue and income.*

As a diversified financial services firm, our businesses are materially affected by conditions in the domestic and global financial markets, as well as economic conditions in India. If there is a prolonged or significant downturn or extreme volatility in the Indian capital markets or economic conditions, our revenue generated from these products and services, as well as our net investment income and fund management fees, could decrease, which would have a material adverse effect on our business, results of operations, cash flows and financial condition.

Any significant non-performing investment or loan could put the capital invested by us at risk, thereby adversely affecting our consolidated business, results of operations, cash flows and financial condition. Market and economic climate may deteriorate in the future because of many factors beyond our control, including rising interest rates or inflation, terrorism or political uncertainty, any adverse global or domestic events, including events that may negatively impact liquidity and investment inflows from foreign and domestic investors.

We are unable to quantify the impact of any such adverse market conditions on our business and/or financial condition. Our operating results may vary significantly from quarter to quarter as a result of volatility in market conditions. Therefore, period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as an indication of our future performance

6. *There are certain discrepancies noticed in our statutory records and/or records relating to filing of returns and statutory expenses with the concerned Registrar of Companies.*

In the past, our corporate records have experienced delays and discrepancy in filing of statutory e-form to the Registrar of Companies (RoC). Instances of such delays necessitated subsequent filings, accompanied by the payment of additional fees as mandated by the RoC.

As of the present, our company has not received any show cause notices related to these instances, and no regulatory authority has imposed penalties or fines. However, it cannot be guaranteed that similar instances will not occur in the future, and our company may encounter further delays or defaults in meeting reporting requirements, potentially resulting in penalties or fines imposed by regulatory authorities. Details of delayed filing of e-forms in last ten years are as follows:

Sr. No.	Particulars	Due date	Filing dated	No. of Days Delayed
1.	MGT 14 for Re appointment of Independent Director	27/09/2022	30/07/2024	673
2	MGT 14 for reappointment of Amit Anil Goenka for the 2 nd term of 5 years	29/05/2019	31/07/2024	1891

7. *Revisions to laws and regulations or regulatory investigations, including recent RBI AIF Circular restricting certain investments by Regulated Entities in the schemes of alternate investment funds ("AIFs"), may have a material adverse effect on our business, results of operations, cash flows and financial condition*

Nisus Finance Group are regulated by and report to a wide variety of Indian regulatory bodies, including RBI, SEBI, RERA and other regulators, each of which promulgate guidelines governing a wide variety of activities, including but not limited to capital adequacy, investment and credit exposure, reserves and other prudential norms.

Our Group Company, Nisus Fincorp Private Limited, is primarily regulated by the RBI under the SBR Framework for NBFC-ML, with revised regulations and reforms impacting operational norms. Effective October 1, 2022, and amended on November 10, 2023, stricter guidelines under this framework have replaced previous NBFC master directions, potentially affecting profitability and operations.

Further, the RBI has through its circular dated December 19, 2023, ("**RBI AIF Circular**") prohibited inter alia NBFCs and HFCs (collectively "**Regulated Entities**"), from making any investments in any scheme of AIFs which has

downstream investments, either directly or indirectly, in a debtor company of such respective Regulated Entities. The RBI has further directed the Regulated Entities with existing investments in such schemes of AIFs to either liquidate their investments with a period of 30 (thirty) days from the date of the RBI AIF Circular or make 100% provision on such investments. Any of our investments which require compliance with the RBI AIF Circular may adversely impact our business, results of operations, financial condition and reputation. It must be however highlighted that we have filed intimations to BSE and NSE on January 16, 2024, stating inter alia that we have exited all such AIFs, through either partial unwinding of the AIFs and/or by way of sale of AIF holdings at par value. We have further confirmed in the aforesaid intimations that we are not required to take any provisions or make any capital adjustments on account of the RBI AIF Circular.

8. *Any adverse development in the real estate sector would negatively affect our results of operations*

A significant portion of fund investments is exposed to the real estate sector. Our investments are exposed to the real estate sector and any significant decline in growth of Real estate sector can adversely affect our ability to realise the value of our collateral or fully recover principal and interest in the event of a default.

The Real estate market may be affected by several factors outside our Company's control, such as prevailing global and local economic conditions, cyclical downturns, advancement of technology. Further, rising interest rates, increases in property taxes, changes in development regulations, zoning laws and other applicable regulations, political instability, acts of terrorism, natural or man-made disasters, pandemics such as COVID-19, reduction in the availability of financing, increase in operating costs and disruptions in amenities and public infrastructure may lead to a decline in demand for the Real Estate, which may adversely affect our business, results of operations and financial condition.

To further ensure compliance with the requirements of the RERA Act, companies in the real estate sector may need to allocate additional resources, which may increase compliance and they may face regulatory actions or be required to undertake remedial steps, which may have an adverse effect on the business, operations and financial condition of various companies in the sector leading to less than anticipated growth in the sector, resulting in adverse effect on our business.

9. *Our Consolidated Restated Financial Statements are reviewed and Signed by the Peer Review Auditors who is not Statutory Auditors of our Company as required under the provisions of SEBI ICDR Regulations.*

Although, our statutory auditor, M/s. Sanjay Raja Jain & Co., Chartered Accountants, is holding valid peer review certificate, issued by the Peer Review Board of the Institute of Chartered Accountants of India, as on the date of this Draft Red Herring Prospectus, our Restated Financial Statements are reviewed and signed by M/s. V C A N & Co., Chartered Accountants, the Peer Review Auditors who is not the Statutory Auditor of the company.

10. *We require certain approvals, licenses, registration and permits for our business, and failure to obtain or renew them in a timely manner may adversely affect our operations.*

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels to operate our business. The approvals, licenses, registrations and permits obtained by us may contain conditions, some of which could be onerous.

Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or revoke the cancellation or suspension of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. Additionally, we are in the process of applying for renewal of certain approvals, licenses, registrations and permits, which need to be updated pursuant to change in name of the Company after conversion from private limited company to public limited company.

Further, these laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding material approvals, licenses, registrations and permits, which have not been obtained by our Company or are, pending renewal, see "Government and Other Statutory Approvals" on page 201 of this Draft Red Herring Prospectus.

11. *Our fund business is subject to SEBI (Alternative Investment Funds) Regulations 2012, including periodic inspections by SEBI, and our non-compliance with existing regulations or SEBI's observations or our failure or delay to obtain, maintain or renew regulatory approvals could expose us to penalties and restrictions*

Our fund businesses are regulated by SEBI under the SEBI Alternative Investment Funds Regulations 2012 and other applicable SEBI regulations. SEBI also issues guidelines applicable to AIFs in the form of circulars and notifications

from time to time. The SEBI Alternative Investment Funds Regulations govern a wide range of issues in connection with a AIFs, including the constitution and management of a AIFs. The SEBI Alternative Investment Funds Regulations also states for prior approval of SEBI in many instances.

Our fund businesses are subject to regular scrutiny and supervision by SEBI, such as periodic inspections. SEBI has the power to inspect our books from time to time to ensure that we are in compliance with regulations, based on which SEBI may take such action as it may deem fit, including under the SEBI Act, SEBI Alternative Investment Funds Regulations, Securities and Exchange Board of India (Procedure for Holding Enquiry by Officer and Imposing Penalty) Regulations, 2002 and other regulations issued by SEBI, which includes fines and sanctions and, in certain circumstances, could also lead to revocation of our license to function as an AIF.

12. *We are exposed to fluctuations in the market values of our investment and real asset portfolio.*

Financial market turmoil can adversely affect economic activity globally, including India. Deterioration in the credit and capital markets may result in volatility of our investment earnings and impairments to our investment and asset portfolio, including the assets in our balance sheet management unit, which are maintained as a part of our liquidity management. Further, the value of our investments depends on several factors beyond our control, including the domestic and international economic and political scenario, inflationary expectations, unforeseen tail events like the COVID-19 pandemic and the RBI's monetary policies. Any decline in the value of the investments could negatively impact our financial condition.

13. *If the investments made by the funds we advise or manage perform poorly we will suffer a decline in our revenue and earnings and our ability to raise capital for future funds may be adversely affected.*

Our revenue from our business is derived from fees earned for our advice to the funds, which is calculated as a percentage of the capital committed to/drawn-down from these funds, incentive fees, or carried interest, which is earned when certain financial returns are achieved over the life of a fund, gains or losses on investments of our own capital in the funds and monitoring, and transaction fees. In the event that such investments perform poorly, our revenues and earnings may suffer a corresponding decline and make it more difficult for us to raise new funds in the future.

14. *We undertake certain business operations outside of India*

We currently operate certain business outside of India, through our Stepdown subsidiary i.e. Nisus Finance Investment Consultancy FZCO in Dubai. Operating in such jurisdictions presents additional difficulties including:

- We do not have equivalent experience in operating in these jurisdictions to our experience in operating in India, nor do we have the benefit of significant corporate history;
- Operations in such jurisdictions are subject to different competitive environments and regulatory regimes in respect of which we have less knowledge and expertise; and
- The customer base in such jurisdictions that may be interested in investment in Indian securities is more limited than in India.

Therefore, we may not be able to grow our business outside of India at the same rate as we grow our domestic business, or at all, and it is possible that we find it difficult to maintain our operations in such jurisdictions.

15. *Our funding requirements and the proposed deployment of Net Proceeds are not appraised by any independent agency and deployment of funds raised through this Offer is subject to monitor by any monitoring agency in the event the size of the Offer is more than ₹10,000 lakhs.*

We intend to use the Net Proceeds for the purposes described in “*Objects of the Offer*” on page 73 of this Draft Red Herring Prospectus. Our funding requirements are based on management estimates and our current business plans and have not been appraised by any bank or financial institution. The deployment of the Net Proceeds will be at the discretion of our Board. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, changes in terms of our work and purchase orders or contracts, inability to receive the award of new orders and contracts, and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management's judgment with respect to the use of proceeds. If we are unable to deploy the proceeds of the Offer in a timely or an efficient manner, it may affect our business, results of operations and financial condition.

In the event the size of the Offer is more than ₹10,000 lakhs, we shall require to appoint an independent agency to oversee the deployment of funds raised through this Offer. However, we have not yet appointed a monitoring agency for monitoring the utilisation of offer proceeds. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our financials.

16. *Our Company has availed unsecured loans which are repayable on demand. Any demand for a loan from lenders for repayment of such unsecured loans, may adversely affect our cash flows*

Based on Restated Consolidated Financial Statement, our Company has unsecured loans as at January 31, 2024, amounting to ₹ 582.75 lakhs from Directors and their relatives that are repayable on demand to the relevant lenders as per restated financial statements. Further, some of these loans are not repayable in accordance with any agreed repayment schedule and may be recalled by the relevant lender at any time. Any such unexpected demand or accelerated repayment may have a material adverse effect on the business, cash flows and financial condition of the borrower against which repayment is sought. Any demand from lenders for repayment of such unsecured loans, may adversely affect our cash flows. For further details of unsecured loans of our Company and its subsidiary company, please refer the chapter titled “Restated Financial Statements” beginning on page 178 of this Draft Red Herring Prospectus.

17. *We may not be able to adequately protect our intellectual property rights, including the use of “Nisus” name and associated logo, which could harm our competitiveness.*

We believe that the use of our name and logo is vital to our competitiveness and success and for us to attract and retain our clients and business partners. Any improper use or infringement by any party could adversely affect our business, financial condition and results of operations. We cannot assure you that the measures we have taken will be sufficient to prevent any misappropriation of our intellectual property.

Enforcement of any intellectual property rights could be time consuming and costly. We may not be able to establish our rights to such intellectual property in the absence of relevant registrations and accordingly may not be able to take appropriate action or prevent the use of such name or logo by third parties. In the event that the measures we take do not adequately safeguard our intellectual property rights, we could suffer losses due to competing offerings of services that exploit our name and logo.

All our trademarks, which are under Class 35 and 36, were registered in the name of our Company. Our Company has issued an No Objection Certificate authorising its subsidiaries namely Nisus Finance & Investment Managers LLP, Nisus Finance International Advisors IFSC LLP, Nisus Finance Investment Consultancy FZCO and Nisus BCD

Advisors LLP and its group entity Nisus Fincorp Private Limited to also use the logo  which authorisation is revocable at our Company’s option. Such authorisation is subject to the restriction that none of the above entities (i) use the trademark 'NISUS FINANCE', 'INFINITE POSSIBILITIES' in any of the activities covered in Class 35 & 36 in which the Company is registered, (ii) file any applications for registration of such trademark 'NISUS FINANCE', 'INFINITE POSSIBILITIES' in their favour in Class 35 & 36 (iii) use of the trademark 'NISUS FINANCE', 'INFINITE POSSIBILITIES' in respect of activities covered under the said Class 35 & 36 in any manner whatsoever. For further details pertaining to our Intellectual Property of our Company, see “Business Overview- Intellectual Property” and “Government and Other Statutory Approvals” on pages 121 and 201 respectively of the Draft Red Herring Prospectus.

18. *Our success largely depends on our ability to attract and retain our key managerial personnels or Senior Management. Failure to do so may have a material adverse effect on our business, financial condition and results of operations.*

Our success, to a significant degree, depends upon the continued contributions of our Key Management Personnel, Senior Management as well as our employees. We have not entered into any long-term employment contracts with our employees and key personnel. Because of the nature of the businesses we are engaged in, we may be required to hire and retain trained personnel for setting our strategic business direction and managing our business. We believe our future success will depend in a large part upon our ability to identify, attract and retain highly skilled managerial, engineering, finance administration and human resources personnel. We may not succeed in identifying, attracting, training and retaining appropriate personnel. Further, our competitors and other entities may, in the future, attempt to recruit our employees. The loss of services of any of our key personnel and our inability to identify, attract, train or retain such qualified personnel in the future or delays in hiring qualified personnel could make it difficult for us to manage our business and meet key objectives.

19. *Our company will not receive any proceeds realised from the Offer for Sale. The amount realised thereon will be received directly by the Promoter Selling Shareholders*

A substantial portion of our offering comprises shares for sale. Any proceeds from this sale will be received directly by the promoter selling shareholders and not by the company itself. It's important for investors to recognize that the company will not directly gain any funds from the shares offered for sale. Instead, the funds raised through this part of the offering will go to the Promoter Selling Shareholders. This distinction is crucial for investors to understand as they assess the allocation of funds within the IPO. It underscores the fact that the company's financial position will not

be directly impacted by the sale of these shares. Rather, it is the selling shareholders who stand to benefit financially from the sale. This transparency in the allocation of proceeds ensures clarity and accountability in the IPO process, providing investors with the necessary information to make informed decisions regarding their investments.

20. The registered office of the Company, its Subsidiaries and group Company are located on leased premises. We cannot assure you that the lease agreement will be renewed upon termination or that we will be able to lease other premises on the same or similar commercial terms.

Further, Nisus Finance Group offices are also operating on the same premises, for which a NOC has been obtained from the owner of the property Except our two stepdown subsidiaries i.e. Nisus Finance International Advisors IFSC LLP and Nisus Finance Investment Consultancy FZCO which located at Gift City, Gujarat and IFZA Free Zone, Dubai respectively on Lease basis. However, we cannot assure you that we will be able to retain the possession of the premises on the same or similar terms or at all or find an alternative location on similar terms favourable to us, or at all. Our existing insurance may not be adequate to completely cover any or all of our risks and liabilities. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. Our inability to maintain adequate insurance cover in connection with our business could adversely affect our operations and profitability. To the extent that we suffer loss or damage as a result of events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected. 22. Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the respective fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including payment of dividend distribution tax.

Our Company did not declare any dividend since incorporation till January 31, 2024. Our ability to pay dividends in the future will depend on a number of factors, including our profit after tax for the fiscal year, our capital requirements, our financial condition, our cash flows and applicable taxes, including payment of dividend distribution tax. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and subsequent approval of our Shareholders and will depend on factors that our Board and Shareholders deem relevant. We may decide to retain all our earnings to finance the development and expansion of our business and, therefore, may not declare dividends on our Equity Shares. We cannot assure you that we will be able to pay dividends in the future.

23. We have certain contingent liabilities which may adversely affect our financial condition.

25. We have experienced negative cash flows from operation in the prior periods.

The company has following cash-flow from operating activity on consolidated basis in financial statements.

For further details, see “*Management's Discussion and Analysis of Financial condition and Results of Operations*” and “*Restated Financial Information*” on pages 180 and 178, respectively of this Draft Red Herring Prospectus. Any negative cash flows in the future could adversely affect our business, results of operations and financial condition.

26. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions, and cause serious harm to our reputation and the goodwill of our Company. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

27. We introduce new products for our customers and there is no assurance that our new products will be profitable in the future.

We introduce new products and services in our existing lines of businesses. We may incur costs to expand our range of products and services and cannot guarantee that such new products and services will be successful once offered, whether due to factors within or outside of our control, such as general economic conditions, a failure to understand customer demand and market requirements or a failure to understand the regulatory and statutory requirements for

such products or lack of management focus on these new products. If we fail to develop and launch these products and services successfully, we may lose a part or all the costs incurred in development and promotion or discontinue these products and services entirely, which could in turn adversely affect our business and results of operations.

28. *Our Promoters and members of the Promoter Group will continue jointly to retain majority control over our Company even after the Offer which will allow them to determine the outcome of matters submitted to shareholders for approval.*

Post this Offer, our Promoters and Promoter Group will collectively own [●] % of our post offer equity share capital. As a result, our Promoters, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

29. *Our revenues are dependent on our sustained ability to successfully manage transactions and advisory assignments and on managing client concentrations.*

Our transaction advisory services are primarily provided to clients on a short-term basis, engaging us for specific projects. Unlike long-term contracts, these engagements are not recurring in nature. Therefore, once our current projects are successfully completed or terminated, we must actively seek new engagements to sustain our business. It's important to note that high activity levels in one period do not necessarily guarantee continued high activity levels in subsequent periods.

The fees we earn from our transaction advisory business are typically received upon the successful completion of a specific transaction or assignment. A decrease in the number of transaction advisory engagements or a decline in the market for such services would negatively affect our business. Our transaction advisory business operates in a highly competitive environment, where revenue sources are not typically based on long-term contracts. Each engagement that generates revenue requires separate solicitation, negotiation, and awarding. Moreover, many businesses do not regularly engage in transactions that necessitate our services. Consequently, the predictability of fee-paying engagements with clients is low, and a quarter with high financial advisory revenue does not guarantee sustained high revenue in the future. Additionally, we experience client attrition each year due to factors such as their choice to hire other advisors, their sale, merger, or restructuring, changes in senior management, and various other reasons.

These factors can significantly impact the volume, nature, and scope of our engagements, resulting in a material decline in our revenue. There is no assurance that we will be able to attract large new clients to mitigate any adverse effects on our business, financial performance, cash flows, and overall financial conditions.

30. *Poor investment performance, pricing pressure and other competitive factors may reduce our revenue or result in losses in our asset management business.*

Our revenues from our asset and fund management business is primarily derived from management fees, which are based on committed/drawn down capital and/or assets under management and incentive fees, further we earn carried interest if the return of our investment funds exceeds certain threshold returns. Our ability to maintain or increase assets under management is subject to a number of factors, including investors' perception of our past performance, market or economic conditions, competition from other fund managers and our ability to negotiate terms with major investors.

Investment performance is one of the most important factors in retaining existing clients and competing for new asset management and our historical performance may not be indicative of future results. Poor investment performance and other competitive factors could reduce our revenues and affect our growth in many ways:

- existing clients may withdraw funds from our asset management business in favour of better performing products; our fees could decline;
- firms with which we have business relationships may terminate these relationships with us;
- our capital investments in our funds or the seed capital we have committed to new asset management products may diminish in value or may be lost; and
- our key employees in the business may depart, either to join a competitor or otherwise.

To the extent our future investment performance is perceived to be poor in either relative or absolute terms, our asset management revenues will likely be reduced and our ability to raise new funds will likely be impacted.

Even when market conditions are generally favourable, our investment performance may be adversely affected by our investment style and the particular investments that we make. In addition, over the past several years, the size and number of investment funds, has continued to increase. If this trend continues, it is possible that it will become increasingly difficult for us to raise capital for new investment funds or price competition may mean that we are unable to maintain our current fee structure. We have historically competed primarily on the basis of the performance of our investment funds and other asset management products and services. However, there is a risk that fees in the asset management industry will decline, without regard to the historical. Fee reductions on our existing or future investment funds and other asset management products and services, without corresponding decreases in our cost structure, would adversely affect our revenues and results of operations.

- 31. *In addition to normal remuneration, other benefits and reimbursement of expenses to our Promoter, Directors, Key Managerial Personnel and Senior Managerial Personnel; they are interested to the extent of their shareholding, if any and dividend entitlement thereon in our Company and for the transactions entered into between our Company and themselves as well as between our Company and our Group Companies/Entities. Our Company in future may enter in related party transactions subject to necessary compliances.***

Our Promoter, Directors, Key Managerial Personnel and Senior Managerial Personnel are interested in our Company to the extent of their shareholding, if any and dividend entitlement thereon in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. Our Promoter and Directors are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Our company, promoter and group companies may enter into such related party transaction in future as well which may be or may not be at Arms' Length Price and in Ordinary Course of Business. If such future transactions are not on Arms' Length Price and in Ordinary Course of Business, our financial position may get affected to that extent. Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. These related party transactions are typically in the nature of remuneration and interest expenses and loans availed and repaid by us.

For details of transactions already executed by our Company with our Promoter, Directors, Key Managerial Personnel, Senior Managerial Personnel and Group Companies/Entities during last three years, please refer to the "Annexure – IX - Related Party Transactions" under the chapter titled "Restated Financial Information" beginning from page no. 178 of this Draft Red Herring Prospectus.

- 32. *We have entered into and may continue to enter into related party transactions with companies within the Nisus Finance Group that may involve conflicts of interest, which could adversely impact our business.***

Our Company has entered into various transactions with certain related parties. While we trust that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favorable terms than the transactions entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations, for further details on the transactions entered by us, please refer to "*Restated Consolidated Financial Statements–Note IX - Related Party & Transactions*" on page 178 of this Draft Red Herring Prospectus.

Further, list of the related parties and all related party transactions, are disclosed under AS 18 and / or as covered under section 188(2) of the Companies Act, 2013 (as amended), SEBI LODR Regulations and other statutory compliances. Furthermore, there were no conflicts of interest aroused among the equity shareholders in relation to related party transactions entered in the past. Though, the related party transactions entered into by the Company in the past are in compliance with the Section 177 and Section 188 of the Companies Act, 2013 and other applicable laws, there can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

- 33. *Our business is dependent on the Group's goodwill and 'Nisus' brand name. Any change in control of the Group or any other factor affecting the business and reputation of the Group may have a concurrent adverse effect on our Group's reputation, business and results of operations***

Our business is dependent on our Group's goodwill and the 'Nisus' brand name. Reputational risk, or the risk to our business, earnings and capital from negative publicity, is inherent in our business. The reputation of the financial services industry in general has been closely monitored as a result of the global financial crisis and other matters affecting the financial services industry. Negative public opinion about the financial services industry generally or about us specifically could materially adversely affect our ability to attract and retain customers and may expose us to

litigation and regulatory action. Negative publicity can result from our or our third-party service providers' actual or alleged conduct in any number of activities, including lending practices, mortgage servicing and foreclosure practices, technological practices, corporate governance, regulatory compliance, mergers and acquisitions, and related disclosure, sharing or inadequate protection of customer information, and actions taken by government regulators and community organisations in response to that conduct. Damage to our reputation and loss of brand equity could reduce demand for our products. Any impairment of our reputation or erosion of the brand or failure to optimize the brand in the marketing of our products could have a material adverse effect on our capacity to retain our current customers and attract new customers and therefore on our sales and profitability, as well as require additional resources to rebuild our reputation and restore the value of the brand. Although we take steps to minimise reputational risk in dealing with customers and other constituencies, we, as a services organisation with a industry profile, are inherently exposed to this risk. Any adverse developments regarding our brand could materially and adversely affect our business, results of operations, cash flows and financial condition.

34. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the 'Objects of the Offer. Any shortfall in raising or meeting the same could adversely affect our growth plans, operations, and financial performance.*

As on date of this Draft Red Herring Prospectus, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through financing from financial institutions, owned funds, and internal accruals. Any shortfall in our net owned funds, internal accruals, and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer to the chapter titled "Objects of the Offer" beginning on page 70 of this Draft Red Herring Prospectus.

35. *In the event there is any delay in the completion of the Offer, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Offer which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Offer as has been stated in the chapter titled "Objects of the Offer" on Page no. 73 of this Draft Red Herring Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Offer, it may adversely affect our revenues and results of operations.

36. *If we are unable to source business opportunities effectively, we may not achieve our financial objectives*

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate, and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees, expand our distribution network and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition, and results of operations. It also is possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of the market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

37. *This Draft Red Herring Prospectus contains information from an industry report, which we have commissioned from CARE EDGE.*

The industry related data used in this Draft Red Herring Prospectus has been derived from an industry report titled "Research Report on AIF Industry" prepared by CARE EDGE Analytics & Advisory Private Limited and commissioned by our Company. The data in the industry report has not been independently verified by us. Accordingly, investors should read the industry related disclosure in this Draft Red Herring Prospectus in this context. Industry sources and publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. While industry sources take due care and caution while preparing their reports, they do not guarantee the accuracy, adequacy or completeness of the data. Accordingly, investors should not place undue reliance on, or base their investment decision solely on this information.

38. *We rely on third-party service providers who may not perform their obligations satisfactorily or in compliance with law.*

Our group businesses enter into outsourcing arrangements with third party vendors for a number of our businesses and for services required by us. These vendors provide services, which include, among others, software services, client

sourcing, public relations, public records (Title Search for properties) services valuation and technical due-diligence, financial, corporate and legal due-diligence. Though adequate due diligence is conducted before finalising such outsourcing arrangements, we cannot guarantee that there will be no disruptions in the provision of such services or that these third parties will comply with regulatory requirements or adhere to their contractual obligations in a timely manner, or at all. If there is a disruption in the third-party services, despite having continuity plans in place as required by the regulators or if the third-party service providers discontinue their service agreement with us, we may have to reappoint other agencies to minimize impact on our business, that may lead to escalation of timeline and costs and adversely affect, results of operations, cash flows and financial condition. In case of any dispute, we cannot assure you that the terms of such agreements will not be breached, which may result in litigation costs. Such additional cost, in addition to the cost of entering into agreements with third parties in the same industry, may materially and adversely affect our business, results of operations, cash flows and financial condition. We may also suffer from reputational and legal risks if our third-party service providers fail to operate in compliance with regulations or corporate and societal standards, act unethically or unlawfully, which could materially and adversely affect our business, results of operations, cash flows and financial condition.

39. *The sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

40. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Following the Offer, we will be subject to a daily "circuit breaker" imposed by BSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares.

41. *We may need additional capital and we may not be able to obtain it, which could adversely affect our liquidity and financial position.*

We may require additional cash resources due to changed business conditions or other future developments. Our ability to obtain additional capital is subject to a variety of uncertainties, including our future financial condition, results of operations and cash flows, conditions in the capital markets in which we may seek to raise funds and general economic, political and other conditions in India and elsewhere. We may be unable to obtain additional capital in a timely manner or on acceptable terms or at all. The terms and amount of any additional capital raised through issuances of equity securities may result in significant dilution to our shareholders. Any incurrence of debt would result in the incurrence of interest expense and could require us to agree to operating and financial covenants that could restrict our operational flexibility and materially and adversely affect our business. Any termination of such membership could adversely affect our operations.

42. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that in future no deficiency will be incurred. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

43. *Certain data mentioned in this Draft Red Herring Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

EXTERNAL RISK FACTORS

44. *The Equity Shares have never been publicly traded and the Offer may not result in an active or liquid market for the Equity Shares. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the BSE SME may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares.

Our Equity Shares are expected to trade on the BSE SME after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

There has been significant volatility in the Indian stock markets in the recent past, and the trading price of our Equity Shares after the Offer could fluctuate significantly as a result of market volatility or due to various internal or external risks, including but not limited to those described in this Draft Red Herring Prospectus. The market price of our Equity Shares may be influenced by many factors, some of which are beyond our control, including, among others:

- the failure of security analysts to cover the Equity Shares after the Offer, or changes in the estimates of our performance by analysts;
- the activities of competitors;
- future sales of the Equity Shares by us or our Shareholders;
- investor perception of us and the industry in which we operate;
- our quarterly or annual earnings or those of our competitors;
- developments affecting fiscal, industrial or environmental regulations; and
- the public's reaction to our press releases and adverse media reports.

