

How to set up a T-OTP (Time-based OTP) to further secure your Sharekhan Login

By setting up a T-OTP on your Sharekhan Login, you will be using an advanced security measure that will make it next to impossible for fraudsters to enter your Sharekhan account. In this step-by-step walkthrough, we will be using the **Google Authenticator** app, so please have it installed on your mobile device. You can use any other widely known authenticator app of your convenience too.

Let's get into it:

1. Once you have logged in on the Sharekhan website, click on the **Change My 2FA / TOTP** option from the **Profile** dropdown, as seen here:

2. The following window will open up. You can go through the informative points. As mentioned earlier, do have the **Google Authenticator** app installed on your mobile device. Click **ENABLE TOTP**.

CHANGE 2FA / TOTP

Set Time-based OTP(TOTP)

- For Enhanced security, you can set up time based OTP in addition to Trading Password.
- You can use apps like Google [®] Authenticator, Microsoft [®] Authenticator or Authy on your mobile phone to generate 6 digit TOTP for every login.
 - » Android user can install [Google [®] Authenticator](#) or [Microsoft [®] Authenticator](#) by clicking on respective links. IOS users can install the app through their devices
 - » Signin to your google play account.
 - » Click on the install button on the play store. The app will be downloaded on phone linked with your google account.
- Once installation is complete, Click on Enable TOTP button below to proceed.

ENABLE TOTP

- The following window will now show up. The instructions in the bullets have to be followed. Essentially, you need to use the **Google Authenticator** app to scan the QR Code you see. The app will then display a 6-digit TOTP.

CHANGE 2FA / TOTP

Set Time-based OTP(TOTP)

- Scan the QR code on your authenticator app.
- Once Scanned, the app should give you a 6 digit TOTP. Enter it below for validation followed by Trading Password/OTP.
- Once TOTP is setup, you have to use the same mobile authenticator app to generate a new 6-digit TOTP every time you log in

Enter Details

Enter 6 digit TOTP 👁

CANCEL ENABLE

Scan the QR Code

- Enter the 6-digit TOTP in the space provided and click **ENABLE**:

Enter Details

Enter 6 digit TOTP

..... 👁

CANCEL ENABLE

- The system will prompt you to enter your Trading Password or OTP to activate TOTP in your account:

Enter trading password / OTP ✕

To activate TOTP, please enter Trading Password/OTP

Enter Trading Password Enter OTP

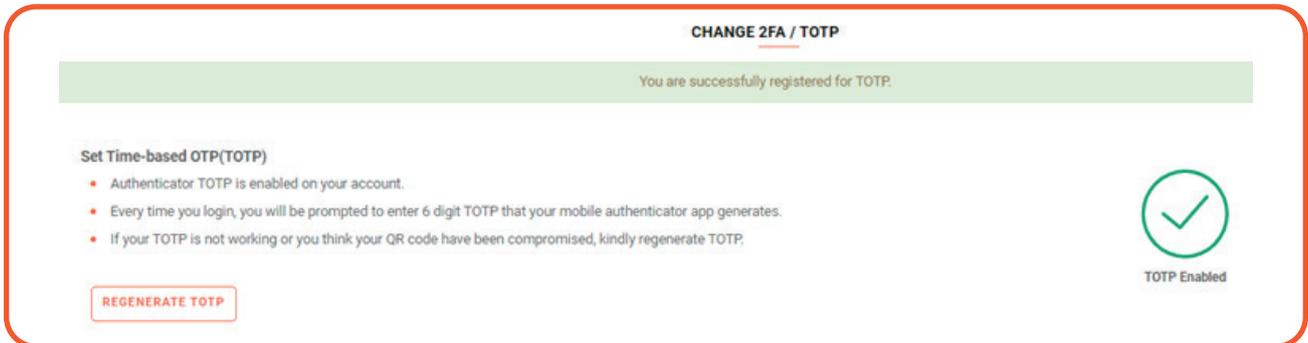

Enter Trading Password

_____ 👁

Forgot password

SUBMIT

6. Once TOTP has been activated, the following window will be displayed. You're done!

Note: Once the TOTP is set up, you have to use the same mobile authenticator app to generate a new 6-digit TOTP every time you log in, as seen here:
