SUMMARY OF OUR INDUSTRY

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers, and secondary producers.

India is the world’s second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23. India’s steel production is estimated to grow 4-7% to 123-127 MT in FY24. The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output. The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

INTERNAL RISKS

INTERNAL RISK FACTORS

1. ***We depend on the success of our relationships with our customers. We derive a significant part of our revenue from our major customers and we do not have long term contracts with these customers. If one or more of such customers choose not to source their requirements from us, our business, financial condition and results of operations may be adversely affected.***

Our top ten customers have contributed 97.86%, 98.44% and 99.94% of our revenues for the year ended March 31, 2024, March 31, 2023 and March 31, 2022 respectively based on Restated Financial Statements. However, our top customers may vary from period to period depending on the demand and thus the composition and revenue generated from these customers might change as we continue to add new customers in normal course of business. Details of our top customers are as follows:

The percentage of income derived from our top customers during the fiscal 2024, 2023 and 2022 is given below:

Sr. No.	Particulars	For the year ending March 31,					
		2024		2023		2022	
		Revenue (₹ in lakhs)	% ⁽¹⁾	Revenue (₹ in lakhs)	% ⁽¹⁾	Revenue (₹ in lakhs)	% ⁽¹⁾
1.	Top 1 Customer	442.74	15.85%	552.02	64.97%	186.70	33.07%
2.	Top 5 customers	1,933.68	69.22%	767.14	90.29%	229.42	40.62%
3.	Top 10 customers	2,733.88	97.86%	836.33	98.44%	564.46	99.94%

⁽¹⁾ Percentage (%) is calculated as a percentage of Total Sale of Products.

In addition, we have not entered into any long-term agreements with our customers and the success of our business is accordingly significantly dependent on maintaining good relationships with them. The loss of one or more of these customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition, and cash flows.

Further, there is no guarantee that we will retain the business of our existing key customers or maintain the current level of business with each of these customers. In order to retain some of our existing customers, we may also be required to offer terms to such customers which may place restraints on our resources. Additionally, our revenues may be adversely affected if there is an adverse change in any of our customer's supply chain strategies or a reduction in their outsourcing of products we offer, or if our customers -decide to choose our competitors over us or if there is a significant reduction in the volume of our business with such customers.

We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. Further, the sales volume may vary due to our customers' attempts to manage their inventory, market demand, product and supply pricing trends, change in customer preferences etc., which may result in decrease in demand or lack of commercial success of our products, which could reduce our sales and adversely affect our business, cash flows and financial conditions.

In addition, we are exposed to payment delays and/or defaults by our major customers and our financial position and financial performance are dependent on the creditworthiness of our customers. There is no guarantee that all or any of our customers will honor their outstanding amounts in time and that they will be able to fulfill their obligations, due to any financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur from all or any of our major customer, our financial performance and our operating cash flows may be adversely affected.

2. ***We are highly dependent on our suppliers for uninterrupted supply of raw-materials. We have not entered into any long-term supply agreement for the major raw materials required for manufacturing of our products. Also volatility in the prices and non-availability of these raw materials may have an adverse impact in our business prospects, results of operations and financial condition.***

We are highly dependent on S.S. Rods, S.S. Sheets, S.S. Coil and S.S. Patta Patti, stainless steel and other hardware items which are the prime raw material for our products. We procure our supply of raw materials from various vendors from local market. We have not entered into any long-term supply agreement for supply of major raw materials.

(₹ in lakhs)

Particulars	For the year ended March 31,					
	2024		2023		2022	
	Cost	Percentage (%)	Cost	Percentage (%)	Cost	Percentage (%)
Top 1 Suppliers	830.20	27.27%	430.12	57.29%	224.76	48.24%
Top 5 Suppliers	2,756.98	90.56%	721.38	96.07%	449.05	96.38%
Top 10 Suppliers	2,961.20	97.25%	746.19	99.38%	465.92	100.00%

Currently, we have been able to secure timely supply of required raw material for our existing activity. Raw materials are easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material. In case of any disruption in supply of raw materials from these suppliers or our procurement of raw materials in terms are not favorable to us; it will adversely affect our operations and financial cost. Further in case our Company is unable to procure the requisite quantities of raw materials well in time and at competitive prices, the performance of our company may be affected, thus adversely affecting our business, prospects, results of operations and financial condition. Moreover, we are dependent upon third parties for supply of our raw materials and any disruption in their supply could disrupt our business and adversely affect our financial results.

3. ***Our business operations are majorly concentrated in certain geographical regions and any adverse developments affecting our operations in these regions could have a significant impact on our revenue and results of operations.***

Our company's manufacturing unit is based in Gujarat, specifically in the district of Rajkot. Due to our processing unit is concentrated in this region, we are vulnerable to local, regional, and environmental factors including social and civil unrest, regional conflicts, civil disturbances, economic and weather conditions, natural disasters, demographic and population changes, and other unforeseen events. These disruptions could lead to damage or destruction of our processing capabilities, significant transport delays for our products and raw materials, loss of key personnel, and other adverse effects on our business, financial condition, and operations. Additionally, a significant portion of our sales come from customers in Gujarat State. This geographical concentration increases our exposure to competition and potential adverse economic and demographic changes in the region, which could affect our business, financial condition, and operations.

(₹ in lakhs, except for percentage)

Regional breakdown	FY 2023-24		FY 2022-23		FY 2021-22	
	Amount	% of Revenue	Amount	% of Revenue	Amount	% of Revenue
West	1916.14	68.77	795.42	93.63	477.02	99.86
North	48.89	1.75	25.04	2.95	-	-
South	-	-	-	-	-	-
East	821.28	29.48	29.12	3.43	0.66	0.14
Total	2786.3	100.00	849.58	100.00	477.68	100.00

As we expand into new markets and geographical areas, we may face competition from national and local players with established local presences and stronger relationships with local customers, government authorities, and suppliers. This could put us at a competitive disadvantage. While we believe we have the necessary expertise and vision to expand into other markets, investors should consider the risks, losses, and challenges we face and should not rely solely on our past performance as an indication of our future performance.

4. Our Company has reported certain negative cash flows from its operating and investing activities, details of which are given below. Sustained negative cash flow could impact our growth and business in the future.

Our Company had reported certain negative cash flows from its operating, investing and financing activities in the previous years as per the restated financial statements and the same are summarized as under:

(₹ in lakhs)

Particulars	For the year ending March 31,		
	2024	2023	2022
Net cash flow from Operating activities	(15.36)	(102.18)	82.46
Net cash flow from Investing activities	(268.20)	(21.53)	(184.33)

For details, please refer “Management’s Discussion and Analysis of Financial Conditions and Results of Operations of our Company” on page no. 183 of this Draft Prospectus.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

5. The intellectual Property Rights used by our company are “objected” and are not registered in the name of our company. Any failure to protect our intellectual property rights may adversely affect our business.

As on the date of the Draft Prospectus, the company is using the label bearing certificate No. 1383468 since incorporation, whose rightful owner is Hiteshbhai Mansukhbhai Bhuva however, the said trademark has been assigned by him in the name of the company with all the exclusive rights and without any consideration. In case of expiry/ non- renewal/ cancellation/ breach of the agreements and any changes in the terms of the agreements, we may face damages which could impact the company’s business operations or projected revenue.

Our Company has applied for the registration of the label bearing no. 6193057 as the Trademark Application is  under the process of registration and is open for objection on relative grounds of refusal under Section 11

of the Act because the same/similar trademark(s) is/are already on record of the register for the same or similar goods/services. "The objection is raised under S 11 (1) of the Trademarks Act, 1999, as the mark is identical with or similar to earlier marks in respect of identical or similar description of goods or services and because of such identity or similarity there exists a likelihood of confusion on the part of the public." Further, Infringement of third-party intellectual property rights or failure to protect our own intellectual property can have negative consequences.

In addition, infringement claims can damage our reputation and discourage potential investors, partners, or customers. Additionally, if we fail to protect our own intellectual property, our competitors or other third parties may copy, steal, or misuse our ideas, products, or services. This can lead to lost revenues, decreased market share, or erosion of our competitive advantage. Moreover, any unauthorized use, reproduction, or distribution of our copyrighted material without our permission will result in legal action and may lead to financial penalties, damage to our brand reputation. It is essential for us to protect our copyrighted material and ensure that it is used only with our permission, to avoid any negative impact on our business operations. Defending our intellectual property rights can be expensive and time consuming, and we may not be able to prevent others from infringing or challenging our rights.

6. ***We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders 100% of the Plant & Machinery, as specified in the Objects of the Issue chapter. Any delay in procurement of such Plant & Machinery may delay the schedule of implementation and may also lead to increase in cost of these Plant & Machinery, further affecting our revenue and profitability.***

Although we have identified the installation of Plant & Machinery required. However, we are yet to place orders for 100% installation of Plant & Machinery worth Rs. 528.53 Lakhs as detailed in the "Objects of the Issue" beginning on page 72 of this Draft Prospectus. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed expansion and can also compel us to buy the same at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

7. ***Our Company has entered into certain related party transactions in the past and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.***

Our Company has entered into certain transactions with our related parties including our Promoters, Promoter Group, Directors and their relatives. While we believe that all such transactions have been conducted on the arm's length basis, we cannot assure you that we might have obtained more favorable terms had such transactions been entered into with unrelated parties.

Furthermore, it is likely that we may enter into related party transactions in the future. We cannot assure you that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, cash flows and financial condition. For details, please refer "Annexure 27 – Related Party Transactions" on page no. 174 of this Draft Prospectus.

8. ***The demand and pricing in the steel and steel products industry is volatile and is sensitive to the cyclical nature of the industries it serves.***

Steel prices fluctuate based on a number of factors, such as, the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, international production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as, the infrastructure, construction, automotive and machinery industries. When downturns occur in these economies or sectors, we may experience decreased demand for our products, which may lead to a decrease in steel and steel product prices, which may, in turn, have a material adverse effect on our business, results of operations, financial condition and prospects.

Low steel prices adversely affect the businesses and results of operations of steel product producers generally, including ours, resulting in lower revenue and margins and write-downs of products and raw material inventories. In addition, the volatility, length and nature of business cycles affecting the steel and steel products industry have become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects. In addition, substantial decreases in steel and steel product prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery will require a broad economic recovery, in order to underpin an increase in real demand for steel and steel products by end users.

9. *Our Company has incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and results of operations.*

As on March 31, 2024 we had ₹ 354.91 lakhs of outstanding debt on our balance sheet (including current maturities but excluding non-fund based) HDFC Bank. In the event that we fail to meet our debt servicing obligations under our financing documents, the relevant lenders could declare us to be in default, accelerate the maturity of our obligations or sell our Company's movable and immovable assets.

Our business requires funding for capital expenditure and working capital requirements. The actual amount and timing of future capital expenditure may depend on several factors, among others, new opportunities, availability of land, regulatory approvals, regulatory changes, economic conditions, technological changes and market developments in our industry. Our sources of additional funding, if required, to meet our capital expenditure may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations.

In case there is insufficient cash flow to meet our working capital requirement or we are unable to arrange the same from other sources or there is delay in disbursement of arranged funds, or there is any increase in interest rate on our borrowings, it may adversely affect our operations and profitability. These factors may result in an increased amount of short-term borrowings. Continuous increase of our working capital requirements may have an adverse effect on our results of operations and financial condition. Further our ability to arrange for additional funds on acceptable terms is subject to a variety of uncertainties, including future results of operations, financial condition and cash flows; economic, political conditions and market scenario for our products; costs of financing, liquidity and overall condition of financial and capital markets in India; issuance of necessary business/government licenses, approvals and other risks associated with our businesses; and limitations on our ability to raise capital in capital markets and conditions of the Indian and other capital markets in which we may seek to raise funds. Any such inability to raise sufficient funds could have a material adverse effect on our business and results of operations.

Further, our level of indebtedness has important consequences to our Company, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry; affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

If any of these risks were to materialise, our business and results of operations may be adversely affected.

10. *Improper handling of machineries could result in accidents and may lead to loss of life and may have an impact on the image of our business which could have an adverse effect on our net sales, profitability and results of our operations.*

Improper handling of machines used in the business line of the Company can result into accidents at times and may lead to loss of life of the employees and the Company could face liabilities that may adversely affect its profits. Our Company has been executing the variety of products using various machineries & equipment. Our Company has insured policies cover and has undertaken adequate safety measures, which have minimized the loss of three crucial

M's viz. men, material and machines. Also, our company employs skilled manpower to handle materials and machines and provide requisite in-house training for the same. In spite of the same, in future due to improper handling of machineries which could result in accidents, it could have an adverse effect on our net sales, profitability and results of our operations.

11. *We have not commissioned an industry report for the disclosures made in the section titled 'Industry Overview' and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

Accordingly, investors should read the industry related disclosure in this Draft Prospectus in this context.

12. *Our Company is dependent on the continuing operation of our manufacturing facilities. Any significant interruption in manufacturing at our facilities could have a material adverse effect on our business, results of operations and financial condition.*

Our Company manufactures substantially all of the products at our manufacturing facility located at Rajkot, which are subject to the normal risks of industrial production, including equipment breakdowns, labour stoppages, natural disasters, industrial accidents, power interruptions our inability to respond to technological advances and emerging industry standards and practices in the industry and the need to comply with the directives of relevant government authorities. In case of any disruption at such facilities, it may adversely affect the manufacturing cycle, and may lead to time over-run in the execution of the project.

Our manufacturing facility requires a significant amount and continuous supply of electricity and any shortage or non-availability of electricity may adversely affect our operations. Our Company depends on Paschim Gujarat Vij Co. Ltd. for supply of our energy requirements. For further information, see "Our Business" on page no. 100 of the Draft Prospectus.

13. *Any reduction in the demand for our products could lead to underutilization of our manufacturing capacity. We may also face surplus production of a particular product due to various reasons including inaccurate forecasting of customer requirements, which could adversely affect our business, results of operations, financial condition and cash flows.*

We face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production (thereby delaying delivery of products manufactured by us) by customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity.

Further, we make significant decisions, including determining the levels of business that we will seek and accept,

production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand for their products (which are in turn manufactured by us) could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. Any such underutilization of our manufacturing facility could adversely affect our business, results of operations, financial condition and cash flows.

14. We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licenses or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operation.

Our Company requires certain statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition.

Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Our Company requires the following statutory and regulatory registrations, licenses, permits and approvals for our business but the same have not been obtained/not renewed by us, as on date of this Draft Prospectus.

Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of the relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business. If we fail to comply with all the regulations applicable to us or if the regulations governing our business or their manner of implementation change, we may incur increased costs, or be subject to penalties or may suffer a disruption in our business activities, any of which, could adversely affect our business or results of operations. For further details, please see "Key Industry Regulations and Policies" and "Government and Other Statutory Approvals" beginning on page no 114 and 198 respectively of this Draft Prospectus.

15. Our industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

We believe that the industry in which we operate faces competitive pressures in recruiting and retaining skilled and unskilled labour. Our industry being labour intensive is highly dependent on labour force for carrying out its manufacturing operations. Shortage of skilled / unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. We have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past, however there can be no assurance that we will not experience any such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

16. Our success significantly depends upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract, hire, train and retain key managerial personnel may adversely affect the operations of our Company.

Our Company is promoted by a group of individuals of 6. The success of our business operations is attributable to our Promoters, Directors and key management personnel. We believe that our relation with our Promoters, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We believe that the inputs and experience of our promoters are factors for the growth and development of our business and the strategic direction taken by our Company. We benefit from our relationship with our Promoters and Key Managerial Persons and our success depends upon their continuing services, who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business.

Our Directors have built relations with clients and other persons are connected with us. Our success is substantially dependent on the expertise and services of our Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

Further, our Promoters have also promoted other companies and may continue to do so. If they divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. Any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

17. We face competition in our business from both organized and unorganized sector. Such competition may have a negative impact on our business prospects, future performance and financial condition.

The industry, in which we are operating, is increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations.

There are various factors that could impair our ability to maintain our current levels of revenues and profitability in our goods transportation business, including the following:

- ✓ competition with other companies offering better pricing for the goods manufactured, some of which may have a wider range of product portfolio, and may have greater capital resources than we do;
- ✓ solicitation by customers of bids from multiple manufacturers and the resulting depression of the bidding prices or loss of business to competitors;
- ✓ development of an operational model similar to ours by a competitor with sufficient financial resources and comparable experience in the steel and steel products industry;
- ✓ establishment of better relationships by our competitors with their customers; and
- ✓ the small unorganized players at a regional level may not comply with applicable statutory and regulatory requirements and due to which they may be able to operate at lower cost and consequently offer lower prices than us.

There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business prospects, future performance, financial condition and results of operations.

Our Company's competitors may enjoy potential competitive advantages over us and may successfully attract our customers to their products/ services by matching or exceeding what we offer to our customers, such as:

- ✓ greater name/brand recognition, a longer operating history, wider geographical reach and wider customer base and extensive international operations;

- ✓ engage in price competition, reducing the product pricing;
- ✓ greater financial, technical and other resources.

There can be no assurance that we will have sufficient resources to respond to competitors' investments in geographical and customer network and pricing and promotional programs.

If our Company is unable to effectively compete with other participants, whether on the basis of pricing, product quality, services or otherwise, it might not be able to attract new customers or retain existing customers, and this could adversely affect our business, financial condition and results of operations.

18. *We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.*

We are engaged in manufacturing and fabrication of various steel- based hardware products which are meant for its application in various sectors such as housing, infrastructure, agriculture, automotive, power, cement, mining, solar power and engineering. We manufacture various hardware products like door kits, cut & butt hinges, parliament hinges, W, Z & duck hinges, gate hook etc. Further our Product Portfolio includes all types of aldrop, latch, handle, tower bolt, shelf bottom etc. Moreover, we are also engaged in trading of products such as door stopper, magnet, table bracket, bed lifter, bell magnet etc. Our company business needs substantial working capital and financing in the form of fund and non-fund based working capital facilities to meet its requirements.

In many cases, a significant amount of our working capital is required to finance day-to-day operations, such as purchasing inventory, managing accounts payable and receivable, and meeting other short-term financial obligations. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. We intend to continue growing by expanding our business operations. This may result in increase in the quantum of our current assets. Our working capital requirements may increase if the payment terms in our agreements include reduced advance payments or longer payment schedules. These factors may result in increases in the amount of our receivables and may result in increases in any future short-term borrowings.

Our sources of additional financing, required to meet our working capital needs, may include the incurrence of debt, the issue of equity or debt securities or a combination of both. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, which may have a significant effect on our profitability and cash flows. We may also become subject to additional covenants, which could limit our ability to access cash flows from operations and undertake certain types of transactions.

Continued increases in our working capital requirements may have an adverse effect on our results of operations, cash flows and financial condition and our inability to maintain sufficient cash flow, credit facility and other sources of fund, in a timely manner, or at all, to meet the requirement of working capital could adversely affect our financial condition and result of our operations. For further details regarding working capital requirement, please refer to the chapter titled "*Objects of the Issue*" beginning on page 72 of this Draft Prospectus.

19. *We could be adversely affected due to misconduct or errors of our employees that are difficult to detect and any such incidents could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and damage our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

20. *Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.*

Our company faces potential risks related to incidents of theft or damage to inventory. While we have not

encountered such situations in the past, we acknowledge that there is a possibility of experiencing inventory losses due to various factors such as employee theft, vendor fraud, and general administrative errors. These incidents could have a negative impact on the results of operations and financial condition. During the execution of the contract and up to defect liability period we are generally fully liable to compensate all concerned for any loss, damage, or destruction of work, structure, property etc. including third party risk arising due to causes attributable to us.

Despite implementing security measures and internal controls, there is no guarantee that we will completely avoid instances of fraud, theft, employee negligence, or security lapses in the future. Any such occurrence could lead to significant financial losses and affect our overall business performance.

Although we have insurance coverage against losses due to theft, fire, breakage, or damage caused by other casualties, the extent of coverage may not fully mitigate the financial impact of such incidents on our operations and financial condition. In some cases, the losses incurred may exceed the insurance coverage, resulting in additional financial strain for the company.

- 21. *In addition to regular remuneration, other benefits and expense reimbursement our Promoters, Directors, key managerial personnel or senior management hold a vested interest in our Company; to the extent of their shareholding and associated dividend entitlements. They also have a stake in transactions involving our company, whether with themselves individually or with our group companies/entities. Our Company in future may enter in related party transactions subject to necessary compliances.***

Our Promoters, Directors, key managerial personnel or senior management are interested in our Company to the extent of their shareholding and associated dividend entitlements thereon in our Company, in addition to regular remuneration or benefits and expenses reimbursement. Our Promoters, Directors, key managerial personnel or senior management are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Company/Entity. All transactions with related parties entered into by the company in past were at arm's length basis, in compliance with applicable provisions of Companies Act, 2013 and other applicable provisions. Furthermore, it is likely that we may enter into related party transactions in the future.

Additionally, our Company may enter in related party transactions in future subject to necessary compliances in accordance with relevant acts, rules and regulations. For details of transactions already executed by our Company with our Promoters, Directors and Group Companies/Entities during last three years and stub period, please refer to the "Annexure 27 - Related Party Transaction" under the Chapter titled "Financial Statements" beginning on Page No. 174 of this Draft Prospectus.

Furthermore, it is likely that we may enter into related party transactions in the future. Any future transactions with our related parties could potentially involve conflicts of interest. Accordingly, there can be no assurance that such transactions, individually or in aggregate, will not have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

- 22. *Our insurance coverage may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.***

Our business, manufacturing facilities, plant and machinery and other assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be fully compensated by insurance. There can be no assurance that the terms of our insurance policies will be adequate to cover any damage or loss suffered by our Company or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

Further, our Company is required to renew these insurance policies from time to time and in the event, we fail to renew the insurance policies within the time period prescribed in the respective insurance policies or not obtain at all, our Company may face significant uninsured losses. If our Company suffers a large uninsured loss or if any insured loss suffered, significantly exceeds our insurance coverage, our business, financial condition and results of operations may be adversely affected.

23. All of our revenue from operations are generated from India. Any adverse development affecting our operations in India could have an adverse impact on our business, financial condition and results of operations.

We derive 100% of our revenue from operations from India. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial condition and result of operations.

The concentration of our business in manufacturing of open ended yarn, subjects us to various risks, including but not limited to:

Regional slowdown in Industrial activities;

- vulnerability to change of policies, laws and regulations or the political and economic environment;
- constraint on our ability to diversify across states; and
- perception by our potential clients that we are a regional company, which may hamper us from competing or securing orders for large and complex projects at the national level.

Further, factors such as competition, culture, regulatory regimes, business practices and customs, behavior and preferences in the Countries and State where we may plan to expand our operations may differ from India, and our experience in the India may not be applicable to such other Countries. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national player, but also local players who have an established local presence, are more familiar with local regulations, business practices and customs, have stronger relationships with local contractors/service provider.

We may not be able to leverage our experience in these regions to expand our operations in other parts of India and outside India.

24. Any variation in the utilization of our Net Proceeds as disclosed in this Draft Prospectus would be subject to certain compliance requirements, including prior shareholders' approval.

The deployment of the funds towards the objects of the Issue is entirely at the discretion of the Board and our Board will monitor the utilisation of Net Proceeds through its Audit Committee. Further, our Promoter or controlling shareholders would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue, at a price and manner as specified in Chapter VI-A of the SEBI ICDR Regulations pursuant to the SEBI ICDR (Second Amendment) Regulations, 2016 dated February 17, 2016. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of our Net Proceeds, even if such variation is in our interest. Further, we cannot assure you that our Promoter or the controlling shareholders will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

Our Company will disclose the utilisation of the Net Proceeds under a separate head along with details in its balance sheet until the Net Proceeds remain unutilised, clearly specifying the purpose for which the Net Proceeds have been utilised. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our operational and financial performance.

25. The Objects of the Issue for which funds are being raised, are based on our management estimates and the same have not been appraised by any bank or financial institution or any independent agency. The deployment of funds in the project is entirely at our discretion, based on the parameters as mentioned in the chapter titled as "Objects of the Issue".

The fund requirement and deployment, as mentioned in the chapter titled as "Objects of the Issue" on page 72 of this Draft Prospectus is based on the estimates of our management and has not been appraised by any bank or financial institution or any other independent agency. These fund requirements are based on our current business plan. We

cannot assure that the current business plan will be implemented in its entirety or at all. In view of the highly competitive and dynamic nature of our business, we may have to revise our business plan from time to time and consequently these fund requirements. The deployment of the funds as stated under chapter titled “Objects of the Issue” on page 72 of this Draft Prospectus is at the discretion of our Board of Directors and is not subject to monitoring by any external independent agency. Further, we cannot assure that the actual costs or schedule of implementation under chapter titled “Objects of the Issue” will not vary from the estimated costs or schedule of implementation. Any such variance may be on account of one or more factors, some of which may be beyond our control and will be subject applicable rules and regulations. The occurrence of any such event may delay our business plans and/or may have an adverse bearing on our expected revenues and earnings.

26. *Our Promoters and Promoter Group will continue to retain majority shareholding in us after the Issue, which will allow them to exercise significant influence over us and potentially create conflicts of interest.*

The current Issue includes fresh issue of Equity Shares. Our Promoter and Promoter Group may beneficially own approximately [●] % of our post-Issue equity share capital. As a result, the Promoter Group may have the ability to control our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of the Company, impede a merger, consolidation, takeover or other business combination involving the Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of the Company even if it is in the Company’s best interest. In addition, for so long as the Promoter Group continues to exercise significant control over the Company, they may influence the material policies of the Company in a manner that could conflict with the interests of our other shareholders. The Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

27. *Our inability to manage growth could disrupt our business and reduce our profitability.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our businesses, as well as the development of our new products portfolio. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, maintaining good relationships with employees for retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

28. *Our ability to pay any dividends will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures. Moreover, we might not sustain historical dividend levels moving forward.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

For details of our Dividend history refer to the Section “Dividend Policy” on page 147 of the Draft Prospectus. While we have paid dividends in the past, there can be no assurance as to whether we will pay dividends in the future and, if so, the level of such future dividends.

29. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of

Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

30. *The rate of interest for the loans obtained by us from the banks and Financial Institutions is variable and any increase in interest rates may adversely affect our results of operations and financial condition.*

Our Company is susceptible to changes in interest rates and the risks arising there from. Our sanction letters provide for interest at variable rates with a provision for the periodic resetting of interest rates. Further the lenders are entitled to change the applicable rate of interest, which is a combination of a base rate that depends upon the policies of the RBI and a contractually agreed spread, and in the event of an adverse change in our Company's credit risk rating. For further details of interest payable on our borrowings, please refer to the chapter titled "Statement of Financial Indebtedness" on page no. 192 of this Draft Prospectus. Further, in recent years, the Government of India has taken measures to control inflation, which have included tightening the monetary policy by raising interest rates. As such, any increase in interest rates may have an adverse effect on our business, results of operations, cash flows and financial condition.

31. *Changes in technology may render our current technologies obsolete or require us to make substantial investments.*

To remain competitive and efficient, modernization and technology upgradation are crucial for reducing costs and increasing output. Our business heavily relies on technology and machinery to deliver quality services. However, there is a risk of our technology and machinery becoming obsolete over time or not being upgraded timely, which can adversely impact our operations and financial condition, leading to a loss of competitive edge in the market. While we believe that we have implemented updated technology, we understand the importance of continuous improvement. We are committed to staying abreast of the latest technological standards and trends to enhance our capabilities. In the event of a new technology emerging in our industry, we may be required to invest in adopting that technology or upgrading our existing machinery and equipment to remain competitive.

The costs associated with upgrading technology and modernizing machinery are significant, and they can have a substantial impact on our finances and operations. These investments may lead to higher capital expenditures and can temporarily affect our profitability and cash flow. We must carefully assess the potential benefits and returns on such investments to ensure they align with our long-term growth objectives.

Our ability to successfully implement technology upgrades and modernization efforts depends on various factors, including availability of skilled technicians, compatibility of new technology with existing systems, and adequate financial resources. Delays or challenges in adopting new technology can hinder our operational efficiency and competitiveness in the market.

32. *Any delay or defaults in receipt of payments or dues from our customers could result in a reduction of our profits.*

We regularly commit resources prior to receiving payments from our customer. We may be subject to working capital shortages due to delays or defaults in receipt of payments or dues from such customers. If our customers default in their payments or if any order/ assignment in which we have invested significant resources is delayed, cancelled or curtailed, it could have a material adverse effect on our business, financial condition and results of operations.

33. *We have not made any alternate arrangements for financing the 'Objects of the Issue'. Any shortfall in raising or meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for our working capital requirements as per the Objects of the Issue. Over the period of time, we have met our capital requirements through funding from our internal accruals. Any shortfall in our net cash flows, internal accruals and our inability to raise institutional debt in future would result in us to borrow fund, which may be repayable on demand, which in turn may increase our financial costs, affect our Promoter's group entity's liquidity and restrict future funding from them in urgent situations, thus

negatively affecting our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details please refer “Objects of the Issue” on page no 72 of this Draft Prospectus.

34. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange(s) which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management’s attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we might have to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner. This could have an adverse effect on our profit and reputation.

35. *Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.*

SEBI and the Stock Exchanges, in the past, have introduced various pre-emptive surveillance measures with respect to the shares of listed companies in India (the “Listed Securities”) in order to enhance market integrity, safeguard the interests of investors and potential market abuses. In addition to various surveillance measures already implemented, and in order to further safeguard the interest of investors, the SEBI and the Stock Exchanges have introduced additional surveillance measures (“ASM”) and graded surveillance measures (“GSM”).

ASM is conducted by the Stock Exchanges on Listed Securities with surveillance concerns based on certain objective parameters such as share price, price-to-earnings ratio, percentage of delivery, client concentration, variation in volume of shares and volatility of shares, among other things. GSM is conducted by the Stock Exchanges on Listed Securities where their price quoted on the Stock Exchanges is not commensurate with, among other things, the financial performance and financial condition measures such as earnings, book value, fixed assets, net-worth, other measures such as price-to-earnings multiple and market capitalization and overall financial position of the concerned listed company, the Listed Securities of which are subject to GSM.

Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company. Any such instance may result in a loss of our reputation and diversion of our management’s attention and may also decrease the market price of our Equity Shares which could cause you to lose some or all of your investment.

36. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by

our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

37. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with our future performance;
- Adverse media reports about us or our shareholders;
- Future sales of the Equity Shares;
- Variations in our half-yearly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about the performance of companies engaged in industrial capital goods sector generally;
- Perception in the market about investments in the Industrial sector capital goods;
- Significant developments in the regulation of the trading and distribution industry in our key trade locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations.

There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share. Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

38. *Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 12%, in excess of ₹ 1,25,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

39. *The ability of Indian companies to raise foreign capital may be constrained by Indian law.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

40. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

41. Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by broker. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

42. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of BSE in a timely manner, or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of BSE. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

EXTERNAL RISK FACTORS

43. Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and cash flows. Investors can be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares or dividend paid thereon.

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and cashflows, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

For instance, due to the COVID-19 pandemic, the Government of India also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments.

The Government of India has also proposed an alteration to the concessional basic customs duty rate on drugs, medicines, diagnostic kits or equipment and bulk drugs used in the manufacture of drugs and specified goods for use in the pharmaceutical and bio-technology sectors imported for use in research and development. In respect of goods and services tax ("GST"), the Government of India has restricted the availability of input tax credit in certain circumstances, such as where a vendor has been non-compliant with furnishing details of supply made to us or discharging GST. Further, the Finance Act, 2023 has proposed to consider perquisites or benefits arising from business whether convertible into money or not or payable in cash or kind, as taxable income. Such changes may adversely affect our business, results of operations, financial condition and cash flows.

We have not fully determined the effect of these recent and proposed laws and regulations on our business. We cannot predict whether any amendments made pursuant to the Finance Act 2023 would have an adverse effect on our business, results of operations, financial condition and cash flows. Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws

governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. Uncertainty in the applicability, interpretation, or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current businesses or restrict our ability to grow our businesses in the future.

Our Company cannot predict whether any tax laws or other regulations affecting it will be enacted or predict the nature and effect of any such laws or regulations or whether, if at all, any laws or regulations would have an adverse effect on our business, results of operations, financial condition and cash flows.

44. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

45. System failures or inadequacy and security breaches in computer systems may adversely affect our business.

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of services our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any failure to effectively maintain or improve or upgrade our systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

46. With time we might be liable to other labor laws which were not applicable before leading to increase cost and time to be invested in its compliance.

Employees form the integral part of the operation of our business. Any labor disputes or unrests could lead to lost production, increased costs or delays which could lead to penalties. We are subject to a number of stringent labor legislation that protects the interests of workers and defines our duties and obligations towards them in the capacity of principal employers, including legislations that sets forth detailed procedures for employee removal and dispute resolution and impose financial obligations on us. We are also subject to state and local laws and regulations. If labor laws become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, results of operations, financial condition and cash flows. Any organizational changes, including changes in salaries and wages and other employee benefits that are, or are perceived to be negative, could result in an increased attrition rate. We cannot assure you that there may not be incidences of labor unrest and absenteeism from work by some of our employees. Labour shortages could increase the cost of labor and hinder our productivity and ability to adhere to our delivery schedules for our projects, which would materially and adversely affect our business, financial condition, results of operations and prospects.

47. Our Company is subject to risk arising from changes in interest rates and banking policies.

Increased interest rates will have a bearing on profitability and credit controls will have an effect on our liquidity and will have serious effects on adequate working capital requirements. We are dependent on various banks for arranging of our working capital requirement etc. Accordingly, any change in the existing banking policies or increase in interest rates may have an adverse impact on profitability of our company.

48. If inflation were to rise in India, we might not be able to increase the prices of our services at a proportional rate in order to pass costs on to our customers and our profits might decline.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of transportation, wages, raw materials and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and may adversely affect our business, cash flows and financial condition. In particular, we might not be able to reduce our costs or increase the amount of commission to pass the increase in costs on to our customer. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the Government of India has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

49. *Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.*

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

50. *A decline in economic growth or political instability nationally or internationally or changes in the Government in India could adversely affect our business.*

Our performance and the growth of our business are necessarily dependent on the health and performance of the overall Indian economy. In the recent past, Indian economy has been affected by global economic uncertainties and liquidity crisis, domestic policy and political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture, rising inflation rates and various other factor Risk management initiatives by banks and lenders in such circumstances could affect the availability of funds in the future or the withdrawal of our existing credit facilities. The Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our business. Any downturn in the macroeconomic environment in India could adversely affect our business, financial condition, results of operation and the trading price of our Equity Shares. Volatility, negativity, or uncertain economic conditions could undermine the business confidence and could have a significant impact on our results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Further, our performance and the market price and liquidity of the Equity Shares may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The GoI has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. Our business, the market price and liquidity of the Equity Shares may be affected by changes in GoI policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

51. *Any disproportionate increase in labor costs including increase in wage/salary demand, labor unrest or labor claims arising from accidents may adversely affect our business operations and financial conditions.*

Our increasing business operations may require our employee strength to increase in future. In the past our Company has not experienced any labor unrest, but there is no assurance that it will not experience the same at any time in the future. Also, there is a possibility that the labour costs increase disproportionately due to increase in wage/salary demand. In this event, if our Company is unable to pass on the increased costs to our customers, our business operations and financial conditions may be adversely affected.

52. *Any Penalty or demand raised by statutory authorities in future will affect our financial position of the Company.*

Our Company is engaged in the manufacturing business, which attracts tax liability such as Goods and Service tax and Income tax as per the applicable provisions of Law. We are also subject to the labour laws like depositing of contributions with Provident Fund, Employee State Insurance and Professional Tax. Any demand or penalty raised

by the concerned authority in future for any previous year and current year will affect the financial position of the Company.

53. Regional hostilities, terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving India and other countries may result in a loss of investor confidence and adversely affect the financial markets and our business.

Terrorist attacks, civil unrest and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. In addition, the Asian region has from time-to-time experienced instances of civil unrest and hostilities among neighboring countries. Hostilities and tensions may occur in the future and on a wider scale. Such activities in India may result in investor concern about stability in the region, which may adversely affect the price of our Equity Shares. Events of this nature in the future, as well as social and civil unrest within other countries in the world, could influence the Indian economy and could have an adverse effect on the market for securities of Indian companies, including our Equity Shares.

GLOBAL ECONOMY

Global growth is projected to be in line with the April 2024 World Economic Outlook (WEO) forecast, at 3.2 percent in 2024 and 3.3 percent in 2025. However, varied momentum in activity at the turn of the year has somewhat narrowed the output divergence across economies as cyclical factors wane and activity becomes better aligned with its potential. Services price inflation is holding up progress on disinflation, which is complicating monetary policy normalization. Upside risks to inflation have thus increased, raising the prospect of higher-for-even-longer interest rates, in the context of escalating trade tensions and increased policy uncertainty. To manage these risks and preserve growth, the policy mix should be sequenced carefully to achieve price stability and replenish diminished buffers. Global activity and world trade firmed up at the turn of the year, with trade spurred by strong exports from Asia, particularly in the technology sector. Relative to the April 2024 WEO, first quarter growth surprised on the upside in many countries, although downside surprises in Japan and the United States were notable. In the United States, after a sustained period of strong outperformance, a sharper-than-expected slowdown in growth reflected moderating consumption and a negative contribution from net trade. In Japan, the negative growth surprise stemmed from temporary supply disruptions linked to the shutdown of a major automobile plant in the first quarter. In contrast, shoots of economic recovery materialized in Europe, led by an improvement in services activity. In China, resurgent domestic consumption propelled the positive upside in the first quarter, aided by what looked to be a temporary surge in exports belatedly reconnecting with last year’s rise in global demand. These developments have narrowed the output divergences somewhat across economies, as cyclical factors wane and activity becomes better aligned with its potential.

Meanwhile, the momentum on global disinflation is slowing, signaling bumps along the path. This reflects different sectoral dynamics: the persistence of higher-than-average inflation in services prices, tempered to some extent by stronger disinflation in the prices of goods (Figure 1). Nominal wage growth remains brisk, above price inflation in some countries, partly reflecting the outcome of wage negotiations earlier this year and short-term inflation that remain above target. The uptick in sequential inflation in the United States during the first quarter has delayed policy normalization. This has put other advanced economies, such as the euro area and Canada, where underlying inflation is cooling more in line with expectations, ahead of the United States in the easing cycle. At the same time, a number of central banks in emerging market economies remain cautious in regard to cutting rates owing to external risks triggered by changes in interest rate differentials and associated depreciation of those economies’ currencies against the dollar.

Figure 1. Sequential Core Inflation
(Percent, three-month-over-three-month, annualized)

Global financial conditions remain accommodative. Although longer-term yields have generally drifted upward, in tandem with the repricing of policy paths, buoyant corporate valuations have kept financial conditions accommodative, broadly at the level of the April WEO. The increase in yields is likely to put pressure on fiscal discipline, however, which in some countries is already strained by the inability to rein in spending or raise taxes.

OVERVIEW ON INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

MARKET SIZE

GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is

committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net

employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to Industry, Consumer Affairs, Food and Public Distribution and Textiles. Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

ROAD AHEAD

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4% in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Note: Conversion rate used for January 2024 is Rs.1 = US\$ 0.012

IRON & STEEL INDUSTRY IN INDIA

INTRODUCTION

One of the primary forces behind industrialization has been the use of metals. Steel has traditionally occupied a top spot among metals. Steel production and consumption are frequently seen as measures of a country's economic development because it is both a raw material and an intermediary product. Therefore, it would not be an exaggeration to argue that the steel sector has always been at the forefront of industrial progress and that it is the foundation of any economy. The Indian steel industry is classified into three categories - major producers, main producers, and secondary producers.

India is the world's second-largest producer of crude steel, with an output of 125.32 MT of crude steel and finished steel production of 121.29 MT in FY23.

India's steel production is estimated to grow 4-7% to 123-127 MT in FY24.

The growth in the Indian steel sector has been driven by the domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is modern, with state-of-the-art steel mills. It has always strived for continuous modernisation of older plants and up-gradation to higher energy efficiency levels.

MARKET SIZE

In the past 10–12 years, India's steel sector has expanded significantly. Production has increased by 75% since 2008, while domestic steel demand has increased by almost 80%. The capacity for producing steel has grown concurrently, and the rise has been largely organic.

In FY23, the production of crude steel and finished steel stood at 125.32 MT and 121.29 MT, respectively.

In FY24, the production of crude steel and finished steel stood at 143.6 MT and 138.5 MT, respectively.

In FY23, crude and finished steel production stood at 125.32 MT and 121.29 MT, respectively. In July 2023, crude steel production in India stood at 11.52 MT.

In FY24, the consumption of finished steel stood at 135.90 MT. The per-capita consumption of steel stood at 86.7 kgs in FY23.

In FY22, the production of crude steel and finished steel stood at 133.596 MT and 120.01 MT, respectively.

The consumption of finished steel stood at 105.751 MT in FY22. In FY23, the consumption of finished steel stood at 119.17 MT. In April-July 2022, the production of crude steel and finished steel stood at 40.95 MT and 38.55 MT, respectively.

ROAD AHEAD

The steel industry has emerged as a major focus area given the dependence of a diverse range of sectors on its output as India works to become a manufacturing powerhouse through policy initiatives like Make in India. With the industry accounting for about 2% of the nation's GDP, India ranks as the world's second-largest producer of steel and is poised to overtake China as the world's second-largest consumer of steel. Both the industry and the nation's export manufacturing capacity have the potential to help India regain its favourable steel trade balance. The National Steel Policy, 2017 envisage 300 million tonnes of production capacity by 2030-31. The per capita consumption of steel has increased from 57.6 kgs to 74.1 kgs during the last five years. As per Indian Steel Association (ISA), steel demand will grow by 7.2% in 2019-20 and 2020-21. Huge scope

for growth is offered by India's comparatively low per capita steel consumption and the expected rise in consumption due to increased infrastructure construction and the thriving automobile and railways sectors.

Our Manufactured Products

- ✓ ***Cutt & Butt Hinges***- These Hinges are made in 28 different dimensions.

A hinge is a movable joint that joins two items having rectangular pieces that fasten to two different parallel parts close one to each other and joining them and enabling swinging motion up to 180°.

A cut & butt hinge’s main function is to carry out swinging motions for the opening and closing of doors, gates, shelves, windows and other items. A butt hinge also works as the support for the rotating objects. It is the only thing holding the door-to-door frame.

[Remainder of this page kept intentionally blank]

Anatomy of Hinge

- ✓ **Railway Hinges**- These Hinges are made in 33 different dimensions.

Railway Hinges are almost similar to the butt hinges, but in differentiation they are quite longer than the butt hinges. It is used on heavy doors, wide doors, other exteriors. The production process of railway hinges does not differ with the butt hinges except the cutting of piece of sheet will be a bit longer than usual.

- ✓ **Parliament Hinges**- These Hinges are made in 8 different dimensions.

Parliament Hinges have a design of a traditional double leaf hinge with a cut out section at the top and bottom. This cut-out part of the hinge is designed to allow the door to by-pass a deep reveal and the door can open out 180 degree and swing flat against a wall. The whole production of parliament hinges is similar to that of the butt hinges except in the process of cutting as removing excess material from the metal workpiece is a way to shape it into a hinge component and after this can be accomplished through sawing, shearing and drilling.

- ✓ **Flower Door Hinges**-These Hinges are made in 4 different dimensions.

Flower door hinges are designed in such a way that the leaves sit flush against each other. This is achieved by fitting one leaf inside the other. This is an advantage against butt hinges since flower door hinges do not need a mortise or a recess on the surface of the body they are attached to. These types of hinges are used in light load applications. Flower door hinges are the main options for bathroom doors and main doors. It is very easy to fit as they can be fastened directly to the door frame and do not require more efforts.

- ✓ **T-Hinges**-These Hinges are made in 8 different dimensions.

T-Hinges are the hinges that are designed to support heavy weight applications. In order to hand and hold greater amount of weights than the typical hinge, T-Hinges are often thicker and made of stronger materials than their average duty counterparts. These are available in a wide variety of sizes, styles and materials. The only difference between T-Hinges and others is their ability function while supporting large amount of weight. Otherwise they look and function like any other hinge.

- ✓ **W, Z & Duck - Hinges**- These Hinges are made in 37 different dimensions.

W and Duck Hinges are mainly used for office furniture's wide door or cabinets, these hinges almost hide after fixing in furniture cabinets. W shape allows to be open and stay at 90 degrees, these hinges are also used for above head cabinets doors which can be open upside down and stay pen at 90 degrees.

Z hinges has also the same use especially for wardrobe doors. Once it is fixed in wardrobe door it will not visible from outside after final finish as a part of interior furniture and modern design of furniture. Z hinges fixed within the edge of the doors and hide behind the mica.

- ✓ **Aluminium Super Marble Heavy Tower Bolt**-These Bolts are made in 72 different dimensions.

Aluminium Tower Bolt is designed for keeping doors or gates locked. At Spider Locks, we have an impressive array of aluminium tower bolt range highly demanded by the customers, giving a beautiful touch to your laminated fixtures.

- ✓ **Gate Hook**-These Hooks are made in 25 different dimensions.

Gate Hook is a part of gate hinge which is driven into the post and supports the leaf attached to the gate

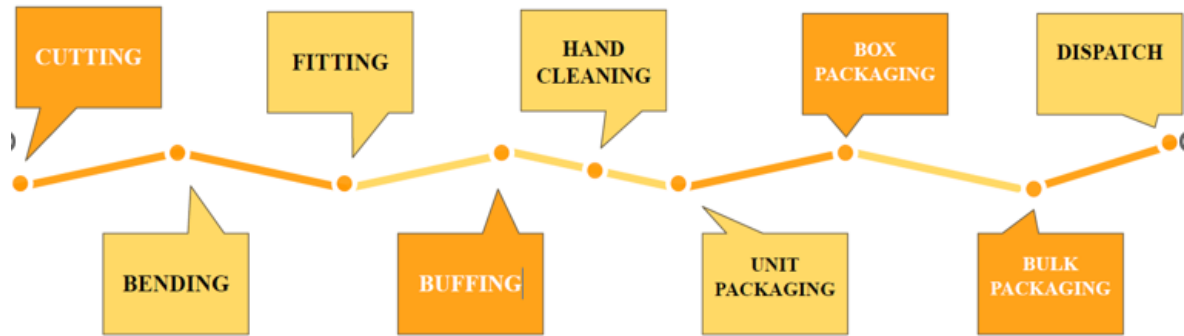

- ✓ **Door Kit**-These door kits are made in 28 different dimensions.

- ✓ **Screw**-A screw is a metal object similar to a nail, with a raised spiral line around it. These Hinges are made in 38 different dimensions.

MANUFACTURING PROCESS

This process can be divided broadly into the following phases:

- Designing and Prototyping
- Procurement of raw materials
- Cutting and shaping
- Machining & Assembling
- Surface Treatment
- Quality check and packaging

Manufacturing hinges is a complex process that involves several steps to create a functional and durable hinge. The process begins with designing and prototyping, where we plan the hinge on the basis of the type and dimension and develop a prototype for testing and validation.

Once the design has been finalized, we select the materials for the hinge based on the structure and desired properties, such as strength and corrosion resistance. Our raw materials mainly consist of steel, aluminium and brass etc. We have been able to secure timely supply of required raw material for our existing activity. Raw material is easily available in the domestic market and no difficulty is envisaged in sourcing of the raw material.

The next step is cutting, where the raw material is cut to the appropriate size and shape for the hinge using machines such as a laser cutter or water jet cutter. These machines use high-pressure streams of water or laser beams to precisely cut the material to the desired shape and size. It involves removing excess materials from the metal workpiece. This step is crucial to ensure that the materials are correctly flattened, deformed or cut into the hinge component. These machining methods involve casting, deformation, cutting and extrusion.

After cutting, the pieces of material are then shaped into the final form of the hinge using machines such as a press brake or stamping machine. These machines use high pressure to bend and shape the material into the desired format.

Once the hinge has been shaped, holes are drilled into the hinge to attach the hinge to the door and frame using machines such as a drill press or CNC machine. These machines use precision drilling tools to create the holes needed for attaching the hinge.

After drilling, in order to ensure a longer lifespan, aesthetic value and overall design of the hinges, the hinges undergo finishing processes such as polishing, rust-proofing, smoothing and painting. This process is done to improve the decorative appeal and durability of the door hinges and ensure quality assurance.

The next step is assembling of the hinge or any pins or other hardware items needed for the final product. In this process, we also double-check to align the door hinges properly to accommodate all the requirements of the hinge's application. This step requires skilled workers to put all the hinge parts together and ensure they fit correctly.

Post assembling, the hinge is tested for quality control measure to ensure proper operation and compliance with industry standards. This step is critical to ensure that the hinge will function correctly and meet the requisites of the industry standards.

The final step is packaging, where the hinge is packaged for shipping or storage. These products are packed into corrugated cardboard boxes and further into containers for dispatch. These containers are loaded into trucks or light commercial vehicles, trailers, which are unloaded at the point of mode of transportation based on the location of the customer and transported by roadways.

Quantitative and Qualitative Disclosures about Market Risk

Market risk is the risk of loss related to adverse changes in market prices, including interest rates. In the normal course of business, we are exposed to certain market risks including interest risk.

Interest rate risk

Interest rate risk results from changes in prevailing market interest rates, which can cause a change in the fair value of fixed-rate instruments and changes in the interest payments of the variable-rate instruments. Our operations are funded to a certain extent by borrowings. Our current loan facilities carry interest at variable rates as well as fixed rates. We mitigate risk by structuring our borrowings to achieve a reasonable, competitive cost of funding. There can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Liquidity risk

Adequate and timely cash availability for our operations is the liquidity risk associated with our operations. Our Company's objective is to all time maintain optimum levels of liquidity to meet its cash and collateral requirements. We employ prudent liquidity risk management practices which inter-alia means maintaining sufficient cash and the availability of funding through an adequate amount of committed credit facilities.

Credit Risk

We are exposed to the risk that our counterparties may not comply with their obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from our operating activities, primarily from trade receivables.

We consider our customers to be creditworthy counterparties, which limits the credit risk, however, there can be no assurance that our counterparties may not default on their obligations, which may adversely affect our business and financial condition.

SEBI through its circular (SEBI/HO/CFD/DIL2/CIR/P/2022/45) dated April 5, 2022, has prescribed that all individual investors applying in initial public offerings opening on or after May 1, 2022, where the application amount is up to ₹ 500,000, shall use UPI. - 1) The total number of Shares to be allocated to each category as a whole shall be arrived at on a proportionate basis i.e. the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of Applicants in the category x number of Shares applied for).

 - i. Each successful Applicant shall be allotted [●] equity shares; and
 - ii. The successful Applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- 4) If the proportionate allotment to an Applicant works out to a number that is not a multiple of [●] equity shares, the Applicant would be allotted Shares by rounding off to the nearest multiple of [●] equity shares subject to a minimum allotment of [●] equity shares.
- 5) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the Applicants in that category, the balance available Shares or allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful Applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising Applicants applying for the minimum number of Shares. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department for Promotion of Industry and Internal Trade (“DPIIT”).

The Government of India has from time to time made policy pronouncements on Foreign Direct Investments (“FDI”) through press notes and press releases. The Department for Promotion of Industry and Internal Trade issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

Under the current applicable sectoral cap, foreign direct investment in micro and small enterprises is subject to sectoral caps, entry routes and other sectoral regulations. At present our Company is in the business of Infrastructure Solutions, Digital Business Solutions and Consulting Solutions. As these sectors/activities are not specifically listed under the FDI Policy 2020, it shall come under the Permitted Sectors category, hence 100 % foreign direct investment through automatic route is permitted subject to applicable laws/regulations, security and other conditionalities.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each applicant should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the applicant shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Offer Period.