A decrease in the market price of our Equity Shares could cause you to lose some or all of your investment.

45. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions, due to which they may have difficulty in asserting their rights as a shareholder.*

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities may differ from those that would apply to a company in another jurisdiction. Investors may have difficulty in asserting their rights as shareholders in an Indian company than as shareholder of a corporation in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other jurisdictions. Under the Companies Act, prior to issuance of any new equity shares, a public limited company incorporated under Indian law must offer its equity shareholders pre-emptive rights to subscribe to a proportionate number of equity shares to maintain existing ownership, unless such pre-emptive rights are waived by a special resolution by a three-fourths majority of the equity shareholders voting on such resolution. If you are a foreign investor and the law of the foreign jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such foreign jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file an offering document or a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interest in our Company would decline.

46. *There is no guarantee that the Equity Shares issued pursuant to the Offer will be listed on the SME Platform of BSE Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issue of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

47. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition, and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

48. *Investors may be subject to Indian taxes arising out of income arising on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares held as investments in an Indian company are generally taxable in India. Any capital gain realized on the sale of listed equity shares on a Stock Exchange held for more than 12 months immediately preceding the date of transfer will be subject to long term capital gains in India at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. Accordingly, you may be subject to payment of long term capital gains tax in India, in addition to payment of Securities Transaction Tax (“STT”), on the sale of any Equity Shares held for more than 12 months immediately preceding the date of transfer. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax in India as well as STT.

Capital gains arising from the sale of the Equity Shares will not be chargeable to tax in India in cases where relief from such taxation in India is provided under a treaty between India and the country of which the seller is resident read with the Multilateral Instrument (“MLI”), if and to the extent applicable, and the seller is entitled to avail benefits thereunder. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

No dividend distribution tax is required to be paid in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends.

Our Company cannot predict whether any tax laws or other regulations impacting it will be enacted or predict the nature and impact of any such laws or regulations or whether, if at all, any laws or regulations would have a material adverse effect on our Company’s business, financial condition, results of operations and cash flows.

49. *The Offer Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer Price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The Offer Price of the Equity Shares is proposed to be determined by us, the Promoter Selling Shareholder in consultation with the Book Running Lead Managers, through a book-building process. This price is based on numerous factors, including factors as described under “Basis for Offer Price” on page 96 of this Draft Red Herring Prospectus and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

50. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

51. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

52. *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

53. *A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.*

There are provisions in Indian law that may delay, deter or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Such provisions may discourage or prevent certain types of transactions involving our actual or threatened change in control. Under the Takeover Regulations in India, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although, these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the Indian Takeover Regulations.

54. *The requirements of being a listed company may strain our resources and distract management.*

We were not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, other than those exempted to companies listed on the SME platform, which will, among other things, require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

55. *We may require further equity issuance, which will lead to dilution of equity and may affect the market price of our Equity Shares or seek additional funds through incurring debt to satisfy our capital needs, which we may not be able to procure.*

Our growth is dependent on having a balance sheet to support our activities. In addition to the Offer Proceeds and our internally generated cash flow, we may need other sources of financing to meet our capital needs, which may include entering into new debt facilities with lending institutions or raising additional equity in the capital markets. We may need to raise additional capital from time to time, depending on business conditions. The factors that would require us to raise additional capital could be business growth beyond what the current balance sheet can sustain; additional capital requirements imposed due to changes in regulatory regime or significant depletion in our existing capital base due to unusual operating losses. Any fresh issue of shares or convertible securities would dilute existing holders, and

such issuance may not be done at terms and conditions, which are favourable to the existing shareholders of our Company. If our Company decides to raise additional funds through the incurrence of debt, our interest obligations will increase, and we may be subject to additional covenants, which could further limit our ability to access cash flows from our operations. Such financings could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in the delay or abandonment of our expansion plans. Our business and future results of operations may be affected if we are unable to implement our expansion strategy.

Any future issuance of Equity Shares by our Company may dilute your shareholding and hence affect the trading price of our Equity Shares and our ability to raise capital through an issue of its securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of the Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

56. *Political, economic, regulatory or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in India is also affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

57. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions and economic developments globally could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, regulators implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition and results of operation.

OTHER RISKS

58. *If there is any change in laws or regulations, including taxation laws, or their interpretation, such changes may significantly affect our financial statements.*

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Act, 2019, prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favor of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the tax rate (on gross basis) for Indian companies from 30% to 22% (exclusive of applicable health and education cess and surcharge).

The Finance Act, 2024 ("**Finance Act**"), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime. For instance, dividend distribution tax ("**DDT**") will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non-resident and are likely to be subject to tax deduction at source. Our Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

In addition, we are subject to tax related inquiries and claims. We may be particularly affected by claims from tax authorities on account of income tax assessment, service tax and GST that combines taxes and levies by the central and state governments into one unified rate of interest with effect from July 1, 2017 and all subsequent changes and amendments thereto.

Further, the Government of India has announced the Union Budget for Fiscal 2024, which was notified on the e-Gazette on March 31, 2023. The Finance Act, 2024 introduced various amendments to taxation laws in India. We cannot predict whether any amendments made pursuant to the Finance Act, 2024 would have any adverse effect on our business, financial condition, future cash flows and results of operations. In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs relating to compliance with such new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

We cannot predict whether any new tax laws or regulations impacting our services will be enacted, the likely nature and impact of the specific terms of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business.

59. *If inflation were to rise in India, we might not be able to increase the prices of our products at a proportionate rate in order to pass costs on to our customers thereby reducing our margins.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, components and other expenses relevant to our business. Further, a rise in inflation in other countries, such as in the United States of America or United Kingdom, may lead to an increase in the interest rates in India and depreciation in the value of the Rupee which in turn make the components imported by our Company costlier.

Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

In recent months, consumer and wholesale prices in India have exhibited increased inflationary trends, as a result of an increase in crude oil prices, higher international commodity prices, and higher domestic consumer and supplier prices. The RBI has enacted certain policy measures and has recently increased the repo rates to curb inflation. However, these policies and steps taken by the RBI may not be successful. In February 2022, hostilities between Russia and Ukraine commenced. The market price of oil has risen sharply since the commencement of these hostilities which may have an inflationary effect in India. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our customers, whether entirely or in part, and may adversely affect our business and financial condition. In particular, we might not be able to control the increase in our expenses related to

salaries or wages payable to our employees, reduce our costs or increase the price of our products to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

60. Investors may not be able to enforce a judgment of a foreign court against us.

Our Company is a company incorporated under the laws of India. All of our Company’s Directors and officers are residents of India and a substantial portion of our assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon our Company or such persons in jurisdictions outside India, or to enforce judgments obtained against such parties outside India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with public policy, or if judgments are in breach or contrary to Indian law. In addition, a party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to execute such a judgment or to repatriate outside India any amounts recovered.

Recognition and enforcement of foreign judgments is provided for under Section 13 and Section 44A of the Code of Civil Procedure, 1908 (“CPC”). India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the United Kingdom, Singapore and Hong Kong. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements established in the CPC. The CPC only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India, including the United States, cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be directly enforceable in India. The party in whose favor a final foreign judgment in a non-reciprocating territory is rendered may bring a fresh suit in a competent court in India based on the final judgment within three years of obtaining such final judgment. However, it is unlikely that a court in India would award damages on the same basis as a foreign court if an action were brought in India or that an Indian court would enforce foreign judgments if it viewed the amount of damages as excessive or inconsistent with the public policy in India.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offeror at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%

NBFC business seeks to provide working capital to urban infrastructure and construction industry contractors and SME businesses where the role of timely credit is quintessential. Our target borrowers receives build/install orders from mid-sized developers along with a mobilisation advance. These contractors and SMEs have to ensure the delivery of the ordered goods and services typically within 180-240 days of purchase order receipt by procuring requisite goods or spares from dealers and sub-contractors who typically provide our target borrowers a maximum of 30-days credit period. Essentially our target borrowers require working capital credit for the balance period of 150-210 days to deliver their order to the mid-sized developer. The mid-sized developer would use monies from construction finance loan availed and sales collection received in escrow, to pay our target borrowers on delivery of order. Against the release of the escrowed cash flows our

NBFC would finance the target borrowers. We aspire to empower small and medium-sized businesses with the financial resources they need to grow and succeed. The NBFC business shall offer a range of solutions including a line of credit and collateral-free business loans, providing SMEs & Vendors with the flexibility to manage their cash flow and support their daily operations.

As an NBFC, we are subject to regulations relating to the capital adequacy, which determine the minimum amount of capital we must hold as a percentage of the risk -weighted assets on our portfolio and of the risk adjusted value of off-balance sheet items, as applicable. As per the capital adequacy norms issued by the RBI, we are required to have a regulatory minimum CRAR of 15.00%.

As of March 31, 2023, Nisus Fincorp Private Limited's CRAR - Tier – I capital, in accordance with the Audited Standalone Financial Information of Nisus Fincorp Private Limited, was 50.06%. As Nisus Fincorp Private Limited continue to grow its loan portfolio and asset base, Company will require additional capital in order to continue to meet applicable capital adequacy ratios with respect to its business. The Net Proceeds will be utilised to increase Company's Tier – I capital base to meet its future capital requirements which are expected to arise out of growth of our business and assets, and to ensure compliance with the NBFC-ND-NSI Directions. We anticipate that the Net Proceeds will be sufficient to satisfy our Company's Tier – I capital requirements for Financial Year 2025-26.

Considering that the higher CRAR would positively impact the credit ratings of our Company, which in turn would lower the borrowing costs, thereby positively impacting our interest margins and financial condition, we accordingly, propose to utilize an amount aggregating to ₹ 2,500 lakhs out of the Net Proceeds towards maintaining higher Tier 1 capital in light of our onward lending requirements. We believe that maintaining higher Tier 1 capital will help us remain competitive with our industry peers. We anticipate that the portion of the Net Proceeds allocated towards this object will be sufficient to satisfy our Company's future capital requirements, which are expected to arise out of growth of our business and assets.

The table sets forth the details of composition of the Company's Tier –I capital and Capital Adequacy Ratio % as at January 31, 2024, March 31, 2023, March 31, 2022 and March 31, 2021 -

INDIAN ECONOMIC OUTLOOK

Resilience to External Shocks remains Critical for Near-Term Outlook

India’s real GDP grew by 7.0% in FY23 and stood at ~Rs. 161 trillion, as per the First Revised Estimate, despite the pandemic in previous years and geopolitical Russia-Ukraine spillovers. In Q1FY24, the economic growth accelerated to 8.2%. The manufacturing sector maintained an encouraging pace of growth, given the favorable demand conditions and lower input prices. The growth was supplemented by a supportive base alongside robust services and construction activities. This momentum remained in the range in the Q2FY24 with GDP growth at 8.1%, mainly supported by acceleration in investments. However, private consumption growth was muted due to weak rural demand and some moderation in urban demand amid elevated inflationary pressures in Q2FY24. The GDP growth number improved for Q3FY24 at 8.6%.

India's GDP at constant prices surged to Rs. 47.24 trillion in Q4FY24 from Rs. 43.84 trillion in Q4FY23, marking a 7.8% growth rate. This upswing was fueled by robust performances in construction, mining & quarrying, utility services, and manufacturing sectors and investment drove the GDP growth, while both private and government consumption remained subdued.

GDP Growth Outlook

- Driven by fixed investment and improving global environment, domestic economic activity continues to expand. The provisional estimates (SAE) placed real GDP growth at 8.2% for FY24.
- Industrial activity led by manufacturing continues its momentum on the back of strengthening domestic demand. The eight core industries also show healthy growth. Moreover, services sector shows exhibit broad based buoyancy. The purchasing managers’ index for both manufacturing and services continues to exhibit a sustained and healthy expansion.
- The outlook for agriculture and rural activity appears bright owing to good rabi wheat crop and expected improvements in kharif crop due to expected normal south-west monsoon. This combined with increasing rural demand on the back of improving farm activity, improvement in informal activity, improving employment condition, and alleviating inflationary pressures are expected to boost private investment. Additionally, consumption is expected to support economic growth in FY25 owing to strengthening rural demand.
- Investment activity is also expected to be further supported by sustained and robust government spending, strong financial positions of banks and corporations, increasing capacity utilization, and rising business confidence as indicated by surveys. Additionally, improving global economic growth and trade prospects are expected to boost external demand for goods and services.

Budgetary Outlay Toward Infrastructure and Governmental Infra-Projects

One of the key drivers for economic growth is the increased infrastructure investment thrust by the government. In the Union Budget 2024-25, the government continued its focus on infrastructure development with budget estimates of capital expenditure toward the infrastructure sector of Rs. 11,111 Billion. Furthermore, continuous efforts by the Government of India to make the business environment convenient to operate and streamline the regulatory process will support the growth of investments in the infrastructure segment.

REAL ESTATE REMAINS THE LEADING SECTOR TO RECEIVE FUNDING IN AIF

The financing gap that had long plagued the Indian real estate industry had limited its ability to grow. Nonetheless, Real Estate Alternative Investment Funds (AIFs) have become a game-changer and revolutionized the market in recent years. SEBI-regulated investment vehicles known as real estate-focused AIFs combine investors capital and allocate it mostly to Indian real estate assets, providing a great opportunity for investors and developers. It can be noted that in the past 3 years, real estate has been the most preferred sector across AIFs to invest in. Between FY21 and FY23, deployment of funds was maximum in real estate sector.

The Indian real estate industry, was facing a significant funding shortfall that had hindered project launch and execution and sector growth. Real estate AIFs have become a dependable source of funding, giving developers access to much needed capital.

Due to introduction of the real estate AIFs, the developers can fund their projects without depending just on conventional financing sources like bank loans or private equity. This funding source enables developers to create premium real estate assets, purchase land parcels and fasten project execution. Real estate AIFs are a desirable option for project financing since they provide developers with a number of advantages. First of all, these funds provide developers adaptable financing choices that may be customized to fit their unique needs. Developers can access funds at different stages of project development, from purchase to last-mile completion, thanks to Real Estate AIFs' customized structure. The engagement of proficient fund managers facilitates developers in project management optimization, operational efficiency enhancement, and regulatory complexity navigation. Real Estate AIFs also make it easier for developers to work together, which promotes knowledge exchange and industry synergies.

The assets under management of the Indian real estate market based on the top 5 players is around Rs 20,916 crores as of FY24. Such funds provide a higher return as well as offer diversification across developers and projects.

Top 5 Real estate AIFs AUM

From investors point of view, AIFs in real estate are a lucrative option to invest as they provide a diversification across regions, projects and developers. The investors get the option to invest in real estate projects which may generally be out of reach.

Also, these funds are managed by experienced and knowledgeable fund managers who have good knowledge about the sector like real estate market. Real estate investing has never been a simple endeavour. Investors have to cope with a variety of issues, including complicated asset management, paperwork and operational difficulties. HNIs wishing to invest in real estate investment themes are finding that real estate-focused AIFs are a great alternative. As in the typical AIF process, the fund managers conduct a strict due diligence for the portfolio companies, offer guidance and manage these investments very actively.

The AIFs also play a key role in promoting transparency and governance in the industry. A strict regulatory framework around AIFs ensures compliance and accountability, reduces the risk of manipulation and increases investor confidence. This increased transparency will attract both domestic and foreign investors in future, increasing investment participation and spurring industrial growth.

In general, the real estate projects are risky due to their nature and such funds provide a good opportunity to the investors that balances out their risk and return. Hence it is safe to assume that the real estate AIFs will continue to increase in future as well.

AIF GROWTH DRIVERS AND OUTLOOK

1. Rising Income Levels:

Along with India's economy, the income levels of citizens of India too have increased, leading to a widening pool of wealth seeking investment avenues beyond conventional assets such as stocks and bonds. India has been experiencing a steady increase in wealth creation, both at the individual and institutional levels. High-net-worth individuals (HNIs), family offices, and institutional investors are looking for avenues to deploy their capital effectively, and AIFs provide them with opportunities for higher returns and portfolio diversification. Alternative investment options like private equity, venture capital, and hedge funds promise the possibility of higher returns, albeit with added risk. Typically, High-Net-Worth Individuals (HNIs) and Ultra-High-Net-Worth Individuals (UHNIs) represent more sophisticated investors willing to take greater risk in pursuit of amplified returns.

Per Capita Income

2. Increasing Domestic Capital Flow:

There is an anticipated shift in focus among intermediaries such as distributors and family offices, moving from traditional products to AIFs. Currently, foreign investors dominate India's Alternative Investment Fund (AIF) industry. Additionally, SEBI's proactive approach in implementing regulatory changes is expected to tilt the investment mix in favour of domestic investors in the coming years. Recent regulatory changes have allowed domestic institutional investors, including retirement funds and insurance companies, to invest in AIFs, which is expected to significantly drive industry growth.

3. Increase in preference for non-traditional investment avenues:

Investor interest in alternative investments has surged, driven by a desire for higher potential returns amidst a growing appetite in risk-taking. Assets like private equity, venture capital, and hedge funds are offering potentially greater rewards compared to traditional options like stocks and bonds, albeit with increased risk. This shift reflects a broader trend of diversification and pursuit of higher yields in investment portfolios. Present-day investors are increasingly informed and financially adept, seeking opportunities beyond traditional investment avenues. Factors like low interest rates in conventional products and extensive asset allocation to mass-market offerings like mutual funds have spurred investors, particularly High-Net-Worth Individuals (HNIs), to explore alternative avenues for capital deployment.

4. Easy access of Information:

The growth of the AIF industry has been significantly catalyzed by increased awareness. However, recent years have witnessed that information regarding alternative investment information is way easier to get, as it is largely driven by the Internet and social media. This dissemination of knowledge has made alternative investments more accessible to individual investors, including HNIs and UHNIs.

5. Demand for sector specific investment:

There is a growing desire among investors for investments that focus on particular sectors or asset classes, like real estate, infrastructure, private equity, and venture capital. Given India's expanding economy and infrastructure projects, there's a rising need for investments in areas such as real estate, technology, healthcare, and renewable energy, all of which AIFs can accommodate.

6. Tailored Investment Strategies:

AIFs provide the advantage of customizing investment strategies, enabling fund managers to adjust to evolving market conditions and investor preferences. This adaptability appeals to investors who seek personalized investment options tailored to their needs and desire for returns that match the associated risks.

7. Diversified Portfolios:

Alternative investments hold the promise of generating superior long-term returns compared to traditional asset classes. They offer investors the chance to diversify their portfolios and potentially achieve higher returns compared to traditional asset classes. This is due to the characteristic of alternative investments being typically uncorrelated or less correlated with traditional assets, allowing them to perform well even when conventional asset classes are struggling.

8. Regulatory Support:

The regulatory environment in India has been evolving to support the growth of the AIF industry. Measures such as standardizing the private placement memorandum (PPM), conducting PPM audits, and mandating benchmarking of AIFs aim to enhance transparency and empower investors to make well-informed decisions. A notable development is the authorization of AIF setups in the International Financial Services Centre (IFSC) in GIFT City, offering benefits like tax incentives, top-notch infrastructure, proximity to onshore markets, and exemptions for non-resident investors. (Refer section on Gift city) These advancements create additional avenues for increased investment opportunities, thereby bolstering investor engagement across the industry. Regulatory efforts are concentrated on compliance, with a focus on bolstering investor confidence, enhancing transparency, and broadening market participation.

Traditional route of Foreign funds establishing AIFs in India

Alternative Investment Funds are governed and regulated by the SEBI. According to the SEBI (Alternative Investment Funds) Regulation, 2012, AIFs are defined as a privately held and managed pool of investment fund of either domestic or foreign origin, organized in the form of a body corporate, company, LLP (limited liability partnership), or a trust. AIFs can be established in any of the forms mentioned above.

- For establishing AIF in the country, FDI in funds that were set up as trust required Government approval till the year 2015. As per the FDI policy (October 15,2020), 100% FDI is allowed in the AIFs through automatic route.
- FDI through automatic route does not require any approvals from the ministries.
- As per the rules of the FEMA 2020 Regulations, in situations where the sponsor as well as the manager are “owned and controlled” by Indian resident citizens, the AIF does not need to follow FDI downstream investment norms.
- All the downstream investments by an AIF that have been deemed to be a foreign investment are required to follow with the sectoral caps / conditions or any restrictions applicable to the company wherein such a downstream investment is made. (Downstream investments mean an indirect foreign investment, by an eligible Indian entity, into another Indian company / LLP, by way of subscription or acquisition. The downstream investment by an AIF will be considered as foreign investment if the sponsor or the investment manager is not Indian owned or controlled.
- Also, the extent of foreign investment in the corpus is not a factor to determine whether the downstream investment by the AIF is to be considered a foreign investment.
- Furthermore, in order to stipulate a special condition, a Category III AIF with any foreign investment must make portfolio investments in only such securities or instruments wherein an FPI has been permitted to invest as per the FEMA 2020 regulations.

In the International Financial Services Centre (“IFSC”) situated in GIFT City, India, funds and fund manager entities (“FMEs”) are governed by the International Financial Services Centres Authority (“IFSCA”) (Fund Management) Regulations (“FM Regulations”) and the guidelines and circulars issued by IFSCA.

Benefits of setting up AIFs through the new route - Gift City

The Gujarat International Finance Tec-City (GIFT City) project consists of a dedicated Domestic Tariff Area (DTA) and a multi-service Special Economic Zone (SEZ). GIFT City is spread out over a vast region, taking approximately 261 acres for the SEZ and 625 acres for the DTA.

The Gujarat Government to work on this ambitious project, through the Gujarat Urban construction Company Limited (GUDCL), created the Gujarat International Finance Tec-City Company Limited (GIFTCL) to lead this project. GIFT City, which is ideally situated next to the Sabarmati River, benefits from Ahmedabad's status as a major economic hub.

GIFT City is India's premier operational greenfield smart city and is India's maiden International Financial Services Centre (IFSC). The IFSC within the GIFT City was planned to serve as a crucial hub to cater the growing needs of the customers that are beyond the domestic functions. It is regulated by the International Financial Services Authority (IFSCA). The IFSC can be defined as the jurisdiction that offers a strong market for financial products and services to residents as well as nonresidents that permit transactions in currencies other than the Indian Rupee. This crucial role is assumed by the International Financial Services Centers Authority as well as the function of supervising financial services and goods within the GIFT IFSC in India. Before the IFSC was established, the regulatory responsibilities were for IFSCA were spread across domestic regulators, such as the Insurance Regulatory and Development Authority of India (IRDAI), the Pension Fund Regulatory and Development Authority (PFRDA), the Securities and Exchange Board of India (SEBI), and the

Reserve Bank of India (RBI). The necessity to improve the efficient cooperation between various regulatory agencies and to streamline regulatory operations led to the establishment of IFSCA.

The main goal of IFSCA is to develop a welcoming and business-friendly atmosphere to represent India's commitment to nurturing financial ecosystem within GIFT IFSC. It seeks to create a leading regulatory environment that not only facilitates international trade.

Real estate Investment Trusts

Real Estate Investment Trusts (REITs) are investment vehicles that enables individuals to invest in real estate without directly owning or managing properties. Introduced in India in 2014 by the Securities and Exchange Board of India (SEBI), REITs have gained traction as a means of channeling investments into income-generating real estate assets including residential, commercial, retail, industrial, and hospitality across the country.

REITs are structured as trusts that own and manage income-generating real estate properties. REITs are managed by a trustee, who oversees the operations of the trust and ensures compliance with regulations. Investors can buy units of REITs, which represent partial ownership in the underlying real estate assets. REITs are required to distribute a significant portion of their income to investors in the form of dividends to maintain their tax-exempt status.

The primary purpose of REITs is to give investors an opportunity to invest and gain exposure to a diversified portfolio of real estate assets across different sectors and geographic locations, while benefiting from professional management, liquidity, and potential income generation. Additionally, REITs offer investors the flexibility to enter and exit real estate investments easily through trading of REIT units on stock exchanges.

REITs offer investors access to a wide range of real estate assets without the need for large amounts of capital or direct property ownership. It also offers investors liquidity, as units can be bought and sold on stock exchanges, providing investors with the ability to adjust their investment portfolios quickly. Furthermore, REITs typically offer attractive dividend yields, making them appealing to income-seeking investors. Additionally, REITs benefit from professional management, which can enhance operational efficiency and potentially improve returns for investors.

However, REITs are sensitive to market conditions including changes in interest rates and economic cycles. Economic downturns can adversely affect the performance of real estate assets held by REITs, leading to lower occupancy rates and rental income. Additionally, REITs are subject to regulatory risks, including changes in tax laws and government policies that could impact their operations and profitability. REITs also carry property-specific risks, such as maintenance costs, market demand fluctuations, and environmental factors, which can have a significant impact on their performance.

REAL ESTATE INDUSTRY IN INDIA

Residential Real Estate Industry in India

Real estate is one of the most crucial and recognized sectors across the globe. It is segmented into four sub-sections: residential, commercial, retail, and hospitality. The real estate industry's growth depends on advancements in the corporate environment and the subsequent demand for office space and urban & semi-urban accommodations. The construction industry, is therefore, one of the major sectors in terms of its direct, indirect, and induced impacts on all the sectors of the economy.

In India, the real estate industry is the second-largest employment generator after agriculture. Around three houses are built per 1,000 people annually against the required construction rate of five houses per 1,000 individuals annually, as per industry estimates. This indicates that there is significant untapped potential for growth in the sector.

Key Trends in Residential Real Estate

Urbanization

The urban population is significantly growing in India. The urban population in India is estimated to have increased from 403 million (31.6% of total population) in 2012 to 508 million (35.9% of total population) in the year 2022. People living in Tier-2 and Tier-3 cities have greater purchasing power.

EMI to Income Ratio

The EMI (Equated Monthly Instalment) to Income ratio indicates percentage of income allocated towards housing costs. A higher EMI to Income ratio indicates low housing affordability as borrowers need to spend significant chunk of their income towards their monthly mortgage payments. The above data indicates that over the last three years (2021-23) major cities have seen improvement in housing affordability.

The Government has made significant efforts towards affordable housing finance, such as the Pradhan Mantri Awas Yojana (“PMAY”), which was launched in June 2015 to provide affordable housing to the urban poor. As on 1st February 2024, the Government allocated an outlay Rs. 80,671 crores under PMAY towards the completion of existing projects. However, the the outcome of this additional outlay under PMAY will remain contingent upon the efficient construction and timely delivery of houses. Data as per PMAY-U, since inception, the Government sanctioned 118.6 lakh houses under PMAY, of which 83 lakh houses were completed as of 14th May 2024.

Investments in Residential Real Estate

The residential real estate segment was performing exceptionally well during the first half of the previous decade on account of growth in the economy and the services sector which resulted in migration to metros and propelled the demand for housing units in these areas. However, problems related to elevated property prices, delayed launches by developers and stalled projects triggered some cold feet towards the sector. From the point of view of financing too, the IL&FS crisis created problems in the NBFC sector, which is a pivotal source of funding for real estate. To add to this, the coronavirus outbreak in early 2020 and the concomitant lockdowns across the country caused acute stress to the residential real estate segment during H1CY20.

After reopening of the economy post COVID-19 pandemic, there has been a notable increase in demand for residential properties, primarily driven by end-users in the affordable housing segment. Foreign investments continued to flow into the sector, aided by the easing of the pandemic situation, resumption of travel, favourable policies such as tax benefits, and advantageous currency exchange rates, which have further contributed to increased investments from Non-Resident Indians (NRIs), particularly in the residential sector.

Trend in outstanding investments

Outstanding investments in residential real estate

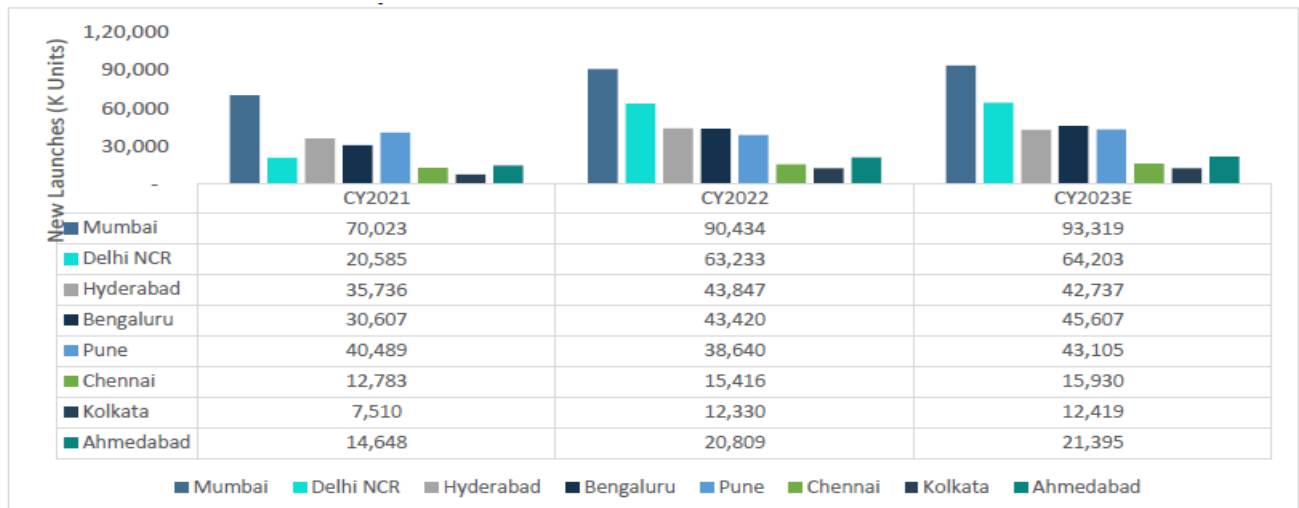

Impact of COVID-19 pandemic

In the light of the COVID-19 pandemic, the table above shows that outstanding investments across India has decreased for four consecutive years ending FY23. In the following year, the total outstanding investments dipped slightly in FY23. In Q2FY23 also we can see a decline in outstanding investments as compared to Q2FY22 possibly as even after the lockdown restrictions were eased, the economy and the real estate industry were just recovering from the effects of the Covid-19 pandemic. The investments in FY23 are expected to grow in coming years.

KEY DEMAND DRIVERS IN RESIDENTIAL REAL ESTATE

1. Increased Economic Growth and Urbanization to Boost Demand

The Indian economy has experienced steady growth in the past decade and is expected to be one of the fastest-growing economies in the post-pandemic era. Whereas the rising income and employment opportunities have led to migration to urban areas, thereby creating a greater need for real estate in major Indian cities.

2. Government Policies Enabling Demand through Greater Transparency

The real estate segment has received a massive boost from government initiatives such as the Affordable Housing Scheme, Goods and Services Tax (GST), and the Real Estate Regulation and Development Act, 2016 (RERA). While the initial months following the implementation of these initiatives created some disruption, the policies increased the transparency and competence of the sector. As a result, the confidence of domestic and foreign investors in the real estate industry witnessed a boost leading to higher FDI in the sector.

3. Rising Number of Nuclear Families

India has the most population in the world which is about 1.4 billion. The population largely consists of young and middle-aged and hence this shows that India has a huge potential consumer market and a huge housing demand gap. According to the World Bank, India's urban population will account for 36% of the total population in 2022 and 40.76% of the total population by 2030. With the deepening of the process of urbanization in India, the continuous increase of urban population and the continuous development of economy will continue to promote the development of this industry. The nuclear family concept is well-linked with the rapid urbanization of the country. According to the 2001 census, out of 19 crore households, 10 crore or a little over 50% were nuclear households. Whereas in the 2011 census, the share reached 52.1% – 13 crore nuclear out of 24.9 crore households. People migrate from one place to another in search of jobs which ultimately increases the nuclear family counts. An increase in the nuclear family will lead to an eventual growth in demand for residential units.

4. Repatriation of NRIs and HNIs

Since India is on the cusp of becoming one of the fastest-growing economies in the world, many NRIs are repatriating to their origin as they are seeing new opportunities in their own country. The shift to the homeland is estimated to have increased during COVID-19 when individuals preferred to stay close to their family members. NRIs are generally high net-worth individuals and are comfortable purchasing apartments for their convenient residences. We expect such individuals to contribute to superior housing units having better amenities and more open spaces.

5. Repatriation of NRIs and HNIs

Since India is on the cusp of becoming one of the fastest-growing economies in the world, many NRIs are repatriating to their origin as they are seeing new opportunities in their own country. NRIs are generally high net-worth individuals and are comfortable purchasing apartments for their convenient residences. We expect such individuals to contribute to superior housing units having better amenities and more open spaces.

6. Shift in Buying Behaviour

COVID-19 has shifted the attitude that resulted in consumers buying new homes. One, the financial uncertainty brought on by the pandemic is estimated to have led to many consumers considering a house as an essential financial security. Consumers are seriously evaluating their lifestyle and may want to move to larger homes, broadly considering their family size and their work-from-home & study-from-home schedules. Accordingly, the demand for projects with good architecture, uncluttered space, and recreational activities for children and the elderly is projected to increase.

7. Millennialization Tech

In India, technology is being adopted quite quickly, especially by the younger population (millennials). This group, which makes up a sizeable section of India's population, is increasing the demand for technologically advanced real estate solutions. To appeal to tech-savvy homebuyers, developers are incorporating features like energy-efficient appliances, digital payment choices, and home automation systems. Online platforms for property searches and transactions have also grown in popularity, offering sellers and buyers both convenience and transparency.

KEY CHALLENGES IN RESIDENTIAL REAL ESTATE

1. Land Availability

Litigated land is one of the challenges faced by the real estate sector and the developers. According to a survey conducted by the MahaRERA, around 16% of projects and 31% of built-up spaces are or have been in legal disputes. In Mumbai, these figures tally to about 30% of the real estate projects and 50% of the built-up space. For Thane, the corresponding figures are 26% and 36%, respectively.

2. Tax Regime Changes

In addition to the aforementioned financial challenges, the implementation of the GST is another factor that impacts the real estate industry. Before the implementation of GST, a service tax of 4.5% was applicable in the case of an under-construction property. However, post-GST, the rate has sharply risen to 12%, impairing the attractiveness for property investors. As buyers were paying registration charges and stamp duty on properties, the inclusion of GST increased the statutory cost of the property of the investor by 20%.

3. Approvals and Procedural Difficulties

The real estate sector in India is heavily regulated by the central & state governments and local bodies. Real estate developers are required to comply with a number of laws and regulations, including policies and procedures established in the Research Report on AIF industry and implemented by local authorities in relation to land acquisition, transfer of property, registration, and use of land. These laws often vary from state to state.

4. Speculation in Land and Property Prices

The prices of land and real estate in India have increased exponentially in the last decade, leading to overpricing of commercial and residential properties. On the other hand, real estate agents or brokers buy or sell property frequently with their own investments, causing property prices to surge.

The year-long surge in demand for the residential sector can be attributed to a number of encouraging announcements. In 2023, properties that were still under construction made up 74.8% of all transactions. By starting new projects, developers have been taking advantage of the thriving market. As more than 7,987 units were introduced to meet the increasing demand, the number of new project launches increased. Additionally, throughout the year, market transparency increased, making it more appealing to end users and investors outside of the traditional investor segment. The market benefited in 2023 from both a rise in foreign investments and stable levels of demand from the Emirati populace.

OUR INVESTMENT APPROACH

Our investment management is built upon four fundamental principles:

- Personal Skin in the Game
- Emphasizing capital protection and delivering risk-adjusted returns through precise asset management
- Conducting thorough due diligence and documentation to secure favourable outcomes
- Maintaining a Sharp focus on achieving exits

First, “Personal Skin in the Game”. The sponsors pool 5%-to 15% of the fund’s total corpus from their own funds. This ensures continuity, engagement and a prudent approach to investments, which have enabled outcomes to our investment portfolios. We have consistently beaten most return and exit averages in the industry. Our investors see the benefit of our own personal investments as a huge comfort factor.

Second, “Capital Protection, Risk Adjusted Returns through precise Asset Management”: involves our primary strategy of safeguarding initial investment capital from potential losses. This is achieved through rigorous risk assessment, diversification of investments, and the use of hedging strategies. Our focus extends beyond maximizing returns to effectively managing and mitigating risks. Our approach emphasizes capital protection and risk-adjusted returns through precise asset management, which includes:

- a) **Analytics and Diagnostics:** Utilizing tools and techniques to analyse market trends, asset performance, and financial metrics;
- b) **Active Portfolio Management:** Continuously monitoring and adjusting the portfolio to capitalize on opportunities and mitigate risks;
- c) **Cost Management:** Controlling operational costs and expenses to enhance overall returns;
- d) **Security and Compliance:** Ensuring that investments comply with regulatory requirements and implementing robust security measures to protect assets.

We believe this approach is essential for optimizing performance while minimizing downside risks for our clients and stakeholders, thereby fostering sustainable and resilient investment portfolios over the long term.

Third, “Thorough Due Diligence and Documentation”: Our robust approach to documentation and structuring. We structure, create security, and meticulously document investments to achieve favourable outcomes swiftly, while ensuring extensive risk protection and transactional control. Our in-house team, comprising investment analysts, credit experts, legal professionals, and secretarial staff, collaborates closely with external legal counsel and tax advisors to meticulously craft

each investment document. These documents undergo rigorous testing over time to safeguard the interests of our investors effectively.

Fourth, “Distinctive Experience in Exits” highlights our well-developed skills and profound expertise in managing exit strategies, even during challenging events that may cause delays, such as force majeure events like the Covid-19 pandemic, and transforming these situations into favourable outcomes. Our asset management team, supported by in-house experts in technical, financial, market dynamics, and accounting, maintains vigilant oversight of the performance and exit strategies for each investment.

These deep relationships, in turn, provide us with a competitive edge in attracting deal opportunities and securing transactions.

Additionally, our strategy of amalgamation and joint ventures has proven to be a significant driver of our business growth. This approach has facilitated the expansion of larger developers and has provided partnership opportunities to smaller developers, thereby contributing to our overall success.

Expanding the reach and footprint of our businesses

We believe that India's expanding population, youthful demographics, and the development of its digital, regulatory, financial, and physical infrastructure over the past decade will drive accelerated growth in the coming years. Government-initiated structural reforms, including the implementation of a unified GST system, regulations governing real estate developers, and demonetization, have catalyzed significant transformation in the real estate sector. This transformation is characterized by increased professionalism, transparency, and stronger foundational frameworks.

Recent emphasis on infrastructure development, such as the expansion of metro networks, improvements in road infrastructure, and enhanced connectivity, has notably increased demand for urban infrastructure and property valuations across the country, beyond major urban centers. Our businesses are well-positioned to capitalize on these trends, benefiting directly from the rise of urbanization and the emergence of large urban conglomerates. This strategic alignment supports our bottom-up investment approach within India's expanding economy

Leverage our core strengths to generate growth through expansion in our investor base

HNIs and UHNIs constitute our target investor base for our funds, who also co-invest in the deals managed by our fund. We intend to expand our presence and strengthen our relationships within the expanding HNI and UHNI client segment in India, positioning ourselves to benefit from the anticipated growth in our market opportunity.

To deepen our penetration and relationships within the Indian UHNI and family office client base, we are actively engaging new distribution partners. We are committed to nurturing our existing distribution partnerships while cultivating new relationships. The rapid expansion of the private banking and private capital syndication sectors has bolstered our capital pool, reflecting growth in our Assets Under Management (AUM). Moving forward, we plan to innovate new investment strategies and refine existing ones, ensuring that our investors and co-investors can capitalize on the transformative trends within the Indian economy. Securities Exchange Board of India, Act 1992 ("SEBI Act")

The main legislation governing the activities in relation to the securities markets in India is the SEBI Act and the rules, regulations and notifications framed thereunder. The SEBI Act was enacted to provide for the establishment of SEBI whose function is to protect the interests of investors and to promote the development of, and to regulate, the securities market. The SEBI Act also provides for the registration and regulation of the function of various market intermediaries including stockbrokers, depository participants, merchant bankers, portfolio managers, investment advisers, and research analysts. Pursuant to the SEBI Act, SEBI has formulated various rules and regulations to govern the functions and working of these intermediaries. SEBI also issues various circulars, notifications and guidelines from time to time in accordance with the powers vested with it under the SEBI Act. SEBI has the power to impose (i) monetary penalty under the SEBI Act and the regulations made thereunder, and (ii) penalties prescribed under various regulations, including suspending or cancelling the certificate of registration of an intermediary and initiating prosecution under the SEBI Act.

Further, SEBI has the power to conduct inspection of all intermediaries in the securities market, including, stockbrokers, investment advisers, merchant bankers, underwriters, research analysts, to ensure, amongst others, that the books of account are maintained in the manner required in accordance with applicable law.

In addition to the SEBI Act, some activities of our Company may also be governed by the rules, regulations, notifications, and circulars framed or issued by SEBI from time to time.

SEBI (Issue and Listing of Non-Convertible Securities) Regulations, 2021

The Securities and Exchange Board of India, on August 9, 2021, notified the SEBI (Issue and Listing of Non-Convertible Securities) Regulations, 2021 ("**SEBI NCS Regulation**"), thereby merging the SEBI (Issue and Listing of Debt Securities) Regulations ("**SEBI Debt Regulations**") and the SEBI (Non-Convertible Redeemable Preference Shares) Regulations, 2013 ("**NCRPS Regulations**") into a single regulation. The proposal to merge the two regulations was first introduced by way of a consultation paper released on May 19, 2021, which sought to align the extant regulations with the provisions of the Companies Act 2013, and incorporate the enhanced obligations of debenture trustees, informal guidance and provisions of circulars issued by SEBI. The SEBI NCS Regulations came in to force from the seventh day of their notification in the gazette, i.e., from August 16, 2021. The SEBI Debt Regulations and the NCRPS Regulations stand repealed from this date.

A certificate of registration is mandatory for an entity or a person to act as an AIF and such certificate shall be granted, subject to compliance with the requisite conditions under the SEBI AIF regulations. Regulations governing NBFCs

NBFCs are primarily governed by the RBI Act, the Master Direction –Reserve Bank of India (Non-Banking Financial Company –Scale Based Regulation) Directions, 2023, (Updated as at March 21,2024), Peer to Peer Lending Platform (Reserve Bank) Directions, 2017, Master Direction-Non-Banking Financial Company -Account Aggregator (Reserve Bank) Directions, 2016, and Reserve Bank Commercial Paper Directions, 2017, each as amended, modified and supplemented from time to time. In addition to these regulations, NBFCs are also governed by various circulars, notifications, guidelines and directions issued by the RBI from time to time. The major regulations governing our Company are detailed below:

SBR Framework:

RBI issued a Scale Based Regulation (SBR) through a Master Direction updated as of March 21, 2024: A Revised Regulatory Framework for NBFCs ("**SBR Framework**"), whereby NBFCs have been categorized into following four layers based on their size, activity, and perceived riskiness by the RBI:

- 1) NBFC-Base Layer ("**NBFC-BL**");
- 2) NBFC-Middle Layer ("**NBFC-ML**");
- 3) NBFC-Upper layer ("**NBFC-UL**"); and
- 4) NBFC-Top Layer ("**NBFC-TL**")

Pursuant to the SBR Framework, the criteria of asset size of non-deposit NBFCs for classification as non-systemically important has been increased from ₹5 billion to ₹10 billion ("**NBFC-ND**"). The SBR Framework Master Directions came into effect from October 01, 2022, and was further amended from time to time, pursuant to which references to NBFC-ND shall mean NBFC-BL and all references to NBFC-D and NBFC-ND-SI shall mean NBFC-ML or NBFC-UL, as the case may be. The NBFC-BL consist of (a) non-deposit taking NBFCs below the asset size of ₹1,00,000 lakh and (b) NBFCs undertaking the following activities: (i) NBFC – Peer to Peer Lending Platform (NBFC-P2P), (ii) NBFC-Account Aggregator (NBFC-AA), (iii) Non-Operative Financial Holding Company (NOFHC), and (iv) NBFCs not availing public funds and not having any customer interface. The NBFC-ML consist of (a) all deposit-taking NBFCs ("**NBFC-Ds**"), irrespective of asset size, (b) non-deposit taking NBFCs with an asset size of ₹1,00,000 lakh and above, and (c) NBFCs undertaking the following activities: (i) Standalone Primary Dealers (SPDs), (ii) Infrastructure Debt Fund - Non-Banking Financial Companies (IDF-NBFCs), (iii) Core Investment Companies (CICs), (iv) Housing Finance Companies (HFCs), and (v) Infrastructure Finance Companies (NBFC-IFCs). The NBFC-UL consist of those NBFCs which are specifically identified by RBI as warranting enhanced regulatory requirement based on a set of parameters and scoring methodology as provided in appendix to SBR Framework. The top ten eligible NBFCs in terms of their asset size shall always reside in the upper layer, irrespective of any other factor. The NBFC-TL will ideally remain empty. This layer can get populated if RBI is of the opinion that there is a substantial increase in the potential systemic risk from specific NBFC-UL. Such NBFCs shall move to the NBFC-TL.

Categorization of NBFCs carrying out specific activity

As the regulatory structure envisages scale-based as well as activity-based regulation under the SBR Framework, the following prescriptions shall apply in respect of the NBFCs:

- i) NBFC-P2P, NBFC-AA, NOFHC, and NBFCs without public funds and customer interface will always remain in the base layer of the regulatory structure.
- ii) NBFC-D, CIC, IFC, and HFC will be included in the middle layer or the upper layer (and not in the base layer), as the case may be. SPD and IDF-NBFC will always remain in the middle layer. (to be confirmed with RBI SBR circular)
- iii) The remaining NBFCs, viz., Investment and Credit Companies (NBFC-ICC), Micro Finance Institution (NBFC-MFI), NBFC-Factors, and Mortgage Guarantee Companies (NBFC-MGC) could lie in any of the layers of the regulatory structure depending on the parameters of the scale-based regulatory framework.

Government-owned NBFCs shall be placed in the base layer or middle layer, as the case may be, and will not be categorized as upper layer unless notified by the Government.

Master Direction - Reserve Bank of India (Non-Banking Financial Company–Scale Based Regulation) Directions, 2023 dated October 19, 2023 (as updated from time to time) applicable to all NBFCs (both Deposit taking and Non-Deposit taking).

The NBFCs are governed by updated Master Direction - Reserve Bank of India (Non-Banking Financial Company–Scale Based Regulation) Directions, 2023 dated October 19, 2023 (as updated from time to time) applicable to all NBFCs (both Deposit taking and Non-Deposit taking) ("Master Directions-NBFCs-SBR").

B. Significant Accounting Policies:

1. Basis of Accounting:

The financial statements are prepared in accordance with Indian Generally Accepted Accounting Principles (GAAP) under the historical cost convention on the accrual basis. GAAP comprises mandatory accounting standards as prescribed under section 133 of the Companies Act, 2013 read with Rule 7 of the Companies (Accounts) Rules, 2014 and the provisions of the Companies Act, 2013 to the extent notified. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use except where specifically stated hereunder.

2. Use of Estimates:

The preparation of financial statements in conformity with the generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3. Revenue Recognition:

Phased implementation of Unified Payments Interface

SEBI has Offer UPI Circulars in relation to streamlining the process of public offer of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, an RII had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public Issue closure to listing continued to be six working days.
- b) Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public Issue closure to listing would continue to be six Working Days during this phase.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("T+3 Notification"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

The Offer is being made under Phase III of the UPI (on a mandatory basis).

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public offers shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Offer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Offer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Offer, in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.
